

ISP, CP, WP and MP's oh my!!!

Welcome to the updated Item Point System. There have been a few changes, but not many as it works very well. The main reason for the update is to include the updated Campaign Point options, the new World Point options, and an updated and improved Monster Point system.

Item System Points (ISP)

Please note this system is complicated on first examination. This is to be expected of a document which tries to encompass so much in such a little space. Being 'In Depth' is not a bad thing, and as such anyone using it should familiarize themselves with it first, or expect the moderator to make changes to your submissions.

ISP Allocation

Each referee is granted a number of points with which the referee can elect to make discretionary awards to players on an adventure the referee ran. ISP is allocated per section of an adventure, with the sum total being the maximum ISP a referee can allocate for the adventure.

Note that ISP allocation for extended length events does not follow the 'per section' formula, and is instead done on a 'per player' basis.

The following table details the number of ISP available.

Threshold	ISP/Section	Length	ISP/Player
< Max 10k	30	3 Day	60
= Max 10k	35	4 Day	80
> Max 10k	45	6 Day Myths	120

Unbalanced Dungeons gain ISP as a normal adventure (30 per section).

Note that it is possible to save ISP over multiple adventures with CC/GSM approval, though generally only for campaigns or similar with an appropriate 'contract'.

Suitability & Stacking

It is expected that the items from lower level adventures reflect and represent the correct power level for the characters involved, and may be altered to represent this by the administrator.

Items which grant a bonus such as strength, armour class, casting levels, or life points, are not cumulative with one another; only the highest bonus is applied.

Personalisation & Auction

Normally, items must be 'personalised' to a single user by the debrief of the adventure where they were found.

There are rules for multiple personalisation included later in this document. It is also possible for an item found by one character to be given away to another in certain circumstances, even if the receiver was not on the adventure where the artefact was found.

However, this extended time without an 'owner' will sometimes weaken the powers of an item in unpredictable ways. There will be minimal 'weakening' if the finder is the guild-master of a guild in which the receiver is a member. Otherwise, the weakening will be less should both the finder and receiver be close in guild memberships, points or levels, class, alignment, and so on. Time spent together in the past forming a stronger 'karmic link' by adventuring together may also help prevent deterioration of the item.

Should an item be passed on in this way to a beneficiary who is not on the adventure, their name and details must be stated at the debrief. The beneficiary may choose to refuse the item, in which case it is destroyed.

Alternatively an item may be sent to 'Auction' – this is an in character way of selling off your unwanted items – Simply place the item in an envelope and write on the front your name, character details, and your minimum required amount of grulls for the item. Then hand it in to the checking in desk – You can only do this with items you have just received and not used.

Combination of Powers

It is generally possible to have items that contain more than one ability or power (e.g. a +0 magic sword which casts disruption 1/day and grants +9/3 life). However abilities listed under "Weapons" can only be included in a weapon.

Colour & Alignment

If an item contains only powers of one alignment or one mana colour, the item is considered to be aligned to that source. This would be the case for example for a +0 spiritual broadsword which casts Heal x1/day, and therefore must be aligned to Goodly spirits. An item which contains powers of multiple alignments requires the utilise of the appropriate alignment to use the powers. For example, a book which casts Heal 1/day and Spirit Shield 1/day would require utilise goodly spirit item to use the heal & utilise neutral spirit item to use the spirit shield. Similarly if a character who could

only use red mana items found a tome of Bind 1/day, Disruption 1/day, they could use the disruption but not the bind.

If a weapon contains other powers it cannot be aligned to inflict a colour of magic or alignment of spirit that is not present. For example, if I had a +0 spirit mace that casts Heal 1/day & Spirit Shield 1/day, I could align the mace to inflict goodly or neutral spirit damage, but not evil. Equally a +0 magic sword that casts Bind 1/day & Disruption 1/day could be able to inflict red or brown (or both) magical damage, but not any other colour.

Common sense applies.

