Introduction

This book is dedicated to providing details on the character classes that fall into the ‘scout’ bracket, and their abilities, including potions and Tendencies.

The natural role on adventure of the scout character is as an investigator and explorer, their strength lying mainly in the physical world but neither as combat orientated as the warrior nor so limited in their sphere of expertise. This is true to a varying extent for the various classes listed below, as some are specialised in one specific area, enhancing their talents in that one area at the cost of others, but the basic principle holds. Do not play one of these classes if you want to excel as a warrior, a wizard, or a priest! While the scout classes may have some limited talent in these areas, they will never be a match for someone whose sole focus of strength is there. Scouts’ strengths lie mostly in diversity, and remaining unnoticed – when there is real danger, they have usually seen it coming and already got out of the way, leaving the warriors, wizards and priests to deal with the threat. That said; the different classes below all have their own strengths and weaknesses, so consider each one closely before you make a decision.

This book now contains the complete updated rules for the scout classes – including a fully updated post 8th development section – these skills totally replace their previous versions in all ways. If a previously listed post 8th level ability is not listed in this publication it has been removed from the published system.

As this is the 3rd Edition of the *At the Sharp End* some of the originally produced rules and skills that have been in play for a few years have now been altered.

Notes:

Standard and specialist skills for each class are listed after the classes section of the book, while life-points for non-human variants of these classes are also listed at the back.

Dexterity from these classes will stack with racial dexterity, such as that possessed by goblins.

System Limit

The system limit for Scout skill levels is 12. It is not possible to have a skill level above this without the ability explicitly stating that it exceeds the system limit.

PATHFINDER

The pathfinder is often called the scout, for that is the role they most often fulfil in any adventuring group. They may be the first to investigate the route ahead, locate any potential dangers or traps, and report back to the rest of the group. They are independent, perhaps spending much of his time out of sight of their companions, disarming dangerous snares before the group reach them, retrieving valuable treasure for safe-keeping, and so on.

Pathfinders are generally found (or rather NOT found) creeping ahead of the party until another character class is needed. Then they go behind the party, to find anything not previously discovered.

Generally speaking, furtiveness and cunning are the pathfinder's tools. Pathfinders are the most 'general' and adaptable of all the 'scout bracket' classes, capable of turning their hand to nearly everything.

Pathfinders may be of many races – including Human, Half-Elven, Elven, Drave, Faerie, Dwarven, Halfling, Goblin, Orcen and Farfolk. Some of these races have slightly altered skills or life-points, listed below or at the end of this book.

Human Life Points

Level	Total Body	Per Location	Dexterity AC
1	26	9	0
2	29	10	0
3	32	11	1
4	35	12	1
5	38	13	1
6	41	14	1
7	44	15	2
8	47	16	2

Skills and Abilities

Level	Weapon Skill	Ability
1	O skill	-
2	H skill	Two standard skills
3	E skill	One standard skill
4	MP skill	One standard skill
5	B skill	One standard skill
6	-	One standard skill
7	-	One specialist skill
8	-	One specialist skill

Maximum Armour Class is 7 for Pathfinders. Pathfinders may utilise light and medium armour, and may not acquire the ability to wear heavy armour (except via the Facility with Armour (Table 4)). They do not have the ability to use a shield, but can gain it later.

Post-8th Level Development

Pathfinders buy as 1st Class Pathfinder.

THUG

Thugs are the bully boys, rousters and bouncers for the shadowy underworld of the streets of the Empire. They have some of the skills of a Pathfinder, but have a more rough-and-ready attitude which has led to the development of some combat skills. However, this extra time spent in pursuit of martial skill, and their general attitude towards life, means that they will not manufacture potions.

Allowable races are listed within the life scale section at the end of this book. Most commonly found on the streets of the Empire are Human and city Orcs (Orcs have the same life scale as listed below).

Life Points

Level	Total Body	Per Location	Dexterity AC
1	28	9	0
2	32	11	0
3	36	12	1
4	40	14	1
5	44	16	1
6	48	17	1
7	52	19	2
8	56	21	2

Skills and Abilities

Level	Weapon Skill	Ability
1	O + U skill	-
2	MP skill	One standard skill
3	E skill	-
4	H skill	-
5	B skill	Unarmed combat
6		One Warrior skill*
7		One standard skill
8	1st mastery O-class weapon	One specialist skill

Maximum Armour Class is 8. May wear light and medium as per Pathfinder and may use a shield [U skill].

*This is a Warrior specialist skill, exactly as per those available to Warriors, from the following list:

Weapon Mastery

By means of training and practice, the Thug may become more skilled with any one specific weapon, e.g. Broadsword, Handmace, Battleaxe, Bastard Sword, Spear, etc. This mastery means that one grade of damage is added to the normal base damage done by a weapon of this type. Any weapon usable by the character may be chosen, including 'B' class weapons.

Smithing

This skill allows the Thug to manufacture weapons and armour.

Unlike other specialist skills, this skill costs 1000grulls to learn as the thug sets up a smithy. The cost of armour made by the character is only 10 grulls per location per point of A/C (e.g. AC 3 all over is 210 grulls). The cost of the skill mostly comprises the cost of materials wasted in getting used to the equipment and preparing the forge. Thus another individual could not benefit from the forge without similar expenditure. The amount of equipment the character with this skill may manufacture is 700 grulls per weekly visit to Labyrinthe. It is assumed that a Smith will adjust and make running repairs to their own armour, preventing wear and, as such, someone with this skill does not lose adventure 'uses' on their own armour. Standardly weapons in Labyrinthe are assumed to be free, but in cases where it may matter a Smith can manufacture a weapon at 1/3 of the 'bought price'.

Enhanced Reflexes

By means of rigorous training, the Thug may learn greater agility in combat, thus giving him a bonus of +1 Dexterity Armour Class (DAC). This replaces the first point of dexterity armour class available post eighth on table one and may only be taken once. Note: If you are a class which naturally gains innate DAC, this extra DAC will stack with the DAC that you already have. This skill is sometimes referred to as Dexterity Training.

+6/2 Stamina

By means of rigorous exercise and training the Thug may become extremely fit. This fitness has the effect of giving him an extra 6 total body life points, and an extra 2 life points per location. It does not however increase his level for resisting magic or spirits. This skill may only be taken once by a character.

Post-8th Level Development

Thugs may buy abilities as per Thug, and [non-1st class] Pathfinder; however they may not acquire potion recipes or the ability to make potions.

ASSASSIN

Assassins are trained in the art of killing by surprise or stealth. Their skill lies in approaching a target unseen and undetected, striking and then escaping. Their repertoire of subtle techniques includes not only the dagger in the back, but poisoning, disguise and stealth.

Assassins may be Human, Half-Elven, Goblin, Orc, Blauz and any Evil Elf / Drave. They may be any Evil alignment.

Human Life Points

Level	Total Body	Per Location	Dexterity AC
1	26	9	0
2	29	10	0
3	32	11	1
4	35	12	1
5	38	13	1
6	41	14	1
7	44	15	2
8	47	16	2

Skills and Abilities

Level	Weapon Skill	Ability
1	O + U skill	-
2	MP skill	Discern and Make Poisons
3	Conditioned Heart-Stop E skill	One standard skill
4	H skill	One standard skill
5	B skill	1st Backstab
6		Disguise skill
7		One specialist skill
8	1st mastery dagger	One specialist skill

Maximum Armour Class is 7. Assassins may wear armour any sort of armour and may use a shield.

Conditioned Heart-Stop

At 3rd level Assassins are implanted with a conditioning by their trainer, which will stop their heart and kill them should they reveal details about the trainer, or of any contract the Assassin has undertaken, to any other than the 'appropriate' people – his superiors, assistants, or employers.

Post-8th Level Development

Assassins buy as per 1st Class Assassins.

ROGUE

The Rogue is possibly either a mage too lazy to study who dropped out from school and took up thievery, or a Pathfinder with a natural talent for magic. In either case, they have a fair degree of magical skill and knowledge, and have also picked up various techniques of the Pathfinder. Their learning on the ways of magic makes them a useful addition to a group when dealing with magical problems.

Rogues have innate mana, but may not buy glyphs from the desk; rather they must gain all their glyphs as specialists - even grey ones - and are limited to five, exactly as a wizard. In addition a rogue starts off with Detect Magic as a cantrip. Rogues are no longer required to be able to read mana glyphs.

Magical spells are cast as a wizard of an equivalent level, including the reading of magical scrolls.

Rogues may be Faeries, Elves, Draves, Half-Elven or Human. Elven Rogues are not able to use spells of their opposite colour.

Human Life Points

Level	Total Body	Per Location	Dexterity AC
1	24	8	0
2	27	9	0
3	29	10	1
4	32	11	1
5	35	12	1
6	37	13	1
7	40	14	2
8	42	15	2

Level	Weapon Skill	Ability	Mana
1	O skill	Recognise Mana	1
2	-	Read Glyphs and Languages	3
3	H skill	One standard skill	6
4	-		10
5	E skill	One standard skill	15
6	-		21
7	-	One standard skill	28
8	1st mastery in an O class weapon	One specialist skill	36

- A Rogue's maximum AC is 7.
- They do not possess the skill to use shields.

Rogues may not use spirit items of any sort.

Rogues are allowed to wear any light or medium armour however they do have metal restrictions as below. They may never acquire the ability to wear heavy armour.

A Rogues metal allowance is 2 'O' class weapons worth of metal, or a suit of studded leather and a dagger.

They may not acquire the scout ability to use spirit items, nor read spiritual scrolls. They are in both the Wizard and Scout brackets.

Post-8th Level Development

Rogues progress post 8th as Rogue, [non-1st class] Pathfinder, and magically as Any [see the Wizards Grimoire for the magical talents].

WAYFINDER

The Wayfinder is a spiritual Pathfinder. They have limited priestly talents in a similar way to a Spirit Warrior, and skills in various Pathfinder activities.

As with all other classes in the priest bracket Wayfinders do not naturally gain the ability to utilise magic items.

Wayfinders are Human.

Wayfinders are no longer required to be able to read spirit runes.

Life Points

Level	Total Body	Per Location	Dexterity AC
1	24	8	0
2	27	9	0
3	29	10	1
4	32	11	1
5	35	12	1
6	37	13	1
7	40	14	2
8	42	15	2

Skills and Abilities

Level	Weapon Skill	Ability
1	O skill	Rec Spirit, Discern Nature of Wounds, Discern nature of Undead
2	H skill	Read Runes, one standard skill
3	E skill	Discern Curse/Bless, Use Spirit Items
4	-	Discern Disease
5	-	One standard skill
6	-	Discern Spiritual Mastery
7	-	One standard skill
8	1st weapon mastery O-class weapon	One specialist skill

The maximum AC of a Wayfinder is 7. They may wear light and medium armour and may never acquire the ability to wear heavy armour. They do not possess the skill to use shields.

They may never acquire the ability to read magical scrolls.

Post-8th Level Development

- Wayfinders may progress as (non-1st class) Pathfinders.
- Wayfinders may learn spiritual abilities as per (non-1st class) Spiritual Warrior.
- They are considered to be in both the Scout and the Priest brackets.

BEGGAR

The Beggars of Primus are a strange brood, split into two castes within each city. There are the traditional Hanot caste Beggars: Men and women who are simply down on their luck – transients, paupers without the will or means to work, often invalidated troopers, or injured peons. Then there are the Kallah, the 'professional' beggars: Those who rose from the Hanot caste inspired by the leadership of the Kallah Lord of the city.

The Kallah caste of each city is governed by a Lord, a mysterious figure known only to his lieutenants, and reputed to be amongst the most deadly men on Primus. Conflict between these Lords is apparently only avoided by each staying within their own city, and rumours link the Beggar Lord of a city in some kind of deeply soulful relationship with the City Spirit of the settlement. Therefore, beggars of each city are often nervous of contact with those of other cities, uncertain what secrets they might unwittingly give away by their actions, but at the same time desperately hopeful that they may learn something that earns favour from their own Lord. Or, perhaps, that this person could well be one of the few peers met outside the alleys of their home cities with whom a drink and a relaxed talk can be had.

It is said that Kallah caste beggars greet each other by shaking the left hands. Why? Well the right hand clutches the Poinard tight just in case...

As described above, there are two castes of beggar, and their details are slightly different. Both sorts must name their city of origin when first played, and that city must be a recognised location / settlement.

HANOT BEGGAR

Hanot must be human. In general, other races are not tolerated as beggars on the streets of Imperial settlements – either the peons drive them out, or their own kind take them in too soon for them to become full-fledged beggars. They may not join open guilds, due to their low status.

Life Points

Level	Total Body	Per Location	Dexterity AC
1	30	10	0
2	33	11	0
3	36	12	1
4	39	13	1
5	42	14	1
6	45	15	1
7	48	16	2
8	51	17	2

Skills and Abilities

Level	Weapon Skill	Ability
1	O + U skill	-
2	-	One standard skill
3	H skill	One standard skill
4	-	-
5	E skill	One standard skill
6	-	One warrior skill*
7	1st Weapon mastery one O-class Weapon	
8	-	One specialist skill

The maximum AC of a Hanot beggar is 8. They may not wear armour and can never acquire the ability to do so, but they may use a shield.

Hanot beggars are filthy wretches, continually adding cast-off clothing to enhance their protection against the elements, which grants them the following benefits:

Counts as PAC 1 at 1st level, PAC 2 at 3rd, and PAC 3 at 6th – additionally, if the costume is truly excellent beggar style (i.e. rags only – not simply mixed costume) then it can qualify as master-crafted armour and gain an additional +2 PAC. Such protective clothing is considered Trusty and Old as per the post 8th tables. At 7th level the rags also grant ½ effect natural cold (not magical). Needless to say, it is considered armour and does not stack with other armour worn, even if this were possible.

*The warrior skill is a warrior class specialist skill chosen from the following list:

Enhanced Reflexes (See entry under Thug)

+6/2 life stamina training (See entry under Thug)

1st Mastery in any one weapon type (See entry under Thug)

Unarmed Combat

This skill allows the Hanot Beggar to do damage per blow with his hands (and not any other part of his body) as if they were O class weapons. It should be remembered that a blow from any weapon must be a minimum of 12" long to be effective. Martial art skills must NOT be used. It is only necessary to gently touch the opponent; anything stronger is unsafe and must be avoided. NOTE: Anyone abusing this skill will lose it.

Although Hanot Beggars can use a variety of weapons, they will not begin the adventure with anything other than daggers or cudgels, unless it is an artefact of power personalised to them.

Hanot Beggars gain one level of resistance for each Kallah caste beggar on the adventure from their city's Kallah due to the power the Kallah have over their less individual colleagues.

Post-8th Level Development:

- Hanot Beggars progress as per (non-1st class) Pathfinder.
- Hanot Beggars also may buy as (non-1st class) Warrior subclass.
- They are considered to be in both the Warrior and Scout brackets.
- Hanot may choose to fill one tendency slot with a Tradition, for more details on Traditions please see ***En-Garde***.

KALLAH BEGGAR

Kallah must be human, for the same reasons as Hanot Beggars. They have arisen from the same circumstances as the Hanot.

They may not join open guilds, although see below – they gain certain benefits from the City Spirit of the city they are bound to.

Life Points

Level	Total Body	Per Location	Dexterity AC
1	24	8	0
2	27	9	0
3	29	10	1
4	32	11	1
5	34	12	2
6	37	13	2
7	39	14	3
8	42	15	3

Skills and Abilities

Level	Weapon Skill	Ability
1	O + U skill	-
2	-	One standard skill
3	H skill	One standard skill
4	-	One standard skill
5	E skill	One standard skill
6	-	1st Backstab
7		One specialist skill
8	1st mastery dagger	One specialist skill

Kallah Beggars have a maximum AC of 7. They may wear light armour beneath their rags, and cannot acquire the ability to wear heavier armour. They may use a shield.