Utilising Supernatural Items

In general, and unless otherwise noted, supernatural items of a specific powerbase may only be used by characters who have the appropriate utilise item skill (e.g. utilise spirit item, for spiritual items) and are not prohibited or restricted from using such (e.g. priests & magic items).

Non Standard Items

Non-standard items, outside the bounds of this document, should generally be agreed with the GSM before setting.

Non Standard Rebirths

ISP are not required to be allocated from an adventure to non-standard rebirths out of a referee's ISP allowance. Referees should still use the non-standard rebirth form in the previous fashion.

Weapons & Weapon Empowerments

In the below:

Group – refers to a wide category, such as 'Good' or 'Evil'.

Type – refers to a specific category, such as one racial type.

Magical weapons can be aligned to any one colour or hue, or simply grey, for no additional cost. Similarly spiritual weapons can be aligned to good, neutral or evil. Note the section of colour & alignment and not contradicting with other powers within the item.

In the case of mantic weapons, they can be personalised by any person capable of using either magic or spirit items; however the user cannot inflict

damage with the aspect they could not normally use. E.g. an elf could inflict magic ('mantic) damage, but could not inflict spiritual damage.

See the general section for the costs of adding apprentice, journeyman or master crafted status to weapons.

Item/Power	Cost
+0 Magic (of any one colour or hue, including grey)	20
+0 Magic, +1 Vs one type	25
+0 Magic, +1 Vs one group	30
+1 Magic	40
+2 Magic	60
+0 Pure Magic	40
Add Non-Grey Colour/Hue of damage to magical weapon (can add multiple) ⁱ	+3/colour
+0 Spirit (of any one alignment)	25
+0 Spirit, +1 Vs one type	30
+0 Spirit, +1 Vs one group	35
+1 Spirit	50
+2 Spirit	75
+0 Pure Spirit	45
Add non-opposite alignment of damage to spiritual weapon (e.g. 'can inflict goodly or neutral spirit damage').	+5
+0 Mantic (of any one colour & any one alignment)	50
+1 Mantic	100
+0 Pure Mantic	90
+1 Physical	20
Magic/Spirit weapon turns pure 1/day for 5 mins	5
Mantic weapon turns pure 1/day for mins	10
Weapon inflicts adventure perm damage 1/day for 5 mins. Sleep off perm means this damage can be healed normally.	25
Inflicts damage 'thru' PAC at all times	30
Weapon can be blade sharpened even though too great in size.	5
Supernatural weapon can be blade sharpened.	10
Weapon Cut through Opponents Aura of Defence 1/day for 5 minutes.	25

ⁱ e.g. 'the sword of elements - +0 Magic, can inflict red/green/brown/blue magical damage would be 20 (Base Red mana sword) + 3 × 3 (the extra three colours) = 29 ISP). Cannot contradict other powers placed in weapon.

Armour & Shields

Items which provide bonuses to armour (e.g. +1 MAC, +1 PAC) do not need to be in actual armour, but may if desired be another object. These objects are the same as those classified under Charms.

All armour items are master-crafted & require appropriate phys-reps, and all costs are for a full suit. No reductions are made for less locations.

If a +PAC bonus is included in supernatural armour, it is considered an 'enhancement' of the armour, so that all PAC granted by the armour applies to purely magical or spiritual weapon blows as appropriate.

Armour items that grant more than one bonus only stack if the protection is not the same. For example two items of +1 MAC would not stack together, but an item of +1 MAC and +1 MAC vs Red Mana would work together.

All suits of master-crafted armour & shields should be aligned to a single colour of magic or single alignment of spirits. Additional colours or alignments can be added with the same proviso as under weapons.

Armour costings are for the entire AC value including any master crafted or layering bonus.