Kallah beggars must also dress in rags, but keep their coverage light, unlike the Hanot Beggar caste. They only possess the skill to wield Daggers – whether in O class or H class – though they may learn further skills at an advanced level.

A Kallah Beggar can ‘Improved Message’ another Kallah Beggar of his own city at will, for 1 tblp by looking into the eyes of a Hanot Beggar. This is a neuronomic power, and both Hanot and the Kallah must be vulnerable to neuronics at the time of use.

A Kallah Beggar gains certain other powers dependent on their city of origin, as a boon from the City Spirit of that city. This benefit will be listed in the Almanac and is prone to change as the City Spirit changes or evolves.

Post-8th Level Development:

- Kallah Beggars progress as per an (non 1st class) Assassin.
- They may also begin selecting as (non-1st-class) Warrior subclass on 4 tables lower once they reach Table 5 (450 points). They are considered to be in both the Warrior and Scout brackets.
- If they gain additional weapon skills through multi-classing this may then include non-dagger weapons.
- Kallah may choose to fill one tendency slot with a Tradition, for more details on Traditions please see *En-Garde*.

LEYWALKER

Those who serve Nature are as varied as any other group, and while some act as the priests, others as the defenders, there are yet some whose nature leads them to serve alone, walking the paths that they find, and aiding those who would aid Nature where they can. These are the Leywalkers, whose dedication to the service of nature grants them certain druidic powers, while their education and inclination give them some skills natural to Pathfinders.

Leywalkers may be Human, Half-Wood Elf, or Alfar.

Human Life Points

Level	Total Body	Per Location	Dexterity AC
1	24	8	0
2	27	9	0
3	29	10	1
4	32	11	1
5	35	12	1
6	37	13	1
7	40	14	2
8	42	15	2

Level	Weapon Skill	Ability	Earthpower
1	O + U skill	Recognise Earthpower Tell Animal type	2
2	-	Tell Wounds	4
3	H skill	One Standard Skill	6
4			8
5	E skill	One Standard Skill Tell Disease	10
6		Tell Poison	12
7		One standard skill	14
8		One specialist skill	16

A Leywalker's maximum AC is 7. They may use small wooden shields, and may only ever wear light armour.

Unlike other Druid classes, the Leywalker's lack of organised study and worship with others means that they are limited in their use of Earthpower. In normal circumstances, it will take a Leywalker 30 seconds of free movement in an area to determine the spot where the Earthpower flows most freely, to enable them to cast an evocation successfully. A ref has discretion to allow the Leywalker to find such a spot or line more quickly, or inform them that there is no such place available due to the local conditions. If the Leywalker has not found such a spot for whatever reason, they may not cast evocations of over half their level, and take twice the normal casting damage in tblp.

For more information on Druidic Evocations and how they work please see *The Druids Way*.

Post-8th Level Development

- Leywalkers may progress as (non-1st class) Pathfinders, and they may also select Druidic abilities and innates as if a (non-1st class) Forest Guardian. They are considered to be in both the Scout and the Druid brackets.
- Ley Walkers may choose to fill their tendency slots with Talismans if desired.

SPY

Anyone can play the part of a spy. Scout types are well-suited to the role, as many of the skills they learn are to do with investigation or concealment. Assassins in particular often play the role of a spy rather than a murderer. However, the Spy character class is one who not only has appropriate skills suited to surveillance work, but is also able to use certain natural mental talents to enhance their success.

Many races have a potential for neuronics activity, a potential which is usually only explored in a few individuals. Spies have an unusually strong potential for neuronics power, but this is mostly untrained, and exhibits itself only in certain ways useful to their profession, often used intuitively or even unconsciously to their benefit.

Spies may be Human, Silver Folk, Elven, Drave, or Half-Elven.

Human Life Points

Level	Total Body	Per Location	Dexterity AC
1	24	8	0
2	27	9	0
3	29	10	1
4	32	11	1
5	35	12	1
6	37	13	1
7	40	14	2
8	42	15	2

Skills and Abilities

Level	Weapon Skill	Ability
1	O + U skill	Disguise
2	-	One standard skill
3	E skill	Psi-Scan x1/level, one standard skill
4	-	One standard skill
5	H skill	Clairvoyance x1/2 levels
6	MP skill	One standard skill
7	B skill	Forget x1/4 levels, one specialist skill
8	-	One specialist skill

A Spy's maximum armour class is 7. They may wear any sort of armour, to further their skill at disguise. They may also use shields as desired.

The use of the Spy's neuronics cost tblp damage as if normally cast – see the *Oraculum Insight* for further details on neuronics.

Spies gain Utilise Neuronic Items from 1st Level.

Post-8th Level Development

Spies may progress as per 1st-Class Pathfinders. They may also upgrade their neuronics talents: Psi-Scan now 'at will' – 60pts; extra Clairvoyance innates – 25pts per use; extra Forget innates – 35pts per use. Spies are not considered to be in the neuronics bracket, but may buy Neural Foci as neuronics classes.

ARTIFICER

Craftsmen by nature, Artificers understand how things are made. Be it soaring towers, glorious statues, or fine armour, they excel in building, creating and breaking. In these harsh times when people are driven to adventure, Artificers tend to use their talents to deal with statues, hunt hidden tunnels, and seek out the greatest of treasures.

Artificers can only wear master crafted armour, but it can be of any type. They may only be Ggrutuck or Dwarves. Ggrutuck use the life scale below, and Dwarves have life as a Dwarven Pathfinder.

The extra PAC gained represents an Artificer's ability to work on their armour and ensure that it fits perfectly. As such, the bonus PAC only applies while wearing armour.

Ggrutuck Life Points

Level	Total Body	Per Location	Bonus PAC
1	26	0	0
2	29	10	0
3	32	11	1
4	35	12	1
5	38	13	2
6	41	14	2
7	44	15	2
8	47	16	3

Skills and Abilities

Level	Weapon Skill	Ability
1	O + U skill	Bandaging Skill
2	MP Skill	One standard skill
3	E skill	One standard skill
4	H Skill	
5	B Skill (Not Dwarves)	One standard skill
6		One standard skill
7		One specialist skill
8	-	One specialist skill

An Artificers maximum armour class is 7.

In addition to choosing from the specialist scout skills, an Artificer may take +6/2 life stamina training, Smithing (both as Warrior abilities) and Weapon Mastery MP weapons as Specialist Skills.

Post-8th Level Development

Artificers progress as a 1st-Class Pathfinder.

Standard Scout Skills

A scout calculates his skill level by counting the number of levels he has had it for. e.g.: If a scout gains a skill at 3rd level and is now 6th level they have 4 levels in it.

Athlete

From long practice leaping from rooftop to rooftop and similar, gains one Jump innate per 3 skill levels or fraction thereof.

Bandaging

May Stop Bleeding by application of phys-rep bandages. Doing so heals the location by 1pt at the time of application. Only 1 bandage may be applied per location, and if the wound has not been further healed before the bandage is removed the damage returns. This curing is cumulative with that from potions such as Medicated or Treated Bandages.

Climber

The Pathfinder has been scaling trees, walls and buildings since a young age. They gain one innate Assisted Climb per three skills levels or fraction thereof. If skill level is at least 6th may use it to climb across ceilings as well.

Assisted Climb allows the user to move along non-overhanging surfaces at zombie speed, provided they have at least 3-limb contact with the surface.

Combat-Wary

Gains a damage reduction versus the first blow taken in any combat, only. This damage reduction is 1pt per skill level. This ability may not be used when using any sort of rage. Regardless of circumstances this ability may not be used more than once per 5 minutes.

Discern General Potion

This skill allows a Pathfinder, by means of a quick test, to determine whether a potion is a general potion or not. In addition, he will be aware of the potency and number of doses. Colourless, odourless and tasteless potions in opaque containers can also be discerned by the use of this skill, but the Pathfinder must be able to see the substance in question, which may mean unsealing the container if it is opaque. In the case of supernatural potions the pathfinder will be able to recognise that it is a potion, but will not know its quality or potency. If the potion is an unknown type (at the ref's discretion), a rough idea of its effects may be given.

Discern Healing Potion

This skill is similar to the skill Discern General Potion except that it works on healing potions instead. If the potion is an unknown type (at the ref's discretion), a rough idea of its effects may be given.

Discern Poison

This skill is similar to the skill Discern General Potion except that it works on poisons instead. In the case of supernatural venoms the pathfinder will be able to recognise that it is poison, but will not know its quality or potency. If the potion is an unknown type (at the ref's discretion), a rough idea of its effects may be given.

Discern Smell ("Sniff")

Most monsters have their own distinctive smell. By the use of this skill the Pathfinder "sniffs" for smells he has met before, thus he is able to put a smell to a monster and have some idea of what is coming up. Only broad categories of information are given by the use of this skill – 'goblin-kind' for example, not 'four goblins and a hobgoblin'. Numbers cannot be distinguished, nor may exact race type necessarily be discerned. At ref's discretion, unusual or peculiar creatures may be described as an unknown or unfamiliar scent.

Disguise

This skill allows the pathfinder to attempt to take on the disguise of a monster or character of a different race.

It costs nothing for the scout to apply the disguise to themselves. It costs 200 grulls to disguise someone else for one adventure, buying them an appropriate card from the Desk before the adventure, or giving the money to the referee. Alternatively, if excellent in-character phys reps in non-20th (or 21st) Century containers are possessed it is free to apply a disguise during Time In on adventure. However, whilst it is possible to disguise your physical appearance you cannot change your smell, size of spirit etc. So a disguise is only as good as a disguise is good.

If a non-human is to be disguised, they need to apply their normal make up first and then apply the 'disguise' over the top of this. Though it might be acceptable for him to be disguised as another non-human with appropriate face paint etc.

NB you cannot under any circumstances be disguised as another one of your own characters.

Distillation

By use of distillation techniques the Pathfinder is able to reduce the amount of liquid in a potion without affecting its efficacy. For ingestive potions the liquid required to represent the potion is halved to 25 ml, and for salves and blade venoms the quantity is reduced to only 10 ml of liquid or 2 ml of paste or cream.

Draw Venom

The Artificer's knowledge of the biology of their race allows them to easily neutralise or extract the poison from a wound suffered by a member of their own race.

Once per day per skill level the Artificer may spend 5 seconds treating a wound through which blade venom was administered, to negate one dose of blade venom in an individual's system. Once the process is started no poison will "kick in" unless the Draw Venom process is stopped/interrupted. At this stage this skill may only be used on members of their own race.

Evaluate

This skill allows the Pathfinder to judge the intrinsic value of an item. It will not tell the Pathfinder whether an item has any special properties (i.e. magic, spirit, etc); simply the fiscal value of the item in grulls.

Examine Construct

This enables the Artificer to consider a number of crafted objects or puzzles. He is able to pose one query per day for each skill level possessed. After 30 seconds examining the relevant thing, the Artificer can ask a question and receive an answer approximately seven words in length (cf. Major Prayer). This is a physical information effect based on scholarly knowledge. It may be used solely on constructed objects or structures, although this may be quite loosely interpreted. For example, it could be used about an animated golem or a statue, a trapped door, a wizard's tower, or a crossbow. It cannot be used regarding undead or elementals. The information granted is solely about physical properties, however. For example, if the artificer considers the question "How may this statue be broken?" the answer may be "By no physical means" if it is affected only by ranged magical attacks.

Hollow Tooth

Traditionally used to hold a virulent poison to kill the user quickly in case of capture, it is perfectly possible for this operation to hold a dose of any ingestive potion. The Pathfinder has one of their back teeth pulled, causing 1 pt of 'item' permanent damage to the head location – this cannot be cured or 'slept off' by any means while the ability is possessed. They may then go to the Desk with a card for a potion. A new card for a 'Hollow Tooth containing xxxxx', as appropriate, will be issued in exchange for 100 Grulls and the potion. The new card has an expiry date of 6 days if the potion was temporary, or 6 months if it was permanent.

To use the Hollow Tooth the user must simply be able to move of their own free will; they are considered to break the tooth and immediately swallow the potion dose. Doing this uses up the card, which must be handed to the ref at the end of the adventure. Another one can be purchased, however.

Under no circumstances is it possible to give the potion contained in a Hollow Tooth to anyone else. Hollow Teeth are not affected by effects such as the Shattering or similar. Unlike most skills, Hollow Tooth may be selected twice if desired.

Lock-Picking

With appropriate tools, the scout may pick a physical lock after 30 seconds of phys-repping, in the manner of a physical Unlock spell. This can be done once per day for each skill level possessed.

Make Concealable Weapon

The scout may begin the adventure with two daggers that are designed to be easily concealed. They may at will be 'put away' and hidden about the scout's person so that they cannot be found by physical means unless the scout is completely helpless. This may be phys-repped by asking the ref to carry the daggers when hidden. To retrieve the daggers appropriate actions must be made for a few seconds. They are not retrievable with Quick Draw-style skills.

Make General Potion

Discern General Potion must be taken before this skill can be learnt.

Details of this skill's uses are found in the Potion Making section of this book.

Make Healing Potion

Discern Healing Potion must be taken before this skill can be learnt.

Details of this skill's uses are found in the Potion Making section of this book.

Make Poisons

Discern Poison must be taken before this skill can be learnt.

Details of this skill's uses are found in the Potion Making section of this book.

Make and Arm Snap Trap

This skill enables the Pathfinder to make and arm a snap trap which, when set off, inflicts 9 tblp or 3 hits to a monster. If a weapon mastery in snap traps is possessed then it inflicts 15 tblp or 5 hits to a monster. Additionally, for each skill level above 3rd, it inflicts another 3 tblp or 1 Hit. For example, at 4th level skill 12 tblp (or 18 tblp if weapon mastery is taken) would be inflicted. Furthermore, if 6th level skill is possessed, the location of the target that is closest to the triggered trap takes the damage as locational damage as well, stopped only by innate (non-armour) PAC, at 1pt per point of AC. Snap traps cannot be thrown and are ineffective if placed within 1 foot of another trap.

The Pathfinder can make 1 trap for each skill level he possesses in this skill.

When possible, the adventure referee will provide phys reps for these traps if available from the Desk, though the user will often be asked to provide their own.

Potion Preserving

By use of this skill, permanent potions can be combined into larger bottles than their initial small bottles of three doses, without being exposed to the air and made temporary – thus a Pathfinder may start an adventure with a 500ml bottle containing 10 permanent 12pt cure potions, for example. These are still made temporary when the bottle is opened, but are generally easier to carry until then.

Pray for Guidance – Wayfinder Only

The Wayfinder gains a Minor Prayer innate for each 4 skill levels or fraction thereof. Should the Wayfinder have 6 or more skill levels these become Major Prayers.

Read Glyphs

Read Languages must be taken before this skill can be learnt. This skill allows the Pathfinder to read written glyphs such as wizard spell glyphs, etc, and actually trigger their power. As with read languages, you must actually be able to read the glyphs yourself. A Pathfinder with this skill coupled with read languages may cast SPELLS but not MIRACLES written on scrolls. Their casting level for purposes of damage calculation is taken to be their skill level in Read Glyphs.

Read Languages

This skill allows the Pathfinder to read written languages such as wizardly glyphs, priest runes, elfish high script, dwarfish, etc. To read these runes, however, you must actually be able to read them yourself; the referee will not translate them for you, although use of a crib sheet is acceptable.

Sealing

May reseal a potion bottle that has been opened on the current adventure. This means that, rather than losing their potency at the end of the dungeon, the potions remain as they were. This may be used at any time up to and including the debrief.

Self-Awareness

May Tell Wounds on self after 2 seconds consideration. This reveals how wounded the character is.

Stealth

The Pathfinder is naturally inclined to stealth and concealment. By dint of long practice, they may hide themselves as per a non-magical Chameleon(s), once per day for each four skill levels or fraction thereof (so that with 5th level skill the user gains 2 innate Chameleons).

Tell Time and Direction

The scout has an accurate internal clock and compass – he is always able to judge roughly what time of day it is and which way is north. This is not based on seeing the sky or similar.

Tolerance

Must have Discern General Potion. Kick-out from potions is reduced by 1 pt in every 6 per skill level possessed. If 6 or more skill levels are possessed, non-damaging effects are halved in effect or duration, and if it would have caused death instead causes unconsciousness for 1 hour.

Trap-Wary

May use a Jump innate that requires no verbal to leap out of the area of an area-effect attack, if the Jump has sufficient range to leave the area of effect. If the effect was damaging, only half damage is taken – if non-damaging, it does not affect the user.

User of Avalorash

Requires 3 or more skill levels in Make General Potion to acquire or use this skill. The user has a number of doses of the distilled essence of this plant at the beginning of each adventure. If gently anointed to an inanimate object for a period of 10 seconds, it will glow slightly if the object is magical. The colour of the glow reflects the colour of the magic in the object, while the intensity of the glow tells the user the mana level of the magic, if appropriate. The exact effect therefore will reveal if an object is magical (Yes/No answer), what colour magic is present (Red, Blue, etc) and what level it is (1 to 20+).

One dose of Avalorash is possessed for each skill level possessed

Non-Ishmaic scouts may only learn this skill post 8th.

Well Equipped

As opposed to making potions using die rolls, a Pathfinder may elect to simply battle board a number of doses of adventure temporary potions. These potions will rot by the end of the adventure. This does not take up a make slot for the user.

The Pathfinder chooses which type of potion he wishes to take on the adventure using this method. He can only choose one type of potion, and then subtracts the difficulty level of the potion from his “Well Equipped” skill level.

This is the number of batches he can take. The minimum number is 1, however low the skill level. This skill only applies to Immediately Available potions.

For example: Jim-Bob took ‘Well Equipped’ at 3rd level, and he is now 7th, so has a skill level of 5. At the beginning of an adventure he selects 6pt TBLP Cure potions, which have a difficulty level of 3; so 5-3=2, he begins with 2 batches of 3 doses for free.

The potion recipe may be chosen at the beginning of each adventure. Unlike other skills, this may be taken more than once, in fact as often as desired.

Well-Made Daggers

Must have Make Concealable Weapon first. Two concealable daggers are now considered ‘Apprentice Status’ and as such they become immune to effects such as Shatter, Warp or Disintegrate, although they can still be affected by Magnetise, Vanish and similar non-destructive effects. Effects that would destroy a magical weapon, such as Grand Shattering Blow will still destroy them, but they are not magical. There is no penalty for their loss, and they may be replaced before the next adventure at no cost.

Specialist Scout Skills

Note: “Recognise” skills in this section are all supernatural abilities of the relevant type (e.g. Rec. Spirit is spiritual in nature).

Assassin’s Eye

Must have Tell Wounds. After 30 seconds observation of a target within 9’ [3 paces], can estimate their physical hits or tblep and loc strength.

It may be used up to 18’ [6 paces] but will only reveal if the target is small / medium / large / huge / titanic – obviously at ref’s discretion. This will work in relation to the adventure level/ Pathfinder’s skill and is a physical informational effect.

Blade-Sharpening

Must have phys reps for whetstone and polishing cloths. When these are used for 2 minutes to phys rep sharpening a non-supernatural bladed weapon, the next blow struck with that weapon is through PAC and has +1 max damage [max Quin], regardless of who wields it.

The increase from this ability does not stack with any other temporary increase in the max damage called. This sharpening must be phys-repped in time in.

Boleq Manufacture

Requires Make Concealable Weapon skill. A Boleq is a type of glass knife, which can be ground into dust and concealed around the person. It can then be reformed by putting the dust back together and breathing on it gently.

A Boleq is not made of metal and does not count towards a wizard’s metal allowance.

An excellent phys rep is required for a Boleq (obviously not actually made of glass, but should give that impression!). Three Boleqs may be made each week by the pathfinder, and it costs 200 grulls to manufacture. An item card is issued for it, with no blow up date, and it does not blow up on death. However, once blown on and turned into dagger, it will only last until the end of the dungeon. The phys rep for a dust Boleq should be a pouch full of earth or sand or similar.

In addition, a Boleq that is shattered or disintegrated will reform five minutes after the spell took effect.

Once manufactured, a Boleq is usable by any character class which can use a dagger, not just the character who possesses Boleq Manufacture.

Chosen of the Dragon

This ability grants the Rogue +2 Dexterity Armour Class (DAC), in a similar manner to a Bless. As such it does not stack with any other form of Bless, Chosen, Watching or similar. This is a magical ability.

Chosen of the Faithful

This ability grants the Wayfinder +2 DAC, in a similar manner to a Bless. As such it does not stack with any other form of Bless, Chosen, Watching or similar. This is a spiritual ability.

Detect Possible Neuronic Activity

This neuronic skill allows the pathfinder to sense whether there is any creature with psionic or neuronic abilities within a 60-foot radius. This will not tell him in which direction the creatures are or their number. The referee will only answer yes or no; they will not indicate a direction or distance. If this skill is taken, it may be skipped when buying the Passive Neuronic Tree (see *Oraculum Insight* for details).

Enhanced Reflexes

As the Warrior specialist skill, granting +1 DAC. This is not cumulative with the Warrior skill if both are possessed, and it replaces the first point of Dexterity Armour Class available post-8th, negating the need to buy it.

Extra Level of Life

Gains 1st extra level of life. This replaces the post-8th tables ability.

Flesh Mending

An Artificer’s experience in the structure of objects allows them to mend flesh in much the same way as other objects. This skill grants them 40pts of locational curing (as the monk skill) per day, applied by appropriate phys-repping at the rate of 2 pts per second of treatment.

Healing Facility

Must have Make Healing Potion to benefit. Through practice and body training experience, the scout may prepare themselves to assimilate healing potions more effectively. If spends 30 seconds relaxing, deep breathing, etc, before using a healing potion, the scout receives 4 tblp in curing for every 3 tblp normally cured. Additionally, for every three healing salves applied, receives the benefit of four – if applied simultaneously.

Judge Profession

After 30 seconds observation of a target within 18' [6 paces], can judge their primary class-bracket (e.g. scout, warrior, wizard, priest, druid, neuronistic, none). This is a physical informational effect.

Judge Strength

Must have Tell Wounds. After 30 seconds observation of a target within 18' [6 paces], can estimate their physical level of resistance. This is a physical informational effect.

Metal Resistance

This skill increases the Rogue's metal allowance to now allow up to studded leather and two O-class weapons. Or studded leather and one B-class weapon.

Perception

Allows the user to spot supernaturally hidden or chameleoned targets, including those using Invisibility, etc. This does not work on creatures that are actually 'phys-rep' hidden from sight! Nor does it work on non-supernaturally hidden creatures.

Poison Facility

Must have Make Poison to benefit. May spend 30 seconds preparing an ingestive poison so that the kick-in time is reduced to 5 seconds from 30 seconds, if drunk within the next 5 minutes. May spend 30 seconds treating a weapon with a blade venom so that if the blow struck is to a critical location the kick-in time is reduced to 5 seconds from 30 seconds – when used by the applier.

Potion Facility

Must have Make General Potion to benefit. Armour Class granted by potions can exceed the scout's maximum armour class by 1 pt per skill level [in Make General Potion], still to a max of 12. Strength potions no longer prevent the Pathfinder from using weapon masteries.

Recognise Mana

This skill is the same as the innate Wizard ability. It has a 1" range, and allows the user to identify magic in any creature or object. If the target has a specific spell or spells present upon it an exact mana level will be given in reply, and whether the magic is currently active or not. In the case of innately magical creatures or objects, such as a magical sword or a wizard, these are considered to be "10+" mana, indicating that their magic is strong but not a fixed quantity as a spell is.

Recognise Spirit

This skill is the same as the innate Priest ability. It has a 1" range, and allows the user to identify whether any creature or object within range has a spirit. Unlike the Recognise Mana ability, only a Yes or No answer is gained from this ability without further enhancements.

Recognise Earthpower

This skill has a 1" range, and allows the user to identify whether any creature or object within range has earthpower within them. A Yes/No answer is returned.

Recognise Neuronics

As per the neuronistic ability; this has a 1" range and allows the user to identify whether any creature or object within range has neuronistic power or capability within them. A Yes/No answer is returned.

Shadowing

Allows the user to follow the tracks of creatures in urban, built-up environments or in tunnels or buildings. It is assumed that the owner of this skill will be able to recognise most common tracks automatically – unique and rare creatures will be identified at the ref's discretion. This works as per the Ranger ability, although it can only be used in urban or indoor environments.

Tracking

Allows the user to follow the tracks of creatures in outdoors, non-city environments. It is assumed that the owner of this skill will be able to recognise most common tracks automatically – unique and rare creatures will be identified at the ref's discretion. This works as per the ranger ability, although it can only be used in rural, outdoor environments.

Weapon Mastery

As the Warrior specialist skill. Full details are listed under the Thug class entry.

Tell Wounds

Must have Self-Awareness standard skill. Gains Tell Wounds on any flesh-and-blood creature after 10 seconds inspection at 1" range.

Skills requiring observation time, such as Assassin's Eye and Judge Strength, require separate observation and the time is as such cumulative. The same is true for enhancements of these abilities.

Skill Availabilities by Class

Not all standard and specialist skills are available to each class; the below tables list which skills can be learnt by each class. An X indicates that a skill is not available to that class as a standard or specialist 1st-8th skill. If there is no X, the skill may be chosen.

Note that simply because a skill is not available 1st-8th for a particular class does not necessarily mean that it cannot be acquired post-8th level – see the post-8th abilities list above for details. Additionally, any Ishmaic scout may learn User of Avalorash as part of their 1st to 8th skills; other scouts may learn it post 8th.

Standard Skills	Pathfinder	Thug	Assassin	Rogue	Wayfinder	Leywalker	Spy	Artificer	Hanot beggar	Kallah beggar	Awakener

Additionally, any Ishmaic scout may learn Boleq Manufacture as part of their 1st to 8th skills; other scouts may learn it post 8th.

Scout Tendencies

These can be considered as similar in concept to Priestly Spheres, or even to some extent wizardly colours of mana. Scouts are not required to select one of these tendencies, but may choose to do so with the requisite advantages and disadvantages listed. The cost and availability to each class of these tendencies is listed below. They are only available to 1st-class Scout classes, in any case.

Possessing the ability to buy as a 1st Class X does not allow a character to purchase a Tendency as if they were a 1st Class X. This follows the same rule as per multi-classing: In order to buy a Tendency a character must be of a class listed as able to buy the Tendency. This may affect non-standard rebirths.

Tendency Costs and Availability by Class

Tendencies are only available to 1st-class Scout bracket classes. They may purchase one available to them on Table 1, and a second on Table 9. They may select a third on Table 11, subject to the system manager's approval that the third tendency is appropriate to the character and does not clash with existing tendencies. By cross-referencing the class and the tendency it can be seen whether a character of that class can buy a given tendency – if so, the figure recorded is the cost in points to do so. An X means that tendency cannot be acquired.

Tendencies	Pathfinder	Thug	Assassin	Rogue	Wayfinder	Leywalker	Spy	Hanot beggar	Kallah beggar	Artificer	Awakener
Dabbler	80	100	90	X	X	X	80	X	X	80	X

Temple Assassin	60	75	50	X	40	X	75	X	X	X	X

Bully Boy

The Bully Boy has had a violent upbringing and their natural inclination is towards brutality and harm.

- Bully Boys may not enter any class bracket bar warrior.
- Their extra levels of life are increased by 1/1 to a maximum of 5/2.
- They gain Intimidation - after 10 seconds intimidating or abusive conversation or actions directed at a specific target, may physically Cause Fear in that target (lasting 5 minutes), twice per day.
- They gain maximum AC 9.
- They may buy abilities available to warrior subclasses 4 tables below the one on which the Bully Boy has reached (e.g. once 450pts is reached may buy from Table 1).
- They are immune to Stunning Blows.
- They receive a 25% discount on the cost of multi-classing warrior (round up).

Chirurgion

The skills of the Chirurgion lie in the healing and physical recovery of themselves and those they travel with. Often scouts will find themselves the most able to tend to the wounds of their stricken allies –and this tendency improves those skills. This tendency may be taken by characters of any alignment, provided the scout possesses a minimum of 8 skills in Make Healing Potion.

- Gains Tell Wounds, Tell Poison and Tell Disease – all as per the Druid skills. If any of these are already possessed then that discern is reduced in study time to 2secs.
- Gains the skill of Monk Locational Healing.
- Should bandages be applied to a location to represent any monk locational curing applied then it also heals an equal amount of tblp.
- Counts as knowing the recipes for Medicated and Treated Bandages.
- Gains +2 skill levels in Make Healing Potion [maximum 12]
- Gains Healing Facility [without the need for the prerequisites] should this already be owned then may apply these increases to when administering healing potions to others, though the preparation time is increased to 1minute.
- Bandaging skill, if possessed, now also heals 1pt of tblp in the same manner as the locational life.
- May take the multi-class Very Well Equipped: Healing at 33% discount.

Cutthroat

Some people are just downright murderers – they do not look for the skill required in assassination, nor are they gentleman thugs, killing out of necessity. Rather, these people enjoy killing, and partake solely for the enjoyment it brings them.

This tendency may only be taken by Evil characters.

- Is automatically ‘ostracised’ within the Empire – meaning that they cannot buy equipment from the tavern, and other mercenaries are not outlawed for their death.
- Gains +1 cumulative Backstab – but to a maximum of 3.
- 2/day Additional Stealth innate
- 1/day Additional Greater Stealth innate
- 1/day Vicious Strike – as per Stunning Blow but may be on a damaging blow and is non-level based.
- Any Stunning Blow innates owned now enhanced to become as per Vicious Strike above.
- 1/day Murderers Eye: Acts as per Judge Strength, Judge Profession, Tell Wounds and Assassins Eye – this takes 30secs visual observation of the target who must be within 9’ [3paces].
- Gains Assassin’s Eye ability [without the need for the prerequisites] – if this is already owned then it is enhanced such that it only takes 15secs, and has a full 18’ range [6paces] from 9’ [3paces].
- Gains the ability to buy Surprise Blow and Greater Surprise Blows as if a 1st Class Assassin – should the character already be able to acquire these abilities then they may learn them at one table earlier.

Dabbler

The Dabbler is one who, true to the nature of the Pathfinder, has tried each and every possible profession, however briefly. They are the quintessential jack-of-all-trades, master of none.

Dabblers may only multi-class to classes within the scout bracket (e.g. Rogue, Wayfinder etc), within the rules of being in two class brackets, however they count as 6 tables lower for buying abilities not within the scout bracket.

- A Dabbler with the Recognise Mana and Read Glyphs skills may buy 1mp and 2mp spell innates of any basic standard colour for 10pts/point. These may not be of opposite colour if a mana colour is possessed. They may cast Detect Magic at will for 1tblp. Their casting level is considered to be their skill level for reading magical scrolls.
- A Dabbler with the Recognise Spirit and Read Glyphs skills may buy 1sp miracle innates of their own alignment type at 12pts/point – only basic miracles, not any advanced. They may also use a single Spiritual item of their own alignment. May still use the above magical abilities while carrying metal objects, and above spiritual abilities while holding sharp or magical objects.
- A Dabbler with Recognise Earthpower may use Earthpower items.
- A Dabbler with Recognise Neuronics may buy Neural Foci at the same cost as neuronics classes, and gains utilise neuronics item.
- A Dabbler gains +1 skill level in all standard scout skills to a maximum in each one of 6th level.
- A Dabbler may pick two priestly discerns which they gain use of, to be listed on character card.
- They may buy Use Spiritual Items of Own Alignment for 100pts rather than 150pts.

NOTE: Those with Half Spirits do not pay double to purchase spiritual innates granted by this tendency

Henchman

Many of the great and powerful in the Empire require trusted servants. It's not uncommon for those seeking to become great and powerful to begin by recruiting a henchman to assist them. Many is the henchman who has gone on themselves to learn a great deal from the machinations of their masters, be they fair or foul.