Item/Power	Cost
Magical Master Crafted Armour	2 per AC ⁱⁱ
Spiritual Master Crafted Armour (requires utilise Sp. Item)	2 per AC + 2
Mantic Master Crafted Armour	4 per AC + 2
+0 Magical Shield	15
+0 Spiritual Shield	20
+0 Mantic Shield	35
Add Non-Grey Colour/Hue to magical armour/shield.	+2 per colour
Add Non-Opposite alignment to spiritual armour/shield	+3

AC/Pts	1	2	3	4	5	6
PAC	4	12	20	32	44	60
DAC	6	18	30	48	66	90
MACⁱⁱⁱ	8	24	40	64	88	120
SAC^{iv}	6	18	30	48	66	90

ⁱⁱ Cost per AC includes the base AC of the armour type, the +2 master crafted bonus and any layering). Thus magical master crafted studded leather (AC 3 + 2), would be $2 \times 5 = 10$ ISP.

ⁱⁱⁱ Cost is $\frac{1}{2}$ if vs one colour of magic only, $\frac{2}{3}$ ^{rds} if vs two colours only.

^{iv} Cost is $\frac{2}{3}$ ^{rds} if vs one alignment of spirits only.

Charms

Charms come in many forms; they could be rings, wands, talisman, boots, items of clothing etc.

Spells, Miracles & Evocations

[M] – must be a mana user and possess free mana (as opposed to innates).

[S] – must be a spirit user and possess free spirits.

[E] – must be an earthpower user and possess free earthpower.

Items which grant extra power do stack with one another, but to a maximum of +12 power from a given powerbase of a given type, and a maximum of +24 power over all pools from the same powerbase (e.g. one could have +12 mana & +12 red mana, or +8 red mana, +8 blue mana, +8 grey mana).

Items that grant an existing power user more power simply grant them more power. This power can be used just like normal, can be meditated back and so on and so forth, with the set restrictions on what can be cast from it (if appropriate). The exception to this is Regenerating power stores, this power forms a separate pool that allows effects to be cast from. It cannot be combined with a person's normal power, so a 4 point regenerating power store can only cast things that cost 4 or less power.

Item/Power	Cost
Casts basic handbook/new colour spell, basic miracle or druid evocation 1/day	2/Power
Casts wizard's grimoire spell, words from above miracle or advanced druid evocation 1/day	3/Power
Innate miracle/spell (from above) is mantic.	×4 Cost
Neuronic Innate 1/day	1/TBLP
[MSE] Additional mana/spirits/earthpower	4/Power
[MSE] Additional mana/spirits/earthpower (one specific colour/hue, sphere or field)	3/Power
[MSE] Power gained in the specific power store regenerates at 1/15 minutes, non-stacking with any other form of power regain.	25
[MSE] Add chosen basic spell/miracle/evocation to list at the start of the day	15
[MSE] Add chosen basic or advanced spell/miracle/evocation to list at the start of the day (must be of	18

appropriate sphere, colour or field to character)	
[MSE] Add chosen spell/miracle/evocation to list during adventure with 30 seconds calm prep/prayer.	+50% Cost ^v
[M] Turn handbook or basic new colour spell to 6th mantic 1/day (costs power as normal)	40
[S] Turn basic miracle to 5th mantic 1/day (costs power as normal)	40
[MS] Turn any basic spell/miracle to mantic 1/day (costs power as normal)	50
[MS] Turn any published spell/miracle to 6th mantic 1/day (costs power as normal)	60
[MS] Turn any published spell/miracle to mantic 1/day	80
[MS] Teaching scroll/scripture of a spell/miracle the character could already learn, already read.^{vi}	2 per MP 3 per SP
Draw on EP 1/day	16
True Believer (named faith of appropriate alignment) 1/day	16

General Charms

In the below:

Group – refers to a wide category, such as ‘Good’ or ‘Evil’.

Type – refers to a specific category, such as one racial type.

Items that use the Character Point options will be checked for appropriateness and heavily moderated if not appropriate.

Item/Power	Cost
+1 Level of Resistance	20
+1 Level of Resistance to one of Magic/Spirits	12
+1 Level of Resistance to one of EP/Neuronics	8
+2 Level of Resistance (from +1 above)^{vii}	×3 cost
+1 Casting Level (All/One Colour of Magic)	14/7
+2 Casting Levels (All/One Colour of Magic)	28/14
+3 Casting Levels (All/One Colour of Magic)	42/21
+1 Strength (Non-Stacking/Stacking to +2)	15/20

^v +50% cost on the basic/advanced costing above, depending on whether the power permits adding only basic or basic & advanced miracles to list.