May only have one 'master' at any time – this master must be recorded on the scout's character card. May only change masters if previous master is dead or they give permission. May never work again for a master once their employment is left.

- Gains +1 strength (max +2) for purposes of lifting and carrying only (not combat).
- If present when his master is manufacturing potions, gives the master +1 skill level.
- If present when his master is manufacturing standard scrolls, increases the chance of success by 10%.
- If present when his master is manufacturing supernatural items, reduces the percentile roll on the failure table by 5%. Though it should be noted that the Henchman also takes any detrimental effect suffered in the making of the artefact.
- When his master is on adventure with him, the henchman gains +1 level of resistance to the primary power-base of the master (this may be physical in the case of scout or warrior masters). He also gains +6/2 life and +1 DAC. Also gains 6th Sense when within 20' of the master.
- Beneficial effects cast on the Henchmen by their master cost 1 less power (non-stacking).
- At all times, gains +2 levels of resistance to domination effects except those from his master, to which he suffers – 2 levels of resistance.

Herbalist

An equally valid name for these innovators in the arts of brewing and herb use would be ‘alchemist’. The herbalist can be of many personas, from the aged herb-woman who tends the sick and infirm of her village, to the street-corner vendor who sells ‘oils to keep your blades effective’ to passing thugs. All share one thing in common – a detailed knowledge of the many and varied ingredients that go into brewing up a wide range of complex potions and salves. Those who choose an adventuring life tend naturally to learn more of those potions in demand by the adventuring community, and will usually be found well equipped with a plethora of desirable bottles which they can let you have at only a slight profit... Otherwise, however, the alchemist’s lifestyle leads them to be rather less combat-skilled or fit than most scouts – their specialisation is a disadvantage at times.

- Herbalists must have a total of eight or more skill levels in types of potion-making.
- Herbalists gain the ability to buy potion recipes at ½ cost (round up).
- They gain +1 skill level in making potions of all types.
- They gain Discern Plant Type as Druid at will.
- They may buy Immunity to Poison and Acid at ½ cost.
- Herbalists should generally be given more accurate answers to discern potion abilities, and to the uses of plants on discern plant type than other classes would be. This is at ref’s discretion.

Killer

A killer is just that, someone that kills, either with skill and style, or just pure brutality. The ends matters little, the result is the same - they become incredibly adept at killing.

- A Killer can only enter the Warrior bracket. They may however buy weapon masteries as a Warrior. Additionally they may buy Mighty Strikes and related abilities as a Warrior.
- A Killer gains an innate “Adept with Weapons” 1/day, which grants the 1st mastery in a chosen weapon for the rest of the day, and an innate Primal Strike 1/day (allowing them to inflict either magic or spirit damage with one weapon for 5 minutes).
- Killers also have a natural talent for working out how to kill people, as such they gain an innate Lucky Idea regarding how to kill someone 1/day.

Local Lad / Lass

This tendency must be chosen for a specific settlement. The scout has grown up on the streets of that town, and knows the area very well indeed, with many contacts and associates.

- In the open streets of his own settlement once physically, real world, out of line-of-sight of pursuers for at least 5 minutes (e.g. around a corner, not just Chameleoned), may vanish without trace and is considered to be ‘safe’ and away (successfully left adventure). If used, may choose to return after 15 minutes absence.
- Also may use Rumour Lore, functioning as a physical Communication II, only about events in his own city or Empire-wide known events (at ref’s discretion). This may be used before adventure wherever adventure is taking place, or after 5 minutes of absence during Time In if in own settlement.
- Non-magical Chameleon innate once per day, no maximum duration – in urban areas only.
- May acquire up to 600grulls of immediately available standard potions either before the adventure or after 5 minutes of Time In absence if in own settlement (once per day only).
- Gains Shadowing and Perception specialist skills in urban environment if not already possessed. If they are possessed, Shadowing now functions as per Enhanced Tracking in urban environments, and Perception as Supernatural Perception in urban environments. Urban environment means on the streets of a village, town or city, or in buildings. Natural tunnels and catacombs are not included, but regular ones made roughly in the style of building passage-ways and similar are, at ref’s discretion.

Loner

While many scouts are at home in the hustle and bustle of the city, some prefer to live alone in the wilderness, or as a free spirit, wandering wherever they wish, without ties or responsibilities to others.

All Loners gain:

- Survival skill
- Discern Plant Type and Discern Animal Type as Druid
- Non-magical Chameleon (self) x1/day in outdoor, non-city environments only, with no maximum duration.
- Tracking as per the specialist skill (outdoor, non-city environments). If this is already possessed, becomes Enhanced Tracking in those environments.
- Perception specialist skill. If already possessed, this becomes Supernatural Perception in outdoor, non-city environments.
- Immunity to Cold (immune to natural cold, ½ effect supernatural cold).
- Innate Physical AC 1, due to weathered and toughened skin.
- When in outdoor, wilderness-type environments only: Once physically, real-world, out of line-of-sight of pursuers for more than 5 minutes, may vanish without trace, considered to be 'safe' and away (successfully left adventure). However may not return to the adventure. Obviously there needs to be somewhere for the Loner to go to, and this ability will not cross planes, etc; thus the successful use of this ability is at the ref's discretion.
- Loners may only be the member of one social guild.

Military Scout

Any professional armed force uses advance scouts to watch for the enemy's own scouts, cut trails and act as observers and messengers.

- Military Scouts may not enter any class bracket other than Warrior or Wizard.
- Military Scouts may choose to be aligned to an existing Imperial Legion or Official Imperial Warband from 1st level. In this case, they gain the following benefits:
- They may choose to carry with them a stamped and official document which proves their membership, and if displayed means that other Imperial legionaries or officials will likely treat the bearer with due respect. These documents are enchanted such that if they cannot be tampered with. If they leave the scout's possession for more than one hour, then they are consumed by flames.
- It may be possible for a Military Scout not initially aligned to a Legion to join one at a late stage – this would have to occur in an LRP environment.
- All Military Scouts gain:
- All armour supplied for the scout (need not provide cards)
- 100G cost of any Hollow Tooth covered, and if desired may fill a Hollow Tooth with venom keyed only to the scout, which will instantly kill them (no 30 second kick-in) unless Immune to Poison. This venom is supplied for free.
- Max damage Quin with MP weapons, increasing to Six on Table 8 and Seven on Table 10. +1 stacking mastery in MP weapons
- Survival skill, should this skill already be possessed then may choose to start with a selection of Well Equipped Potions, for this purpose gains 3 skill levels in Well Equipped standard skill.
- They may buy masteries in MP weapons as per warrior (not archer).
- Discipline – twice per day they may ignore any Fear, Emotion Attack or Domination effect unless it stems from a military superior in their own military.
- They may use a single dose of blade venom to coat two arrow-heads or crossbow bolts.

Ninja

From the lands of Amles come a truly secret sect of trained assassins – the Ninja. Many legends have been told of these trained killers, though few in those distant lands would go even so far as to acknowledge their existence.

- To be a ninja requires great skills in stealth and action – this tendency may only be taken by Evil Lawful Amlesian Human Assassins.
- Existing class Ninja may choose to have their cards reissued with their class altered to Assassin – or remain as they are printed in 3rd Edition Supplement – though the onus is on the player to prove these previous powers.
- Ninja as a basic character class may no longer be started as a new character.
- All Amlesian characters must still have an appropriate accent – even when disguised.
- Ninjas are immune to all informational powers that will reveal their true identity or alignment – the result of any alignment check is always Neutral.
- Their lawful outlook means that they will only attack those they travel with in self defence – or if there is a bounty upon the person's head, such as that offered on outlaws.
- The advanced training techniques taught by their elders allows for one of two pathways of development – the choice must be made upon purchasing the tendency – and recorded on the card. It is not possible to learn both pathways.

Ninja [Magical]

- The taking of this pathway leads the Ninja to be trained in magical arts to help further his methods of assassination. Requires Recognise Mana skill.
- Gains read languages and read glyphs skill at 6 skill levels. If both these skills are already possessed gains +3 skill levels [max 12] in read languages and read glyphs skills.
- May choose up to 12 mana's worth of standard magical innates to add to battle-board – these may be of any level – though casting damage is taken based on magical scroll skill level.
- Instead of using the normal verbal for these may instead spend 10secs in complete silent concentration and cause the spell to occur.
- May buy innates of standard spells at 10pts per mana point to a maximum spell level of post 8th table threshold, e.g. 8th level spells on table 8 [1000pts] .
- Is now no longer 'pure' for bracket purposes and may only ever enter the Wizard bracket.
- Now has metal restrictions as per Rogue.

Ninja [Neuronic]

- This pathway relies on the assassin training his mind to accomplish 'supernatural' feats often required on mercenary quests – or assassinations. Requires Recognise Neuronics.
- Gains +3 Neural Foci
- Gains Neuronic Chameleon 1/day [as per Oraculum Insight]
- Gains Neuro Mastery 2/day [as per Oraculum Insight]
- May buy Neural Foci as per neuronic class.
- May buy Neuro Mastery at will – for 100pts on table 8.
- Gains Utilise Neuronic item.
- Is no longer 'pure' for bracket purposes and may only ever enter the Neuronic bracket.
- Now has potion restrictions as per Neuronic class 'Psi-Master'.

Poisoner

There is a certain kind of person that likes to dabble in the darker arts of alchemy and herbalism. Their skill lies in the mixing and manipulation of foul toxins and poisons, honing their skills either to aid in the assassination of individuals, or into the field of sabotage and murky waters of settlement disruption.

To be a Poisoner the character must possess at least 8 skill levels in Make Poison, and may not be goodly in alignment.

Gains:

- +2 cumulative skill levels in Make Poison (max 12)
- May buy Poison recipes at ½ published cost (note that this does not stack with Herbalist reduction).
- Is not limited on the frequency of poison recipes – i.e. is not limited to one per 300pts.
- Gains Poison Facility – if this skill is already possessed then it is enhanced such that it applies no matter which location was struck.
- May use a single dose of damaging blade venom to coat two daggers – however the dose is reduced in potency by two grades. e.g. a BV 6 split between two daggers would coat each in a BV 4.
- Gains Distillation and Potion Preserving skills – but solely for the purposes of Make Poison skill – should these skills already be possessed then no longer has to pay the additional grull cost to have these skills applied.
- Due to constant handling of poisons and the like, gains 50% off all baneful poison attacks. May buy Immunity to Poison at ½ published cost.
- Herbal Infusion post-8th ability can now be purchased and at a 50% discount.
- May take the multi class Very Well Equipped: Poison at a 33% discount.

Super Dabbler

- From the Dabbler Tendency. Super Dabblers are incredibly adept at dabbling in different paths and different skills. As such a Super Dabbler may now multi-class to any published class that is partially within the scout bracket despite the normal restrictions on being in two brackets. They however count as being 6 tables lower for the purposes of buying abilities outside the scout bracket.
- The Super Dabbler counts as only being within the scout bracket for the purposes of other tendencies and scout bracket abilities.

Temple Assassin

Whatever their outlook, churches need those that kill with stealth. While the Evil faiths may be more open about it, often the martial churches of light will have “Blessed Assassins” that serve them. The Temple Assassin’s first loyalty is to the church and the religion, above all others. When purchased, the individual must chose a religion to align to, which must be of the appropriate alignment.

- Gains Lay Believer in the chosen religion, and as such is bound by its ethos/restrictions.
- Gains an innate True Believer (as Paladin ability in *En-Garde*).
- Temple Assassins start the adventure with 10 spirits worth of standard scrolls (dungeon temp), inscribed with miracles that are on the church’s base list.
- May choose to claim guild benefits from the church as a professional guild (if able to claim guild benefits).
- If a Temple Assassin is ever excommunicated, then they permanently lose all benefits from this Tendency.
- May only multi-class into the priest bracket.

Tinker

Tinkers are wanderers and itinerants, moving from place to place – perhaps buying and selling, perhaps repairing goods for money – or those with a more adventurous bent maybe working for mercenary groups as an artificer. They are generally very technically minded, and carry with them all manner of useful oddments acquired from somewhere, or manufactured by themselves in their spare time.

- Tinkers may Shatter any normal object as per the spell (but physically) after 30 seconds phys-repped preparation, using tools or objects as appropriate. This is at will, with a range of touch.
- They may Mend Shattered objects or straighten Warped ones after 2 minutes appropriate work, which must include excellent tools and set-up. This is also at will, with a range of touch. They cannot repair Disintegrated or Rusted objects.
- They gain a Lucky Idea x1/day, only for use to solve problems or identify objects. It may not be used about creatures. This is at ref's discretion.
- Tinkers never lose armour uses, as they repair their armour in-between adventures.
- A Tinker who uses Blade-Sharpening on his own equipment is more skilled and efficient at it, and the benefits last for the next three blows rather than just one.
- Improvisation – after 5 minutes 'foraging' may create a makeshift weapon, either as any bladed weapon with –3 pts of base damage, or as any blunt weapon with no penalty. This is at ref's discretion as to location – for example, it may well not be possible when locked in a cell. This ability may be used at will.
- A Tinker given 2 minutes of Time In fiddling with a piece of master-crafted armour, can improve its durability, making it immune to Accuracy versus PAC. This is at will.
- They may strike a Shatter blow against a normal non-supernatural object twice per day, after observing the object in question for at least 10 seconds.
- They may buy the Very Well Equipped multi-class options at a 25% discount (round up).
- They may buy any form of Cache innate as if they were 1000 pts higher for purposes of thresholds (i.e. they can buy Cache innates on Table 8 when they are 0 pts past 8th).
- They may begin an adventure with any one of these:
 - A trusty, indestructible weapon (cf. 'Well-Made Daggers')
 - A standard Cache
 - 400 Grulls equivalent of Immediately Available or Simple potions – these can be mix and matched as desired. Calculate using the base cost to manufacture a permanent dose of the potion type in question, so that for example a 6pt tblp Cure is equivalent to 60G. These are adventure temporary, and no card is ever issued.

Tomb Robber

The Tomb-Robber is a specialist in burglary, especially robbery of ancient tombs and other dangerous places where valuables lie. Their skills and knowledge lie in this area.

Tomb Robbers gain:

- Discern Nature of Undead at will (as Priest unless the scout is spiritless then it becomes a physical discern)
- Relaxed Fall.
- May identify the effects of a trap once the trap is exactly located, after 10 seconds of study. If the Tomb Robber does not have the appropriate 'Recognise' skill only gets a very rough approximation (e.g. if a trap causes a Disruption when triggered and the Tomb Robber does not have Rec Mana, they only know it causes magical fire).
- Enhanced Evaluate skill – must have Evaluate. May identify the properties of supernatural artefacts and objects after 30 seconds examination. This is only approximate, but will make the user aware if there is any danger or disbenefit to it, as well as advantages, and is at ref's discretion. e.g. a +0 magical bastard sword which casts Lightning Bolt x1/day but causes the wielder to berserk against brown mana users might be described as "A magically sharp weapon capable of hurling lightning, which attunes the user to serve air, against earth, whatever their previous desire". The amount of information will be approximately a major prayers-worth of answer, with detriment being revealed first. This will be more specific if the relevant "Rec" is owned.
- Danger Sense – May gauge the level of danger the user is currently in, completely at ref's discretion. If the Tomb Robber is more than 20' from any ally, the ref may choose to warn the character of high danger levels without the player actively using the ability. If actively used by the player, takes 5 seconds motionless concentration. For example, if the character is in a heavily trapped area, this might be considered to be high danger. All answers to this ability are completely at ref's discretion.
- Trap-Wary standard skill. If this is already possessed, the user takes no damage at all from a damaging area effect, from half-effect.

Potion Making

Normal potion phys reps should be 50ml of drinkable liquid per dose - this should be drunk when the potion is drunk. Salves, blade venoms and other non-ingestive potions can be represented by 25 ml of liquid per dose, or 5 ml of a more solid phys rep - for example cold cream might be used to phys rep paladinic healing balm. The important thing is to carry an item to represent the potion, so that it may be stolen, and when you use it you are seen to do so, whether drinking lemonade for 6pt cures or applying glitter cream to your face for Strengthening Salve.