^{vi} Unlike previous, these are proper teaching scrolls/scriptures and are issued on the appropriate cards, pre-read by the character. They require spare slots in order to be used and follow all the standard rules on such.

^{vii} +2 levels of resistance can be vs all or vs one powerbase, at triple the +1 cost.

+2 Strength (Non-Stacking)	45
25% Cold Rage 1/day	10
50% Berserk Rage 1/day	25
25% Cold Rage vs one Group at all times	40
Repel/Attract one Type 1/day	6
Repel/Attract one Group 1/day	8
Repel Life 1/day	10
Ability from T1 – 9^{viii}	2 per 10 CP
Ability from T10	3 per 10 CP
Ability from T11	4 per 10 CP
Ability from T12	6 per 10 CP
Immunity from T1 – 9	4 per 10 CP
Immunity from T10 – 12	8 per 10 CP
Immunity from T1 – 9 vs the 1st fx it would apply against in each day & 5 minutes thereafter.	3 per 10 CP
Discipline 1/day	15
Grants Ward Pact 8 levels as per an Ancient Folks Ward Pact, including who is can apply too.	20
Grants Ki/Primal Strike 1/day for 5mins	15
1/day Empowers one weapon to inflict +0 magic damage of one specified colour for 5mins^{ix}	8
1/day Empowers one weapon to inflict +0 spirit damage of one specified alignment for 5mins (still requires utilise spirit item)	10
1/day Empowers one weapon to inflict +0 mantic damage of one specified colour/alignment for 5mins	20
Add extra colour/alignment to temporary weapon empowerment	+2/colour +3/alignment
Grants handbook undead touch fx (Chosen when used) 1/day (requires utilise evil spirit item)^x	15
Gaseous Form 1/day as Vampire (evil spirit item)	35
Plane Shift 1/day as Wight (evil spirit item)	20
Walk Thru Walls 1/day as Wraith (evil spirit item)	20
Scholarly Interest 1/day (grants a Major Prayer of	15

^{viii} Tables abilities set on dungeon must be from tables at or below the maximum threshold of the dungeon (e.g. Max 4k – maximum table = T10).

^{ix} Colour/alignment should be specified on the item card, and is not chosen on use.

^x One from paralysis, freeze, fear, disease, level drain.

one specific powerbase every 30 seconds about one specific line/warding/ritual/artefact or similar)	
Knowledge of the Arcane 1/day (as Scholar)	8
Major Prayer 1/day (one specific powerbase)	10
Major Prayer 1/day (one specific powerbase & subject)	6
Minor Prayer 1/day (one specific powerbase)	4
Grants additional live to minus the 1st time needed per day	5 per 6pts (max 24)
Kick in live to minus (from above) is either Magic or Spirit (chosen when the item is set).	x2 Cost
Grants 4th level elf/drave innates of a specific type	20
Grants 6th level elf/drave innates of a specific type	45
Grants 8th level elf/drave innates of a specific type	70
Additional cost for ×2 innates (from 8th)	+70
Additional cost for ×3 innates (from ×2)	+70
Item permits character to read languages	6
Item permits character to disarm traps (as scout)	10
Character counts as knowing one specific potion recipe for application benefits.	5/recipe
Item causes character to regenerate 1 TBLP & 1 to the worst loc per 5 minutes (c.f. ½ troll). Not stacking with other Regeneration.	40
Character Gains the Forearm Parry Skill	25

Life Items

Obviously, non-stacking with any other life items.

Life	3/1	6/2	9/3	12/4	15/5	18/6	21/7	24/8
ISP	4	9	14	20	28	38	50	65

Consumables

Potion/Scroll items which are just potions/scrolls are issued on potion cards and are trade-able as normal. Items which grant well-equipped are detailed under the ISP Campaign Continuity Effects section, as most are based on having a farm, a deal with a supplier, or similar.