Please try to avoid pouring large quantities of liquid on the caves floor, as the climate means that these patches can sometimes take weeks to dry.

It is not possible to apply salves and balms to an unwilling target, unless they are completely helpless.

Beneficial potions other than 6pt tblp cures consumed by someone with a potion restriction, such as a monk or a neuron class, have no benefit whatsoever. Should such a character drink more 6pt tblp cures than their limit, they are left ill and weak. In the case of neuron classes, they may not use neuronics for the remainder of the day. In all cases, abilities that require any degree of concentration cannot be used, and neither Strength nor Dexterity AC can be used. The sensation of drinking a 6pt tblp cure is distinctive enough to someone with such a sensitive constitution that they will always be aware when they are drinking one – it is normally impossible to ‘spike’ their drinks with 6pt cures, or similar. Ref’s discretion in these matters is final.

Anyone with skills to make a particular type of potion will have a skill level in that making type. The maximum number of batches of a potion that can be made at one visit is one per skill level. Only one type of potion [General/Healing/Poison] can be made at one visit, although more than one recipe of that type can be made.

The size of a batch can be chosen by the maker, at most three for Immediately Available and Simple recipes, two for Average recipes, and only one for Difficult recipes.

The chances of success are as follows:

5 in 10 maximum. To this chance, add the maker’s skill level, and take away the difficulty level of the potion.

For example, Jim-Bob the scout wants to make some 6pt TBLP Cure potions. He is 3rd level, and took the skills at 2nd level, so has 2nd level making skill in Healing. 6pt TBLP Cures have a difficulty level of 3, so his chance for making these potions is $5-3+2=4$ in 10. He can make 1 or 2 batches, as he has 2nd level skill, and the batch size can be 1, 2 or 3 doses as he chooses. Success is rolled only for each batch, not for each dose.

The grull cost for a potion is per dose of permanent potion. If temporary potions are made instead, the cost is only 2/3 as much, calculated after all other factors.

Temporary potions last 6 months from their date of manufacture, unless opened, at which point they only last until the end of the dungeon (the Sealing skill may be used to retain original duration).

Permanent potions come in sealed bottles – once the bottle is opened the seal is broken, and the potions only last until the end of the dungeon (the Sealing skill may be used to retain original duration).

Only one attempt to make potions (or indeed any other manufactured item) can be made per weekend by any one character, unless their abilities specify otherwise (cf. Alchemical Preparation below).

Immediately Available Recipes

On acquiring the basic Making skill for a particular category, certain recipes are immediately available to the pathfinder. These are listed below:

Healing

1pt tblp Cure – Difficulty Level 0 – Cost 10G per dose

4pt tblp Cure – Difficulty Level 2 – Cost 40G per dose

6pt tblp Cure – Difficulty Level 3 – Cost 60G per dose

These potions when drunk simply cure the requisite amount of tblp damage.

Also see Poison Recipes for details of poison antidotes.

General

The below ingestive potions, in a similar manner to poisons, take 30 seconds after ingesting to ‘kick-in’. Antidotes function instantly however. In each case the appropriate tables immunity negates the effect, and of course complete immunity to all flesh-and-blood effects also grants immunity, as it does to all potions and poisons.

Ingestive Blindness – Difficulty Level 2 – Cost 40G per dose

Drinker is struck blind for 10 minutes.

Ingestive Deafness – Difficulty Level 2 – Cost 40G per dose

Drinker is struck deaf for 10 minutes.

Ingestive Dumbness – Difficulty Level 2 – Cost 40G per dose

Drinker is struck dumb for 10 minutes.

Ingestive Sleep I – Difficulty Level 2 – Cost 40G per dose

Drinker falls asleep for 10 minutes. It is possible to wake the sleeper from this sleep by normal methods, although it is a deep sleep. Any damage will immediately awaken them.

Ingestive Sleep II – Difficulty Level 3 – Cost 60G per dose

Drinker falls asleep for 20 minutes. Only damage will awaken them during this time, and if so awoken they will be sleepy and fuddled, suffering a –2 DAC penalty (min 0).

Ingestive Paralysis – Difficulty Level 3 – Cost 60G per dose

Drinker is paralysed for 15 minutes.

Makers of general potions can also manufacture antidotes to the above at exactly the same cost and difficulty. These antidotes only negate the effects of potions, not supernaturally induced effects (e.g. not drowe Blindness).

Poisons

Ingestive Venom ‘2’ – Difficulty Level 2 – Cost 30G per dose

Ingestive Venom ‘4’ – Difficulty Level 4 – Cost 60G per dose

Ingestive Venom ‘6’ – Difficulty Level 6 – Cost 90G per dose

The above cause 12, 24, or 36 tblp damage respectively 30 seconds after being drunk (4, 8 or 12 Hits to monsters).

Blade Venom ‘2’ – Difficulty Level 3 – Cost 40G per dose

Blade Venom ‘4’ – Difficulty Level 5 – Cost 80G per dose

Blade Venom ‘6’ – Difficulty Level 7 – Cost 120G per dose

The above poisons must be applied to a bladed/piercing weapon, and a blow struck which inflicts at least 1pt of real damage – not only a 1pt bruise. For example, a character in AC 5 takes 1pt of real damage from a Single, but only a 1pt bruise if they are in AC 6. 30 seconds after the blow is struck the victim takes 12, 24 or 36 tblp damage as appropriate.

Antidote Venom ‘2’ – Difficulty Level 2 – Cost 30G per dose

Antidote Venom ‘4’ – Difficulty Level 4 – Cost 60G per dose

Antidote Venom ‘6’ – Difficulty Level 6 – Cost 90G per dose

These will negate 2, 4 or 6 grades of poison in the drinker’s system which has not yet ‘kicked-in’. For example, an Antidote Venom ‘2’ will prevent 12 tblp of poison damage kicking in – if the poison was a higher grade than this then the damage taken is reduced by 12 tblp. If drunk in advance as a preventative measure, will stay in the system for one hour and apply to the first X grades of incoming poison attack as appropriate within that time (e.g. a dose of AV 6 would negate 3 doses of BV 2 if they were the first poison attacks suffered). They have no effect on non-damaging poisons, nor on poison damage that has already been inflicted.

Those with the Make Healing Potion skill can make antidotes at one difficulty level higher.

Simple Recipes

These potions can be used by any person, in the normal way. To learn the manufacture of them requires only the prerequisite of 3rd level making skill in the appropriate potion type, and costs one standard scout skill ‘slot’ (20 points post-8th level). In all other ways the process is as per the manufacture of handbook potions.

Healing

12pt tblp Herbal Cure	Difficulty Level: 4	Cost per dose: 150G
Ingredients: Shining Tamarisk, Merry Woundwort		
Cures 12 tblp per dose drunk, in the same manner as a 6pt herbal cure potion.		

Purgative	Difficulty Level: 5	Cost per dose: 200G
Ingredients: Jambul Seed		
For 5 minutes after drinking, drinker feels disorientated and queasy (-2 DAC, -1 weapon mastery, both to min of 0). Any non-supernatural disease in the drinker’s system is immediately halted in its progression, and after 5 minutes is completely negated. It also “resets” supernatural diseases, so that after drinking disease progression begins again from zero minutes.		

Lembas	Difficulty Level: 3	Cost per dose: 90G
Ingredients: None		
This recipe is only available to a character that can make Lembas racially. This manufactures that type of Lembas as normal. This may be done in addition to making that character’s normal allowance of Lembas – but not in combination with any other making attempt.		

Burn Salve	Difficulty Level: 5	Cost per dose: 90G
Ingredients: Merry Woundwort, Hang-Tree Sap		
This salve heals 6 tblp and 6pts of locational damage suffered from fire damage, if applied within 15 minutes of injury. One dose can be spread around injured locations, to heal a max total of 6pts of locational damage, across however many burnt locations desired.		

Venom ‘8’ Antidote	Difficulty Level: 7	Cost per dose: 150G
Ingredients: Giant Leech Saliva		
Negates 8 grades of poison in drinker’s system. If drunk before poison is suffered, stays in system for 1 hour and negates first incoming poison of up to eight grades of intensity. This may be learnt as a Healing or Poison recipe.		

General

Strength	Difficulty Level: 4	Cost per dose: 60G
Ingredients: Distilled Ogre’s Blood		
Grants +1 stacking Strength (max +2) for 5 minutes, during which time drinker has ‘Brute’ level intelligence, may not cast or use neuronics or weapon masteries. At end of duration inflicts 12 tblp kick-out.		

Endurance	Difficulty Level: 4	Cost per dose: 60G
Ingredients: Jurubera Flowers		
Next 18 tblp of damage taken within the following 5 minutes can be ignored (locational damage still occurs). At end of duration inflicts 12 tblp kick-out.		

Dexterity	Difficulty Level: 3	Cost per dose: 60G
Ingredients: Baby Pixie's eyelashes		
Grants drinker +2 DAC for the next 15 minutes.		

Strengthening Salve	Difficulty Level: 4	Cost per dose: 60G
Ingredients: Opal Dust		
Grants +2 PAC when rubbed into skin – one dose is sufficient to coat all locations on a humanoid. Lasts 15 minutes. Does not stack with Barkskin or racial innate PAC.		

Numbing Elixir	Difficulty Level: 5	Cost per dose: 120G
Ingredients: Black Feathergrass		
Numbs sensations in drinker for 15 minutes. During this time they suffer -1 DAC (min 0), but take only half-effect from Pain and pain-based attacks.		

Poison

Ingestive Illness	Difficulty Level: 5	Cost per dose: 120G
Ingredients: Berberis Berries		
Drinker suffers the effects of a Cause Disease miracle, except: it is not spiritual. If the drinker has 7th level resistance the effects vanish at the '30-minute' stage (i.e. never falls unconscious), and if the drinker has 9th level resistance the effects vanish at the '10-minute' stage. The potion induces noticeable feelings of nausea after only 2 minutes.		

Gene-Coded Venom	Difficulty Level: +1	Cost per dose: +30G
Ingredients: Blood from the appropriate race, Torsland Mushrooms		
At the point of manufacturing an immediately available poison (IV or BV) it may be adjusted so that it only affects a specific race. Due to the strange and varied nature of Humans the Torsland Mushrooms will never allow the poison to function vs. them. It should be noted the poison will still be a flesh and blood effect, and races such as Crol can be targeted.		

Slow-Acting Venom	Difficulty Level: +1	Cost per dose: +50%
Ingredients: Galeb Duhr's Blood		
May alter any poison for which the recipe is known, so that rather than kicking in as normal the poison only begins to take effect after 8 hours. During this time the victim will still discern as poisoned, and can be cured as normal. Unlike a normal poison, no ill-effects or sensations are experienced until the poison takes effect, giving the victim no warning unless the poison is identified in their system by an expert.		

Average Recipes

These potions are generally more difficult and complex to learn the recipes of. You must have at least 6th level making skill to learn these recipes, and some have additional prerequisites. They may be taken as a scout 7th or 8th specialist skill, or bought for 40 points post-8th level. Batches of these potions may be no larger than two doses.

Healing

2pt Locational Salve	Difficulty Level: 5	Cost per dose: 90G
Ingredients: Merry Woundwort, Hang-Tree Sap		
This is a salve which when rubbed into a wounded location cure 2pts of damage to that location (no tblp).		

18pt tblp Cure	Difficulty Level: 6	Cost per dose: 180G
Ingredients: Merry Woundwort, Shining Tamarisk		
Cures 18tblp when drunk. Maker must also have 12pt cure recipe.		

Anti-Venom Salve	Difficulty Level: 7	Cost per dose: 120G
Ingredients: Hang-tree Sap, Giant Leech Saliva		
When rubbed into an open wound, counters any one dose of Blade Venom that was on the blow which caused the wound, if applied before 'kick-in'.		

Treated Bandages	Difficulty Level: 6	Cost per dose: 180G
Ingredients: Merry Woundwort, Hang-Tree Sap		
Treated bandages are represented by a small roll of material, at least 24" long. When applied carefully to an injured location, taking at least 30 seconds to do so, the bandage heals 4pts of locational (only) damage. If applied by someone who has knowledge of the recipe, they also heal 4 tblp damage. A bandage must be left in place for at least 5 minutes after application to give the salve a chance to work, otherwise if removed earlier the damage returns.		

Studied Lembas	Difficulty Level: 6	Cost per dose: 120G
Ingredients: Appropriate piece of Lembas		
If the character has a piece of a particular type of Lembas (i.e. item card for one), they may manufacture as many of the same sort at the above cost as their skill level allows. If the maker is an Elf, Drave or Faerie they gain +1 skill level when making this recipe only. Elven creatures making their own racial type of Lembas via this skill may do so in addition to their own racial make. Additionally, the cost per dose is reduced to only 60grulls/dose.		

Resuscitation Balm	Difficulty Level: 6	Cost per dose: 180G
Ingredients: Merry Woundwort, Hang-Tree Sap, Shining Tamarisk		
2pt Locational Salve is a prerequisite for this recipe. This balm cures 6 tblp and 2pts of locational damage when applied to a wound.		

Wireweed	Difficulty Level: 6	Cost Per Dose: 120G
Ingredients: Kasnian Wireweed		
When this weed is mixed into a single ingestive healing potion dose it alters the potions consistency such that the potion becomes a contact paste rather than ingestive for up to 5 minutes after mixing. After 5 minutes the weed is dissolved and the healing potion is ruined. The mixing may only be performed by someone with 6 or more skill levels in Make Healing Potion.		

Poisons

Coating Poison	Difficulty Level: +2	Cost per dose: +50%
Ingredients: Hang-Tree Sap, Giant Spider's Web		
This is an enhancement recipe for poisons only, and may be combined with any Blade Venom recipe. When so enhanced, the poison may either be used as normal blade venom, or instead may be carefully used to coat an object of up to broadsword size. This coating process may only be performed by someone with Poison Making skill of 4 or greater. If a coated object is handled or otherwise touched extensively (by fingertips for 2 seconds, or immediately if held in bare hand), the handler will suffer the effect of the potion as if struck by a weapon coated in it, after 30 seconds as normal. The degree of contact necessary for this treatment is such that simply striking a quick blow with a coated weapon will not suffice to inflict the potion, so that it cannot be used as a substitute for blade venom on weapons of any sort.		

Ingestive Venom '8'	Difficulty Level: 7	Cost per dose: 150G
Ingredients: Berberis Berries, Chimera Dung		
As per Ingestive Venom '6', however inflicts 48 tblp after 30 seconds.		

Wooden Horse	Difficulty Level: 5	Cost per dose: 180G
Ingredients: Sherbet Ambrosiac, Berberis Berries		
Maker must also have Discern and Make Healing Potion skills. When drunk this potion cures 6 tblp as per a 6pt healing potion. However 5 minutes later the drinker suffers 18 tblp of poison damage. This potion does not discern as a poison, as only the reaction with certain elements of the digestive system converts it into one. It is not a 6pt tblp Cure for the restrictions of characters such as neuronicists or monks.		

Ingested Nerve Venom	Difficulty Level: 6	Cost per dose: 180G
Ingredients: Berberis Berries, Black Feathergrass		
This insidious poison when drunk does not kill, but instead 30 seconds after drinking wracks the user's nervous system, leaving them shaky and weakened. The victim suffers a -2 DAC penalty (min 0) permanently, until they benefit from a Regeneration miracle or similar effect. This potion does not affect elves and those with elven immunity to flesh-and-blood.		

General

Catalyst	Difficulty Level: +1	Cost per dose: +60G
Ingredients: Sherbet Ambrosia, Pixie Hair		
This recipe is used to alter a general potion as it is made only. It cannot be combined with an existing potion. It has the effect of reducing the potion's duration when used, to half normal or one minute whichever is less. At the end of this time, kick-out will occur as normal, plus an additional 18 tblp. So a Strength potion so treated would last only 1 minute, then kick out for 30 tblp. If the potion was not durational, this alteration cannot be made.		

Scent Neutraliser	Difficulty Level: 6	Cost per dose: 120G
Ingredients: Stinkwort Flower, Hang-Tree Sap		
This is a salve that must be liberally applied to all parts of the user's body. For one hour after application the user's scent is completely damped, so that they have a neutral smell. This grants them immunity to Sniff, Locational Sniff and similar abilities.		

Scent Inhibitor	Difficulty Level: 4	Cost per dose: 90G
Ingredients: Stinkwort Flower, Giant Skunk Spittle		
This strong-smelling salve, which must be applied to the face area, grants the user immunity to olfactory attacks of all sorts for one hour, by completely deadening their sense of smell. This also prevents the user from using the Sniff/Locational Sniff abilities.		

Mind Dull	Difficulty Level: 5	Cost per dose: 120G
Ingredients: Cloudweaver's Essence		
Drinker gains Psionic Retardation for 15 minutes (Mind Block as Monk; may not use neuronic abilities/items). At end of duration user takes 6 tlp kick-out, 3 to the head.		

Coating Paste	Difficulty Level: +2	Cost per dose: +50%
Ingredients: Hang-Tree Sap, Giant Spider's Web		
This is an enhancement recipe for general ingestive potions, and may be combined with any basic general recipe. When so enhanced the potion may be carefully used to coat an object of up to broadsword size. This coating process may only be performed by someone with Make General Potion skill of 4 or greater. If a coated object is handled or otherwise touched extensively (by fingertips for 2 seconds, or immediately if held in bare hand), the handler will suffer the effect of the potion as if they had drunk the potion, after 30 seconds as normal. The degree of contact necessary for this treatment is such that simply striking a quick blow with a coated weapon will not suffice to inflict the potion, so that it cannot be used as a substitute for blade venom on weapons of any sort.		

Frog-Leg	Difficulty Level: 4	Cost per dose: 60G
Ingredients: Cave-Cricket Leg, Red Khakao Beans		
Once drunk the user may Jump as per the blue spell once within the next 15 minutes. If the recipe is known, the user may Jump twice.		

Zombie	Difficulty Level: 4	Cost per dose: 90G
Ingredients: Torsland Frog Gunk, Dead Man's Breath		
This salve is applied to the temples of the recipient and numbs their emotions. This grants immunity to all forms of fear, emotion attacks, and prevents them raging (in any form). While active the person is at -1 level of resistance. This lasts 5 minutes, or 15 minutes if applied by a person with the recipe.		

Heavy Metal	Difficulty Level: +1	Cost per dose: +60G
Ingredients: Star-Iron Filings, Cloudweaver's Essence		
This may be combined with any drinkable potion for which the maker knows the recipe, at the time of making. Due to the ingenious solution of certain very high-density metal filings in the potion, the drinker takes any normal effects, but additionally suffers the effects of carrying one daggers' worth of metal for the next 5 minutes. Of course, this will have no effect on non-wizard types. If this puts the drinker over their metal allowance, any attempts at casting simply fizzle for the duration, after which time the user's system deals with the metal and breaks it down. This additional metal is per dose drunk.		

Blade-True	Difficulty Level: 6	Cost per dose: 210G
Ingredients: Galeb Duhr Blood, Diamond Dust		
This salve must be applied to a metal object of less than 27 cubic feet, and is usually used on edged metal weapons. A metal object so coated becomes much tougher and more resilient, and for 30 minutes after application is considered indestructible, becoming immune to Shatter, Disintegrate and the like. Additionally, if the object is a bladed weapon, it will hold its edge more surely, so that for the 30 minute duration it is considered a +1 weapon. A treated weapon can still be Vanished, etc.		

Acid	Difficulty Level: 5	Cost per dose: 120G
Ingredients: Green Slime, Sherbet Ambrosia		
The acid created by this recipe is capable of dissolving and weakening small objects when applied by a user with knowledge of the recipe. If applied by someone without the recipe, it will still function, but the user will suffer 3 tblp and loc damage to the hand used, unless extraordinary precautions are taken. It has the effect of a Shatter (t) spell after application, but will not act on glass or crystal objects. One dose is sufficient to shatter two objects of dagger-size or smaller, or one object of up to 27 cubic feet. If carefully applied to a helpless target, it will cause severe pain and 12 pts of tblp and loc damage. It is not strong enough to cause injury if only sprayed at something, and the first touch to the lips is enough to cause retching and revulsion in any normal person, thus making it effectively undrinkable.		

Stomach-Lining	Difficulty Level: 5	Cost per dose: 120G
Ingredients: Black Feathergrass, Powdered Stirge Egg-Shell		
When drunk, this extremely unpleasant-tasting potion immediately inflicts 6 tblp, 3 to the abdomen. However for one hour after drinking it the user is completely immune to ingested potions, including poisons - whether beneficial or harmful. Lembas and similar solid food items are halved in efficacy (round down). This can also be learnt as a Healing recipe.		

Star-Metal	Difficulty Level: 5	Cost per dose: 120G
Ingredients: Star-Iron Filings, Shining Tamarisk		
This ingestive potion grants +1 cumulative Magical Armour Class for 5 minutes. It is cumulative with itself. However the user suffers -3 casting levels for magic spells during this time. It will not stack with Plate (self) or (other) spells.		

Vibrance	Difficulty Level: 5	Cost per dose: 120G
Ingredients: Merry Woundwort, Cloudweaver's Essence		
To learn this recipe must also have the Discern and Make Healing Potion skills. This potion has no real effect when drunk, but 5 minutes later the drinker is cured 12 tblp as per a 12pt healing potion.		

Magical Baffle Salve	Difficulty Level: 5	Cost per dose: 90G
Ingredients: Star-Iron Filings, Giant Spider's Web		
This salve uses the unusual properties of star-iron to dampen the magical radiance of an object. When applied by a scout subclass to a magical object of less than 27 cubic feet, it prevents the object being recognised as magical by detection spells, mana sight or similar. This lasts until the magic of the object is triggered (e.g. using an innate of Disruption), a blow is struck (if item is a weapon), or after 8 hours otherwise. It is possible to use Solitaire while carrying an object so treated. Rogues, Elves, Draves and Faeries gain +1 skill level when manufacturing this recipe only (so that Elven Rogues would get +2 skill levels).		

Difficult Recipes

These recipes are all much more challenging, and require great skill to master. To learn a recipe, the maker must fulfil any prerequisites, and must have at least 8th level making skill in the appropriate potion type. Additionally, these potions are made in batches of one dose only. To learn a recipe costs 30pts+ 5pts per difficulty level of the potion, and not more than one for every 300 points post 8th level may be learnt, except for herbalists (those with the Herbalist tendency), who have no restrictions.

Healing

Rejuvenation	Difficulty Level: 10	Cost Per Dose: 300G
Ingredients: Hang-Tree Sap, Merry Woundwort, Angel's Feather		
Resuscitation Balm is a prerequisite for this recipe. This balm, when administered to a target who is currently within 'live to minus' / Survive unconscious ability, will, after 30secs, cause then to come round to a state of weak consciousness equivalent to the effects of 5mins into a disease. After 5mins the effects of this balm wear off – and should the target not have received enough curing to regain full consciousness they again fall unconscious. Regardless of any healing received whilst the Balm is active the 'weakening' will not end until 5mins have passed.		

Regenerative Elixir	Difficulty Level: 10	Cost per dose: 450G
Ingredients: Shining Tamarisk, Troll's Blood, Jurubera Berries		
This powerful potion sends the drinker's metabolism into over-drive. For 1 hour, all cuts on the user seal up immediately, stopping any bleeding straight away, and the user regenerates 1 tblp and to the most injured location every 5 minutes. If the user relaxes and does nothing but rest during this time, the regeneration is increased to 6 tblp and 1 to each injured location per 5 minutes. This will not benefit a creature that already has regeneration and, for the duration plus one hour after the effects wear off; the user's overworked body only takes half benefit from other healing potions and salves.		

Mystic Honey	Difficulty Level:10	Cost Per Dose: 450G
Ingredients: Fireweed, Bees Honey, Spiced Ambrosia		
Requires Purgative recipe. The consumption of a dose of this mystical honey has one of the following effects:		
1/ The target is completely cured of diseases		
2/ Restores one level lost on that adventure due to spell, miracle or ritual casting, e.g. such as that lost from casting Restore Life.		
3/ Restores any lost grades of strength.		

Buckland Hobby's Essence Binding Powder	Difficulty Level: 12	Cost Per Dose: 300
Ingredients: Boleq Powder, Avalorash Essence, Mana Shard Stone Dust		
The potion was initially created by the Athfanal to solidify the essence of great warriors slain in battle so they may be taken back to their tribe in honour. Areas of the Great Sink sacred to the Athfanal are littered with what were once thought to be magical statues of tribal heroes but now is understood to actually be their very essence made solid by this potion.		
To make this potion the potion maker must have a card for a Boleq dagger (destroyed in making the potion) and possess the scout skill User of Avalorash. One dagger is enough for up to 3 attempted batches.		
When the potion is sprinkled over the area where an elf has recently died, it causes the elf's essence to coalesce and become solid such that it may be transported. This solid body can then be treated as the restore to life point should such be required for the dead elf, rather than the location they died in. Must still be performed within two weeks.		

Medicated Bandages	Difficulty Level: 8	Cost per dose: 450G
Ingredients: Merry Woundwort, Hang-Tree Sap, Sprite's Tears		
Treated Bandages are a prerequisite for this recipe. These heavily treated bandages must be applied by someone with the recipe to gain full benefit. When applied by anyone else, they cure 1pt to the location (only), and a further 1 pt for every 5 minutes they are left undisturbed, to max of 12 pts. When applied by someone with knowledge of the recipe, they cure 2 pts to the location and tblp, and a further 2 pts every 5 minutes, to a maximum of 18 pts.		

36pt tblp Cure	Difficulty Level: 9	Cost per dose: 450G
Ingredients: Merry Woundwort, Shining Tamarisk, Sprite's Tears, Twilight Elf Lembas		
Maker must have 18 tblp Cure recipe first. This extremely potent healing potion cures 36 tblp when drunk.		

Embalming Salve	Difficulty Level: 10	Cost per dose: 900G
Ingredients: Hang-Tree Sap, Troll's Blood, Graveroot.		
When applied to a recently (within the last hour) dead body it will preserve the corpse. This grants the deceased individual the benefits of fated hero. It takes 5 minutes of uninterrupted work to apply the salve, reduce to 1 minute if the recipe is known.		

Anti-Venom True	Difficulty Level: 9	Cost per dose: 450G
Ingredients: Giant Leech Saliva, Powdered Stirge Eggshell, Sprite's Tears		
When drunk this potion completely negates any and all poison effects in the system of the user. If drunk in advance it remains in the system to negate the effects of the next three doses of poison of any sort that are suffered, for a maximum of one hour.		

General

Holy/Unholy Water	Difficulty Level: 7	Cost per dose: 600G
Ingredients: Graveroot, and either: Opal Dust and Cherub's Kiss, or Black Opal Dust and Devil's Spit		
Requires the casting of a 24 hour Bless or Curse at time of manufacture - so either the scout must possess such powers themselves or a willing priest must be present. The potion has three possible uses. It may be sprinkled cautiously on the ground (avoid making large wet patches), and then acts a Protection from Evil/Good miracle cast at 7th level; it can be used as a balm, applied to the temples of a target, which will remove ongoing effects that could be removed by a Bless/Curse (such as a Rune of Transgression); and it can be applied to any physical weapon, blunt or sharp, in which case the next blow struck against a spiritual creature of the opposite alignment (such as angels, or undead - not normal creatures with spirits), within the next 5 minutes, is counted as spiritual and inflicts an additional 12 tblp or 4 hits above normal maximum. It cannot be carried or used by a person of the opposite alignment to the miracle cast during its creation without losing its efficacy, and to use it at all the user must have a spirit. The priest who casts the miracle during manufacture is considered to have spent his time assisting, and may not make scrolls or items that weekend.		
In the case of Holy Water, those with Make Healing Potion manufacturing skill may also make this potion, at a difficulty level of 8. Unholy Water may be made by those with Poison making skill, also at difficulty level of 8.		
Witches & Wayfinders gains +1 skill level when manufacturing this recipe only, and may buy the recipe at half cost.		

Deadening Elixir	Difficulty Level: 8	Cost per dose: 360G
Ingredients: Black Feathergrass, Jurubera Flowers, Bronze Golem's Ichor		
When drunk, completely deadens all sensations in user. For next 15 minutes they effectively have no sense of touch, and thus lose 3 DAC (min 0). They are also unable to use Rage abilities, as feelings are numb generally. However they are granted complete immunity to Pain and pain-based attacks, and also take 25% off all physical, magical and neuronc damage received. The Numbing Elixir recipe is a prerequisite for learning the manufacture of this potion.		

Crystal-Glitter	Difficulty Level: 8	Cost per dose: 240G
Ingredients: Diamond Dust, Giant Spider's Web, Sprite's Tears		
This powdered crystal, when combined with rare herbs, bonds the dust to the skin of all within 20' when thrown into the air (a glitter phys rep should be thrown into the air, away from the faces of any persons nearby). Once so affected, it is impossible for all targets (including the user) to use any form of Chameleon, Invisibility or similar power for 5 minutes, as the unique properties of the rare crystal mean that it sparkles unnaturally, breaking any such concealment. The dust may be removed by two minutes spent doing nothing bar brushing the body clean, and will only cling to those with physical forms.		

Dragon's Blood	Difficulty Level: 8	Cost Per Dose: 300
Ingredients: Dragons Blood, Ground Volcano Rock		
This potion when drunk grants the drinker +2MAC and +1 level of resistance against magical effects. The effects are not cumulative with itself or any other potion. At the end of the 15 minutes duration the drinker suffers 12/2 physical fire damage as the blood burns up on its conclusion.		

Protection from Psionics	Difficulty Level: 7	Cost per dose:360G
Ingredients: Cloudweaver's Essence, Black Feathergrass, Jurubera Berries		
The recipe for Mind-Dull is a prerequisite for this recipe. When drunk the user gains complete immunity to neuronics for the next 15 minutes, after which time they suffer 6 damage to the head and 12 tblp kick-out. Only those who have learnt this recipe can benefit fully from drinking it, having been taught how best to clear their heads.		
Other characters drinking gain the effects of an Enhanced Mind-block as Monk, and immunity to any beneficial neuronics powers - during this time they may not use neuronics or neuronics items.		

Anger	Difficulty Level: 7	Cost per dose: 360G
Ingredients: Bronze Golem's Ichor, Sherbet Ambrosia, Powdered Stirge Egg-shell		
Drinking the potion causes an unpleasant roiling effect in the drinker's stomach - they take 3 tblp every 30 seconds for the next 5 minutes, unless they choose not to fight the potion's effects, and instead enter a 25% rage, much as a warrior's cold rage ability. Should they choose to so rage, they have a berserker's attitude to combat for the next hour, and will attack any who show possible signs of hostility, gaining the rage benefit on doing so. This does not mean that they are afraid of magic. Should the drinker have chosen to resist the urge to rage, they simply take gradual damage as above - this decision must be made immediately on drinking. At the end of the hour duration they are exhausted, suffering 12 tblp kick-out and are unable to use any Strength for the next 5 minutes.		

Super Endurance	Difficulty Level: 10	Cost per dose: 300G
Ingredients: Jurubera Flowers, Dwarven Perspiration		
As per Endurance potion above, but the drinker instead receives 36tblp in temporary life. After the 5 minute duration, the drinker suffers 30 tblp kick out. Must possess the Endurance recipe.		