Item/Power	Cost
Issued with a batch of potions	1/difficulty ^{xi}
Issued with a magical scroll (basic handbook/new colour)	1/MP
Issued with a spiritual scroll (basic miracles)	1/SP
Issued with a druidic talisman	1/EP
Issued with a neuronc focussing crystal	2
Issued with a neuronc shard of a specific neuronc	1/TBLP
500g issued to character	1

General Additional Effects/Powers

Guild/group items are not destroyed on the death of the user, but only on the 'destruction' of the guild/group, at system manager's discretion. Multiply-personalised items are not destroyed by the death of an individual user. In order to use a Guild item the individual must be claiming that guilds benefits (or claiming no guild in the relevant slot in the case of closed guilds).

Item/Power	Cost
Item is apprentice crafted (as per smithing).	10
Item is journeyman crafted (as per smithing).	15
Item is master crafted (as per smithing).	25
From master crafted, add for item is considered animate.	+20
From master crafted, item is beneficially inseparable	+20
Item activates a named innate under specific named conditions (e.g. user falls unconscious)	20 per power
Item can activate a named innate OOC (e.g. if user is unconscious)	15 per power
Item does not blow up on 1 st death	+25% ISP ^{xii}
Item does not blow up on death	+50% Cost ^{xiii}

^{xi} Costs 1 ISP per difficulty level for a batch of potions (gains doses as per appropriate for the potion difficulty – e.g. 12pts would be 3 per batch/bottle, hyper-action would be 1 per batch/bottle).

^{xii} Items from 3 & 4 Day events gain this benefit for free.

^{xiii} Items from Myths events gain this benefit for free.

Item has 8 dungeon uses ever instead of a blow up duration	Free
Additional blow up date	15/3 Months or use
Item innates are now once ever, rather than 1/day ^{xiv}	½ Cost
Item is personalised to all members of a specific closed guild and grants benefits to all of them. Requires 4 members on dungeon to use.	×4 Cost
Item is personalised to all members of a specific guild and can be used by any one of them, and passed between them as desired. Requires 4 members on dungeon to use.	×3 Cost ^{xv}
Item is personalised to all members of a specific guild and grants benefits to all of them. Requires 4 members on dungeon to use.	×5 Cost
Item can be used by another person chosen by character item is personalised to at the time of use for 5 mins 1/day	+10
Item can be used by anyone of a specific alignment or character bracket (e.g. druids, wizards). It is still personalised to a specific individual and disintegrates if they die. NB: This is always at GSM's discretion	+100
Calls to hand 1/day	3
Grants 'utilise' of one specific type for that item only (e.g. grants utilise spirit item for this item only)	+10/type

^{xiv} Can only be applied to items which contain solely innates and no other powers. Once ever items do not blow up on death.

^{xv} Can remove the 4 member requirement by increasing the cost to ×4 Cost, or alternatively personalise to a list of named characters, without needing a group/guild or 4 members present, again for ×4 Cost.

Campaign Points (CP)

As most people will be aware the CP system was updated in February 2015 to provide a few more options and to iron out a few kinks that had been spotted. Referees are actively encouraged to use the CP's on their dungeons to reward players.

CP awards from a dungeon should be emailed to the CC, using Labycc@gmail.com, and the referee will receive 10 monster points for doing so.

CP Allocation and Options

CP's are no longer gained based on the level of the dungeon. Instead 1 CP is gain per section of the adventure.

CP awards fall into three main categories:

Reputation – Prestige and Notoriety.

Possessions – Things (or places) a character can own and trade.

Other – Things that cannot be traded.

Reputation and “Other” are recorded by the CC. Possessions will be issued on cards and can be collected from the desk a short time after being issued. They can then be traded with other players as desired.

Reputation

How a character is viewed with a specific group. It splits into two sub-categories. Prestige, a group reputation with the group, and Notoriety is a bad reputation.

A single CP can be awarded to an individual, part of the party, or all of the party. The individuals benefiting (or not in the case of Notoriety) should be listed when the CP is submitted.

CC contracts normally require prestige as part of their requirements. A single point of prestige can be applied to as many contracts as desired, providing they are all appropriate. However one character can only gain a benefit towards one contract per dungeon (or day of multiple dungeons), and a contract can only benefit from a single person each dungeon (or day) unless specifically stated otherwise.

The CC will also use a characters Prestige (normally with the Empire but not always) at the end of each year to assess if they should be recommended for New Year's Honours (Prestige is not the only factor in this and the final decision remains one made by the Senate/other appropriate source).

Possessions

A single CP can provide one person with one of the below. When the CP's are sent in the character name and player name gaining the benefit should be listed.

Name of Benefit	What it does	How long it lasts
Dealer	Grants 12isp of dungeon temp items, chosen at the start of the dungeon. These may only use the ISP equals character points option if the ability is available to the character.	1 use ever
Place of Power (Magic/Spirit/EP/Neuro nic)	Reduces the number of roles required when performing an advanced make of the relevant type by 1, to a minimum of 1.	3 uses ever
Tamarisk Patch	Provides the character with their basic 6 point allowance for free. This is currently 5, and not enhanced for being an Elf/Neuronic character	5 uses ever
Day at the Races	Usable 1/week while involved with the caves. It has a 1 in 4 chance of winning the weeks race and winning the owner 1000grulls	Lasts 12 months from when issued
Business	Usable 1/week, but takes the characters make slot. It has a chance of making the character a profit. The character makes (1d10-3) x 500 grulls in profit. If a loss is made the character must pay for it at that point or the business is lost.	Lasts indefinitely
Mystical Mount	At the end of each adventure the character is carried home in a mystical and interesting way. If this is used to save a character when they are trapped (Ref's discretion) then the mounts power fades.	See description
Lecturer (Subject)	The character has a lecturing circuit on a specific subject. This grants them a lucky idea 1/day on the relevant subject.	Lasts 12 months from when issued
Master of the Ship	The character owns a ship, of some kind.	Lasts indefinitely
Herd (Type)	The character owns some cows, or sheep, or maybe goats.	Lasts indefinitely
Farm (Type)	The character has a farm that produces some plants, but does not make a profit.	Lasts indefinitely
Extra Pair of Hands	Grants the character +10% to the Advanced Smithing skills.	1 use ever
Apprentice Scribe	Increases the amount of normal scrolls a character can make in a week's visit by 3 power.	8 Uses ever
Home	The character has a home in the local area. At the start of each dungeon in that area they can a major prayers worth of information on local events	Max 2 per character
Blinkered Eye	The character has a chamber (or even home) that is impervious to scrying. Events that occur in this room are immune to all informational effects UNLESS they are subsequently discussed outside the room	Lasts indefinitely
Haven	The character has a chamber (or even home) that is warded and while they are inside they are impervious to all effects targeted at them.	Lasts indefinitely
Large Tab (City)	The character is well known in the city and will always be given a tab in Taverns and other drinking establishments	Lasts indefinitely
Apprentice/Squire	A handy apprentice/other hanger on. They don't offer any benefit at this time.	Lasts indefinitely
Roadsmith	The character has knowledge of one of the mystical pathways that criss-cross Primus. This allows them to travel from one stated point to	Lasts indefinitely

another (EG Halgar to Deci). Such a journey takes 15 minutes, others may be taken at ref's discretion. Beginning this journey takes some time and cannot normally be done while in combat/a hostile environment.

City Bound	The character has an affinity for a specific city. They have a general feel for how things are in the city (CF ley of the land) may gain further info at ref's discretion.	Max 1 per character
Land Bound	The character has an affinity for a specific rural area. They have a general feel for how things are in the area (CF ley of the land) may gain further info at ref's discretion.	Max 1 Per character
Forge	The forge will repairs a characters armour in between dungeons, meaning it does not lose uses. The forge can be used on other people's armour for additional uses (one per person)	10 Uses ever

Other

These will be maintained on a list in the Almanac where relevant. This list will be split into two parts, public knowledge and OOC reference. So Renown or Kids would be public, a Rite of the Blinkered Eye wouldn't be. As with other CP's when submitted the character and players name should be included.