Will-Focus	Difficulty Level: 7	Cost per dose: 300G
Ingredients: Pixies' Hair, Shining Tamarisk, Red Khakao Beans		
On drinking the user's mind becomes clear and focused in an unusual way. For the next hour, the user may act as if his resistance level to all effects were two levels higher. However, each time this additional resistance must be applied the user takes 6 tblp in exertion (effectively casting damage). At the end of the duration, the user feels weak and drained, and loses one resistance level for 5 minutes, also taking 18 tblp kick-out.		

Vision Salve	Difficulty Level: 7	Cost per dose: 240G
Ingredients: Galeb Duhr's Blood, Hang-Tree Sap, Sprite's Tears		
By gently applying this salve around the eyes of the beneficiary, that person gains the ability to 'see' in supernatural darkness, Mists or when blind for the duration, in a manner similar to Senseless Vision, as the eyes become sensitive to certain other cues, the motion of air and the warmth of bodies, and similar. The duration is 5 minutes, or 30 minutes if used or applied by someone with knowledge of the recipe.		

Hyper-Action	Difficulty Level:10	Cost per dose: 600G
Ingredients: Sherbet Ambrosia, Baby Pixie Eyelashes, Quickling Brain Fluid		
When drunk, the drinker gains +4 DAC and all the benefits and disbenefits of Determination (post-8th level ability). The effects last one hour, after which time the drinker suffers a 24 tblp kick-out.		

Wild Frenzy	Difficulty Level: 8	Cost Per Dose: 300G
Ingredients: Black Powder, Berserker's Blood		
On consuming this potion the drinker enters a furious rage. As such gains 33% berserk rage and berserker attitude towards combat for the 5 min duration – though not feared of magic. At the end of this duration the potion kicks out, causing 36 tblp and two minutes of unavoidable unconsciousness.		

Smelling Salts	Difficulty Level: 9	Cost Per Dose: 300G
Ingredients: Sasanat War Tiger Essence, Crushed Halgar Roses		
Wafting a dose of this potion under the nose of a helpless or willing target that is under the effects of a listed stopping effect will break that effect for 5 minutes. Stopping effects with a longer duration will kick back in after these 5 mins. For 5 mins, directly after the use of this potion, the target feels disorientated and weak to the state that they cannot use Strength or Dexterity AC.		

Sweet Dreams	Difficulty Level: 9	Cost Per Dose: 300G
Ingredients:		
The imbiber must spend 30 secs in a calm and rested location preparing to drink this potion (else it will have no effect). Once drunk it causes the drinker to fall into a very deep sleep, from which they cannot be woken by ANY means. Should they suffer any damage, be significantly moved or similar the beneficial effects of this potion fail – but the target remains helplessly asleep. After 15 mins the effect breaks and the drinker receives 30 mins worth of meditation. This potion will work with published abilities that increase the targets meditation rate – but not any that reduce time or influx regularity. No benefits are gained should the target not 'sleep' for the full required duration. It is not possible to benefit from this potion more than once in any 3 hour period.		

Herbal Infusion	Difficulty Level: 8	Cost per dose: *
Ingredients: N/A		
This is no longer a recipe but a post 8th ability		

Poison

Blade Blindness	Difficulty Level: 9	Cost per dose: 450G
Ingredients: Berberis Berries, Galeb Duhr's Blood, Shadow's Laughter		
This potion recipe requires 8th level skill in Make Poisons and 5th level skill in Make General Potion to learn. It is manufactured using the Make Poisons skill level. It functions in most ways as per normal Blade Venom, except that 30 seconds after the poison enters the system the target is struck blind. This blindness lasts 5 minutes, and immunity to blindness, poison or general potions will grant immunity. A standard ingestive blindness antidote or a general poison cure such as Anti-Venom True will remove this effect.		

Blade Paralysis	Difficulty Level: 9	Cost per dose: 450G
Ingredients: Berberis Berries, Galeb Duhr's Blood, Black Feathergrass		
This potion recipe requires 8th level skill in Make Poisons and 5th level skill in Make General Potion to learn. It is manufactured using the Make Poisons skill level. It functions in most ways as per normal Blade Venom, except that 30 seconds after the poison enters the system the target is paralysed. This paralysis lasts 5 minutes, and immunity to paralysis, poison or general potions will grant immunity. A standard ingestive paralysis antidote or a general poison cure such as Anti-Venom True will remove this effect, although the target will not generally be capable of drinking potions.		

Blade Venom '8'	Difficulty Level: 8	Cost per dose: 180G
Ingredients: Berberis Berries, Galeb Duhr's Blood, Medusa's Scale		
As per Blade Venom '6' but inflicts 48 tlp. Ingestive Venom '8' is a prerequisite to learn this recipe.		

Blade Dumbness	Difficulty Level: 8	Cost per dose: 210G
Ingredients: Berberis Berries, Galeb Duhr's Blood, Harpy's Tongue		
This potion recipe requires 8th level skill in Make Poisons and 5th level skill in Make General Potion to learn. It is manufactured using the Make Poisons skill level. It functions in most ways as per normal Blade Venom, except that 30 seconds after the poison enters the system the target is struck dumb. This dumbness lasts 5 minutes, and immunity to dumbness, poison or general potions will grant immunity. A standard ingestive dumbness antidote or a general poison cure such as Anti-Venom True will remove this effect.		

Blade Sleep	Difficulty Level: 9	Cost per dose: 450G
Ingredients: Berberis Berries, Galeb Duhr's Blood, Bronze Golem's Ichor		
This potion recipe requires 9th level skill in Make Poisons and 5th level skill in Make General Potion to learn. It is manufactured using the Make Poisons skill level. It functions in most ways as per normal Blade Venom, except that 30 seconds after the poison enters the system the target will fall into a deep sleep. This sleep lasts 10 minutes, and immunity to sleep, poison or general potions will grant immunity. A standard ingestive sleep antidote, if some way to administer one is found, or a general poison cure such as Anti-Venom True will remove this effect, but any violent movement or injury will awake the sleeper anyway. A sleeper awoken before the end of the poison's duration will feel woozy and sick, losing 2 DAC (min 0) until the proper end of duration.		

Blade Deafness	Difficulty Level: 8	Cost per dose: 180G
Ingredients: Berberis Berries, Galeb Duhr's Blood, Banshee's Hair		
This potion recipe requires 8th level skill in making either Poisons or General and 4th level skill in making the other to learn. It is manufactured using the Make Poisons skill level. It functions in most ways as per normal Blade Venom, except that 30 seconds after the poison enters the system the target is struck deaf. This deafness lasts 5 minutes, and immunity to deafness, poison or general potions will grant immunity. A standard ingestive deafness antidote or a general poison cure such as Anti-Venom True will remove this effect.		

Venom Concealment	Difficulty Level: 9	Cost per dose: 300G
Ingredients: Shadow's Laughter, Pixie Hair, Shining Tamarisk		
Unlike most potions a single dose of this is only 10 ml in size. When added to another liquid poison, prevents the resultant mixture from being recognised as poison by discerning abilities. It only stays active for one hour, after which time both it and the poison it was mixed with become useless.		

Virulent Poison	Difficulty Level: +2 levels	Cost per dose: +300G
Ingredients: Galeb Duhr's Blood, appropriate race's blood, Torsland Mushrooms		
Used at the point of manufacture this enhances an immediately available venom (BV or IV), increasing the difficulty and cost per dose as above. The result is the poison becomes Gene-Coded (as the simple recipe) but now will remain in the persons system longer and inflict more harm. 30 seconds after the first dose kicks in a second dose 2 grades lower will kick in, and again 30 seconds after that at 2 more grades lower (EG a BV 6 would kick in as a BV 6, then a BV 4, and finally a BV 2). A cure poison, AV 6 or similar will purge the person's system. Poison Facility can be used to reduce the initial kick-in time, but not the additional damage.		
The recipe counts at having a difficulty level of 10 to learn and the individual must have Gene-Coded Venom recipe.		

Blade Nerve Venom	Difficulty Level: 9	Cost per dose: 300G
Ingredients: Berberis Berries, Black Feathergrass, Galeb Duhr's Blood		
Ingested Nerve Venom is a prerequisite for this recipe. This insidious blade venom does not kill, but instead, 30 seconds after inflicted wracks the user's nervous system, leaving them shaky and weakened. The victim suffers a -2 DAC penalty (min 0) permanently, until they benefit from a Regeneration miracle or similar effect – such as Regenerative Elixir for its full duration. If they have the Regeneration ability themselves then a night's rest will suffice. This potion does not affect Elves or those with elven immunity to flesh-and-blood effects.		

Ingredients

Although every potion recipe is a complicated process, there are a few key ingredients on which any recipe is based - other ingredients are perhaps to taste; for example, some prefer their herbal curing potions sweet, others acerbated and so on. The ingredients listed under each potion are those without which the potion cannot be made. In most cases these ingredients are readily available from the Imperial Apothecaries and similar sources, where most potions are manufactured - but it is possible for any individual ingredient's supply to dry up temporarily or even permanently. If this occurs, details will be posted in the Labyrinthe Almanac, on the Forums, and on notice-boards near the Check In area. It is due to the often innately supernatural, or otherwise somehow powerful, nature of the key ingredients that accounts for the apparently unnatural effects of some potions, and also for their surprising value and rarity. For example, a root grown by even the most skilled druid's evocation may be sterile, or not be subjected to the same events and processes as it grows, and so it lacks a certain something necessary for the manufacturing process.

Open Market

Within most environments and locations the commonly made and distributed potion of choice is the standard healing potion, 6tblp. The common availability of this potion means that it is available in limited supplies from many traders and dealers. As such any player is able to purchase a daily supply of standard 6tblp healing potions to the following limits.

For mercenaries with a spirit (or any fraction of a spirit):

A base of 5 temporary 6 point potions

For mercenaries without a spirit:

A base of 10 temporary 6 point potions

Neuronicists gain an additional allowance of 8 temporary 6 point potions over and above their base allowance.

These potions cost 200 grulls per dose.

Please note: these may change due to system effects so it is worth checking the forums.

Post 8th Abilities

Below are listed various post-8th level abilities for Scout classes which may be bought post-8th. The lists below supersede any previous lists. Some abilities have been removed – others updated.

Table 1 (0pts)

Post 8th: Additional Standard Skill	Cost: 20pts*	T: 1
Available To: Any		
May take an additional standard skill, which is normally available to them, with a base skill level of 1, if applicable.		

Post 8th: Additional Specialist Skill	Cost: 40pts*	T: 1
Available To: Any		
May take an additional specialist skill that is normally available to them.		

Post 8th: +1 Skill Level	Cost: 20pts*	T: 1
Available To: Any		
Raises the skill level in a single standard skill possessed by 1. Although this ability is asterisked, it may only be bought once for each given skill.		

Post 8th: +2 Skill Levels From +1 Skill Levels	Cost: 25pts*	T: 1
Available To: Any		
From +1 skill level: Increases the skill level in a single standard skill by another +1, making +2 in total. Although asterisked, it may be bought only once for each given skill.		

Post 8th: 1st Backstab	Cost: 40pts	T: 1
Available To: Any		
The Backstab skill grants +1 damage grade to blows stuck from behind by the user. It may also be applied to H or MP attacks from behind. It may also be applied to blows struck versus completely helpless targets.		

Post 8th: Enhanced Draw Venom	Cost: 20pts	T: 1
Available To: Artificer		
Draw Venom skill may now be used on any individual regardless of their race.		

Post 8th: 2nd Backstab	Cost: +45pts	T: 1
Available To: Assassin, Kallah Beggar		
From 1st Backstab: Now adds +2 base damage grades to blows stuck from behind, with the same conditions as Backstab.		

Post 8th: Utilise Small Shield	Cost: 50pts	T: 1
Available To: Any		
Allows the character to use small wooden shields of at most 24” in diameter, if they were unable to due to their original Pathfinder class restrictions.		

Table 2 (200pts)

Post 8th: Immunity to Sniff	Cost: 50pts	T: 2
Available To: Any		
Grants immunity to Discern Smell and Locational Sniff.		

Post 8th: Potion Stamina 1	Cost: 25pts	T: 2
Available To: Pathfinder		
Grants +6 tblp stamina for damage from potion kick-outs only.		

Post 8th: Potion Stamina 2	Cost: +30pts	T: 2
Available To: Pathfinder		
From Potion Stamina 1: Now has 12 tblp [total] for potion kick outs		

Post 8th: Potion Stamina 3	Cost: +35pts	T: 2
Available To: Pathfinder		
From Potion Stamina 2: Now has 18 tblp [total] for potion kick outs		

Post 8th: Discern Potion Kick Out	Cost: 30pts	T: 2
Available To: Pathfinder		
From Discern General potion: After 30 seconds examination of a potion will reveal the kick-out from consuming it.		

Post 8th: Enhanced Discern Healing	Cost: 40pts	T: 2
Available To: Pathfinder		
From Discern Healing potion: Will now give full details on a healing potion. For non-standard potions this will only work at the referee's discretion.		

Post 8th: Enhanced Discern Poison	Cost: 40pts	T: 2
Available To: Pathfinder		
From Discern Poison: Will now give full details on a poison. For non-standard potions this will only work at the referee's discretion.		

Post 8th: Enhanced Discern General Potion	Cost: 40pts	T: 2
Available To: Pathfinder		
From Discern General potion – will now give full details on a general potion. For non-standard potions this will only work at the referee's discretion.		

Post 8th: +1 Maximum AC	Cost: 60pts	T: 2
Available To: Any		
Increases the character's Maximum Armour Class by +1		

Post 8th: Deeper Study	Cost: 20pts*	T: 2
Available To: Tomb Robbers		
With a further 30 seconds use of Enhanced Evaluate gains another 7 words of useful information on the object usable 1/day.		

Post 8th: Minor Prayer	Cost: 15pts*	T: 2
Available To: Wayfinder		
Takes 10secs and acts as one question from a Communication I miracle.		

Post 8th: Major Prayer	Cost: 30pts*	T: 2
Available To: Wayfinder		
Takes 20secs and acts as one question from a Communication 2 miracle.		

Table 3 (250pts)

Post 8th: Trap Resilience	Cost: +60pts	T: 3
Available To: 1st Class only Pathfinder Only, any Tomb-Robber Tendency		
Now takes only 2/3 damage from triggered traps, cumulative with any other similar skills (such as Trap-Wary). Must have Make and Arm Snap Trap skill first.		

Post 8th: Herbal Infusion	Cost: 70pts	T: 3
Available To: Anyone with 8 levels in Make Healing or Make General, or with the Poisoner tendency		
Previously a recipe, the scout has a set regime of herbs, liquids and exercise. This grants them +6/2 life and + 1 level of resistance; however, it costs them 500 grulls per time they play. A scout can chose not to pay the grulls, and will gain no benefit from the ability. This is a flesh and blood effect.		
Herbalists and Poisoners may buy this ability at half cost.		

Post 8th: Mercenary Alchemist	Cost: 50pts	T: 3
Available To: Any		
Whilst on adventure may make daily temporary potions, at no grull cost. This requires excellent phys reps for potion-making equipment and ingredients, and enables the manufacture of potions equal to the characters normal weekly make per day. These potions take 2 minutes per batch to make. This may be done in addition to normal weekly makes at the desk.		

Post 8th: Immunity to Backstab	Cost: 50pts	T: 3
Available To: Any		
Grants Immunity to the Backstab ability.		

Table 4 (275pts)

Post 8th: Facility with Armour	Cost: +30pts	T: 4
Available To: Any		
Allows the user to wear master-crafted plate armour, if was previously able to wear master-crafted chainmail armour.		

Post 8th: Discern Outlaw	Cost: 50pts	T: 4
Available To: Pathfinder, Assassin, Thug, Spy, anyone with Military Scout Tendency		
A physical informational effect, this requires 10 seconds study of the target and reveals whether they are outlawed or not.		

Post 8th: Pick Locks	Cost: +30pts	T: 4
Available To: Any		
From Lock-Picking standard skill, may now Pick Locks at will		

Post 8th: 2nd Backstab	Cost: +50pts	T: 4
Available To: Any		
From 1st Backstab above, now adds +2 base damage grades to blows stuck from behind, with the same conditions as Backstab.		