Name of Benefit	What it does	Notes
Kids (Location)	A sudden rush of children are born named after the character	
Folly/Crypt	A place set aside for when the character dies. This grants them an extra 10isp when (if) they rebirth.	A character can benefit from a maximum of one of these. And it can only be used once.
Guild hall	Provides a one month extension to the chosen guild	A maximum of one guild hall can be obtained by a single guild standardly in any month.
Renown	The character has acquired a nick name in a specific city or region	Only the most recent nick name in any region applies.
Statue	The character gains a point of prestige. This does help with completing CC contracts unless they specifically require statues.	

World Points (WP)

Designed as a simple method to track the effects multiple dungeons have on a specific area. WP effect several different areas of a cities life (Stats) listed in the Almanac.

WP Allocation

A dungeon gains WP's based on the level of the dungeon.

Threshold	WP/Section
< Max 7500k, or Unbalanced	1
< Max 15k	1.5, round down.
No Max	2

The effects of WP's should be relevant to the dungeon and if it was successful or not. In general a successful dungeon should benefit a location, while mistakes/failed dungeon will be dis-beneficial to it.

A single WP increase (benefit) or decrease (dis-benefit) one stat in one location and normally only 1WP can be attributed to a single stat for any given dungeon (or day for an extended length).

World Stats

Each Labyrinthian City, or other geographical region (Far North, Baronies, Amles, Ishma) has a set of stats attributed to it. They range from 0 to 100. 100 means the thing is good/powerful, and 0 means it isn't.

Fealty – This represents how the city views the Governor and by extension the council. Other parties are dealt with by prestige (or notoriety) within the city. A high score means the city is loyal to the council and will do what the Governor wants. A low score will result in unrest and the council finding it difficult to run the city.

Prosperity – A mix of various factors. This score deals with Money, Food and products in general., A high score means the city has enough food, cloths, housing for people and money to keep it all running. Low scores mean the city is turning into slums and can't make ends meet. This isn't to say that a high score means everyone is well off, just that the city is overall doing well.

Order – Crime and how much of it happens. A low score means criminals run the streets. Robberies are common, murder happens, and "road taxes" are on most streets. A high score conversely means that crime is cracked down on and when it rises the Watch head in and deal with it quickly.

Justice – How effectively Justice is dispensed. While the Watch catch people the Magistrate tries them. A high score means that those criminals caught are processed fairly and convicted, a low score and criminals are ending up back on the street either because the Magistrates office is too lazy to do anything, or possibly even corrupt.

Stability – The overall safety of the city from external threats. Be it tribal raiders, bandits, Demonic invasions, or roaming armies. High scores mean the militia are patrolling and keep these threats at bay, ensuring the rural lands are protected and the city gates manned. Low scores and travelling through the cities territories can be dangerous, even for mercenaries.

Primal Strength – This represent show strong Primus is in the area. A low score means portals/path ways regularly open and the fabric of reality is very weak. High scores and portals are uncommon, and summoning Demons/Angels can be difficult.

Allegiance – This directly ties to the Nobility and how much support they the city council. A low score means the Nobility have little or no faith in them and will often ignore them and do what they want. High scores means the council will find it easy to gain support for their initiatives.

Draconic Power - Each Place has a stat for each Dragon/Drake and how much power they have in the area. This power may be worship, a font of power, or some other reason. A high score means more power, and low means a minimal representation.

Deific Power - Much the same as Draconic power but for Gods. This represents how much worship they have in most cases, though it can be other more obscure sources of power in some cases.

Menace

Each dungeon (or day for extended lengths) generates a single point of menace. A Menace is agreed in advance with the CC and GSM. It is a faction of bad guy (or maybe good guys) seeking to achieve something. If the results of a dungeon go in their favour then the menace strengthens them, if it goes against them it weakens them. When a predetermined amount is reached a relevant system effect can occur.

For example:

The Cult of Mendez (bad guys) are seeking to turn people into goats. If a dungeon seeking to stop them fails then the Menace would strengthen the cults goals. If a dungeon succeeds then it weakens their goals.

Alternatively the Cult of Fanatical Goodlyness is trying to turn people goodly. If the party works for them and succeeds then the menace strengthens their goals, but if the party decides to betray the Cult and do evil things it would weaken them.

This should not be considered a means for the referee to “win” as their NPC’s and if it is used in such a manner then it will simply be ignored.

Monster Points (MP) and Ref Points.

Gained through helping out at the caves, most commonly Monstering, A-reffing or Refing, but they can be acquired through other means. People can use there monster points on numerous options listed below. Ref Points are specifically gained from Refereeing or A-Reffing.

Gaining MPs and RPs

Monster points are most commonly gained from Crewing for a dungeon (Reffing, A-Reffing, or Monstering), and this is as follows:

20MP's per section

A 20MP bonus if the dungeon is at a location other than the caves.

A 5MP bonus if the individual gets the MP's signed on on the day.

Additionally referees can gain the following bonuses:

Sending a Kit List into the booking line in advance of the dungeon (before 5pm on the Friday before the dungeon) is worth 10mp's.

Providing a Write up of the events of the dungeon to the Plot Referee is worth 10MP's

Emailing the CP and WP results from a dungeon to the Laby CC is worth 10mps.

Referees earn 2 Ref points per section they referee and A-Ref's earn 1 per section.

Spending MP's and RP's

As mentioned MP's and RP's have several options available to them.

Ref Points –

1 Ref Point can be exchanged for 5 Monster Points

1 Ref Point can be used to gain a level on a character that is below 8th on the day of play.

1 Ref Point can be used to regain a level lost through off dungeon activity (Dungeon makes, casting restore life off dungeon etc.)

Additionally ref points can be used to gain a teaching scroll of a standard spell personalised to one of the referees own characters. This cost 1 Ref Point for each Mana point of the spell.

Monster Points –

These can be used to put additional points on a character on a day it is being played (detailed below).

They can be used to gain items for one of the players own characters (detailed below).

1 Monster point can be exchanged for 100 grulls issued to one of the players characters.

One of the players characters can be issued with a suit of standard armour (Master Crafted or not), costing 5mps per point of AC for the armour.

A player can use Monster Points to help sustain a guild, making them Eternal. This costs a total of 2500 monster points, a maximum of 1000 monster points can come from any single player and it requires a minimum of 5 players involvement to make a guild eternal.

Placing MP's on a Character

On a day when a Character is being played a Player can put monster points they've earned on them. This is based on the number of monster points the Player has earned as below:

<u>Total Monster Points Earned</u>	<u>Points that can be placed on a character</u>
Less than 1000	25
1000 to 4999	50
5000 to 9999	75
10000 to 19999	100
20000 to 29999	150
30000+	200

In addition to this if a Character is under 75 points a Player can always place a minimum of 75 monster points onto a character.

Monster Point Items

Monster point items fall into three categories. Those that can be created at any time, those that can be created on a day when someone is Crewing for a dungeon, Desking or Armouring, and those that can be created on a day when someone is Crewing, Desking, or Armouring for a Theme (or Themed) day.

A maximum of 500 monster points can be put in any individual item, and they require the relevant “Utilise item skill” to use them (EG to use a spiritual item requires Utilise Spirit item of the relevant alignment).

Referees are free to moderate Monster Point items on dungeons if they feel they are being abused.

In addition to the below a player may make an item “Does not blow up on Death” by using double the number of Monster Points, this does not count towards the 500 monster point limit above.

These items are available to anyone and can be made freely at the desk:

Innates of Spells -

0th level Cantrip	5 Points each
Standard Spell 1st – 4th Level	10 Points per mana point
Standard Spell 5th – 6th Level	10 Points + 10 per mana point