Post 8th: Alchemical Specialisation	Cost: 100pts	T: 4
Available To: Pathfinder, Assassin, anyone with Herbalist Tendency		
+2 skill levels in one type of potion making (healing, general or poison). Skill level in other potion making types is halved (round up).		

Post 8th: Discern Nature of Trap	Cost: 60pts	T: 4
Available To: Pathfinder, Assassin		
With 30 seconds close inspection will reveal if a trap's effect is physical, magical, spiritual or other, and what the likely effects of triggering it are.		

Post 8th: +2 Maximum AC	Cost: +70pts	T: 4
Available To: Any		
From +1 Maximum AC: Increases the character's maximum armour class by +2 from +1 maximum.		

Table 5 (450pts)

Post 8th: Alchemical Preparation	Cost: 50pts	T: 5
Available To: Pathfinder, Assassin, anyone with Herbalist Tendency		
If character has 50% (or greater) chance of success for making a particular potion, they no longer have to roll for success but automatically succeeds on half the batches (round up). Need not use this ability unless desired.		
Normally, only one attempt to 'make things' can be made per weekend; this covers all manner of things, whether potions, scrolls, supernatural items, armour or other things. However, on a day on which the character is playing they may use Alchemical Preparation to make up to their weekly limit in potions in addition to normal make allowance.		

Post 8th: Backflip	Cost: 30pts	T: 5
Available To: Pathfinder, Assassin		
As per Salmon Leap, but may only be used backwards.		

Post 8th: Spiritual Vigilance	Cost: +60pts	T: 5
Available To: Wayfinder		
From Spirit-Sense: May now perceive spiritual creatures walking in walls/floors or similar; is considered to be able to see a rough outline of them at all times.		

Table 6 (600pts)

The abilities on this table are all post acquiring a published Tendency – as previously mentioned in this publication.

Post 8th: Learned	Cost: 40pts	T: 6
Available To: Dabbler		
May now learn innates up to 3rd level for spells and 2nd level miracles. Those with Recognise Earth Power may now learn Earth Power innates at 12pts /EP up to 2nd level.		

Post 8th: A Beating	Cost: 40pts	T: 6
Available To: Bully Boy		
Intimidation innates that have failed to Fear the intended target [e.g. target was unaffected] now allow the Bully Boy to enter a 25% cold rage against the target – as the pent up aggression is released against them, if they desire.		

Post 8th: Archaeologist	Cost: 40pts	T: 6
Available To: Tomb Robber		
Gains Read Languages skill and after 30secs studying a lucky idea 1/day about any scriptures or written words he can see. If Read Languages is already possessed gains an additional lucky idea as above.		

Post 8th: All Towns are the Same	Cost: 40pts	T: 6
Available To: Local Lad		
The benefits of Local Lad now apply in any urban environment.		

Post 8th: Scraping Up	Cost: 40pts	T: 6
Available To: Herbalist		
On a day when making potions at the desk and actually playing the character on an adventure that day, all failed potion rolls are instead made as one day temp potions. This ability may not be used with Alchemical Preparation.		

Post 8th: Discipline	Cost: 40pts	T: 6
Available To: Military Scout		
An additional use of the basic tendency ability, and at all times gains +1 level of resistance to Domination effects – not from own military superior.		

Post 8th: Part Time Work	Cost: 40pts	T: 6
Available To: Henchman		
If own master is not on the same adventure may choose a single temporary replacement for that adventure. On adventure abilities are gained as normal – but no ‘off adventure’ skills are granted. Once the temp is chosen it may not be changed that day. Should the temporary charge die that day, then the Henchman will receive no achievement points for that day’s adventure.		

Post 8th: Wild Danger	Cost: 40pts	T: 6
Available To: Loner		
Gains Danger Sense whilst out in the wilds or rural areas, and only whilst not within 20’ of any other person.		

Post 8th: Due Care and Attention	Cost: 40pts	T: 6
Available To: Tinker		
With 5 minutes time-in work on any singular piece of equipment may protect that object from the next ‘breaking’ effect, such as Shatter targeted at it. This skill is usable at will.		

Post 8th: Attuned to the Spirits	Cost: 40pts	T: 6
Available To: Temple Assassin		
When applying Holy (or Unholy) water to own weapons it will last for 2 blows per dose, rather than one.		

Post 8th: Primal Strike	Cost: 40pts	T: 6
Available To: Killer		
Gains a second innate Primal strike. May use both innates on one weapon and inflict Magical and Spiritual damage (Necro) at the same time.		

Table 7(650pts)

Post 8th: Awareness	Cost: +60pts	T: 7
Available To: Any		
From Combat-Wary: Grants +2 DAC non-stacking with Blesses, Curses, Watchings or similar.		

Post 8th: Resilient Potion-Drinker	Cost: 20pts	T: 7
Available To: Pathfinder, Thug, Assassin, Beggar, Spy		
Potion kick-out stamina returns at the rate of 1 tblp per 5 minutes.		

Post 8th: 3rd Backstab	Cost: +100pts	T: 7
Available To: (1st-class only) Assassin		
From 2nd Backstab: Now adds +3 grades of damage to attacks from behind in the same way as basic Backstab.		

Post 8th: Surprise Blow	Cost: 125pts	T: 7
Available To: (1st-class only) Assassin, Pathfinder, Thug, Beggar		
+1 Max Damage, max Quin, using Backstab on first blow from behind, with each hand if using Either-Handed weapons. Targets immune to backstab are not immune to this increase in max damage.		

Post 8th: Quick Draw Daggers	Cost: 45pts	T: 7
Available To: Pathfinder, Assassin		
At will may call a Time Freeze to draw an O class Dagger.		

Post 8th: Force Majeure	Cost: 20pts* Max: 3	T: 7
Available To: Assassin, Kallah Beggar		
Uses innate Dexterity AC offensively rather than defensively. Loses a chosen amount of Dexterity AC (not that granted by potions, items, spells, etc), but one target's AC is reduced by that many points versus blows from the user. This lasts 5 minutes and cannot be ended prematurely, or ends when the target is slain.		

Post 8th: Torture Mastery	Cost: 75pts	T: 7
Available To: Assassin, Spy, Kallah Beggar		
If a creature is entirely helpless, but able to speak, may force them to answer three questions truthfully, unless they are completely immune to pain. A goodly character may not use this skill. This skill may be used a maximum of 1/hour per target.		

Post 8th: Enhanced Discern Outlaw	Cost: +40pts	T: 7
Available To: Pathfinder, Assassin, Thug, Spy		
From Discern Outlaw: Immunity to physical informational effects does not negate this ability unless target is also disguised by the Disguise skill. Penetrate Disguise may not be combined with this ability.		

Post 8th: Change Appearance	Cost: 30pts	T: 7
Available To: Any		
From Disguise skill: Now when used on self, a disguise worn cannot be penetrated by Penetrate Disguise. Must still be appropriately phys-repped on adventure, or no change (i.e. only as good a change as it is good).		

Post 8th: Penetrate Disguise	Cost: 50pts	T: 7
Available To: Any		
After 30 seconds observation may determine whether a target is wearing a disguise, and roughly what their appearance is beneath the disguise.		

Post 8th: Utilise Single Spirit Item	Cost: 50pts	T: 7
Available To: Pathfinder, Thug, Assassin		
May use one spirit item, which must be personalised to you. If the item is destroyed you may choose another item to use with this ability. This may be any spirit item but may not be personalised to another and must be of the appropriate alignment as per a Priest. This means when buying this ability as a neutral character you must decide if you are aligning to good or evil spirits.		

Post 8th: Unarmed Combat	Cost: 50pts	T: 7
Available To: Any		
Grants Unarmed Combat as per Warrior skill.		

Post 8th: Acute Hearing	Cost: 50pts	T: 7
Available To: Any		
Allows the user to hear the movements of any creature within 60'. Effectively this means that when the character uses the ability by declaring 'Acute Hearing' all creatures within hearing should indicate their broad race category (e.g. elven) and location. At ref's discretion some creatures may not make sounds, and things walking within walls are generally silent as the walls muffle their noises.		

Post 8th: Locational Sniff	Cost: +50pts	T: 7
Available To: Any		
From Discern Smell: Allows the user to smell out the odour of all creatures within 60'. Effectively this means that when the character uses the ability by declaring 'Locational Sniff' all creatures within hearing should indicate their broad race category and location. At ref's discretion some creatures may have no odour at all, and things walking within walls generally cannot be smelt. Ethereal creatures will generally have no smell.		

Post 8th: Silent Movement	Cost: 50pts	T: 7
Available To: Any		
Grants the user immunity to Acute Hearing.		

Post 8th: +3 Skill Levels	Cost: +70pts	T: 7
Available To: Any		
From +2 Skill Levels: Increases the skill level in a single standard skill by another +1, making +3 in total. This ability is not asterisked, and may be taken only in one skill.		

Post 8th: Spiritual Adept	Cost: 150pts	T: 7
Available To: Any		
May use spirit items of own alignment (Good / Neutral / Evil).		

Post 8th: Read Spiritual Scrolls	Cost: 150pts	T: 7
Available To: Any		
From the ability to read magical scrolls using Read Glyphs and Languages, may now read spiritual scrolls of miracles up to half the user's skill level in read Glyphs and Languages (round up). These scrolls must be of the appropriate alignment as per a Priest, i.e. LG, NG, CG & LN characters may only read good or neutral spirit scrolls and CN, LE, NE & CE may only read neutral or evil spirit scrolls. NN characters may read neutral spirit scrolls and choose to align to use either good or evil scrolls however if they then multi-class to Priest they are still bound by this choice.		

Post 8th: +2 Weapon Mastery Dagger	Cost: +65pts	T: 7
Available To: Any		
From +1 Weapon Mastery Dagger: Now has +2 masteries.		

Post 8th: Hero Alchemist	Cost: 50pts	T: 7
Available To: Any		
From Mercenary Alchemist: On-adventure make allowance is now increased to be equal to the skill level in each different branch of potion. Thus a potion maker with 6 skill levels in Make Healing Potion and 3 skill levels in Make Poison – could make 6 batches of healing potions and 3 batches of poison.		

Post 8th: Recovery	Cost: 60pts	T: 7
Available To: Any 1st Class		
With one hour's rest may regain a used innate that is available as a standard or specialist skill (e.g. Stealth or Salmon leap). May not be done at the same time as any other med. May not be used by Spies to regain neuronics innates. In the case of Flesh Mending, 6 points is regained in an hour.		

Post 8th: Pre-Prepared	Cost: +75pts	T: 7
Available To: Any		
From Hero/Mercenary Alchemist: May chose to start the adventure having pre-made some or all of the batches available to them via Hero and Mercenary Alchemist.		

Post 8th: Two Isn't as Good as One	Cost: 50pts	T: 7
Available To: Any		
If using a B class weapon then Surprise/Greater Surprise Blows abilities now apply to the first two blows, rather than first blow with E class weapons.		

Table 8 (1000pts)

Post 8th: Well-Equipped with Healing	Cost: 15pts*	T: 8
Available To: Thug, Pathfinder, anyone with Herbalist Tendency		
Begins adventure with 3 doses of adventure-temporary 6pt tblp cure potions.		

Post 8th: Well-Equipped with Venom	Cost: 15pts*	T: 8
Available To: Assassin, Thug, Kallah Beggar, Herbalist Tendency		
Begins adventure with 3 doses of adventure-temporary BV 6 potions.		

Post 8th: Utilise Earth Power Items	Cost: 40pts	T: 8
Available To: Pathfinder, Dabbler, Spy, anyone with Loner tendency		
From Recognise Earth Power. May now use Earth Power items with the same facility as a Druid.		

Post 8th: Utilise Neuronic Items	Cost: 40pts	T: 8
Available To: Pathfinder, Kallah Beggar.		
From Recognise Neuronics. May now use Neuronic items with the same facility as a Neuronic class.		

Post 8th: Cache	Cost: 40pts*	T: 8
Available To: Pathfinder, Assassin, Thug, Tinker Tendency		
Begins adventure with an adventure-temporary simple bomb. The phys rep should be a tennis-ball or object of similar size. Time Freeze should be called the instant the bomb is thrown. When the ball comes to rest all those within a 20' radius take 18 tblp damage, 3 to each location, stopped only by innate (non-armour) PAC, at a rate of 6/1 for every points of PAC. Once used, cache is of course destroyed.		

Post 8th: Solitaire	Cost: 125pts	T: 8
Available To: (1st-class only) Any		
If not carrying any permanently supernatural items other than elven enchanted objects, is immune to supernatural sights such as mana sight, spirit sight, elemental sight, neuro-sight. Ability is broken for 15 minutes if character attacks or runs.		

Post 8th: Spiritually Cloaked	Cost: +60pts	T: 8
Available To: Any except Rogue		
From Immunity To Informational Miracles: Grants immunity to all spiritual informational effects. Recognise Spirit still gives a Yes / No answer. Does not grant immunity to spiritual sight but would stop it yielding extra information such as alignment.		

Post 8th: Magically Cloaked	Cost: +60pts	T: 8
Available To: Any except Wayfinder		
From Immunity To Informational Spells: Grants immunity to all magical informational effects. Recognise Mana still gives a Yes / No answer. Does not grant immunity to magical sights but would stop it yielding extra information such as mana colour.		

Post 8th: Force Majeure	Cost: 35pts* Max: 2	T: 8
Available To: Any		
Exactly as Assassin ability on Table 7 above. Only usable when wielding daggers.		

Post 8th: Immunity Tracking	Cost: 25pts	T: 8
Available To: Any		
The character moves lightly by habit, and is immune to the Tracking ability.		

Post 8th: Supernatural Perception	Cost: +60pts	T: 8
Available To: Any		
From Perception specialist skill, is now able to use Perception versus any target, whether hidden supernaturally or physically from sight.		

Post 8th: Standard Skill	Cost: 30pts*	T: 8
Available To: Any		
May take a pathfinder standard skill from this book which is not normally available to the class, with a base skill level of 1 if applicable. Note the individual class restrictions, however – e.g. thugs may never make potions; no-one but Wayfinders may acquire Prayers of Guidance, etc.		

Table 9 (1500pts)

Post 8th: Specialist Skill	Cost: 50pts*	T: 9
Available To: Any		
May take a pathfinder specialist skill from this book which is not normally available to the class. Note the individual class restrictions, however – e.g. thugs may not learn potion making skills; no-one but Wayfinders may acquire Chosen of the Faithful, etc.		

Post 8th: Dirty Fighter	Cost: 65pts	T: 9
Available To: Any		
Grants +6pts of damage from behind. Must have at least 1 st level of Backstab, +1 Weapon Mastery, and +1 strength. This does not modify the max damage in any way. This does not stack with the Warrior ability Veteran Fighter.		

Post 8th: Enhanced +2 Weapon Mastery	Cost: +75pts	T: 9
Available To: Any		
From +1 Weapon Mastery: Now has +2 Masteries in one nominated weapon type.		

Post 8th: Chameleon	Cost: 50pts*	T: 9
Available To: Any		
Grants a non-supernatural Chameleon (self) once per day.		

Post 8th: Greater Change Appearance	Cost: +50pts	T: 9
Available To: (1st Class Only) Assassin, Spy, Pathfinder		
From Change Appearance skill: No longer needs to apply base race makeup, however the quantity and quality of the disguise makeup worn should at least match all the makeup / costume restrictions possessed		

Post 8th: Greater Surprise Blows	Cost: +75pts	T: 9
Available To: (1st-class only) Thug, Assassin, Pathfinder, Beggar		
From Surprise Blow: When using Backstab gains +X max damage for the first blow with either hand. X equals the number of grades of Backstab owned. Note this max damage does not apply if a person is immune to Backstab.		

Post 8th: Greater Stealth	Cost: 60pts*	T: 9
Available To: Thug, Assassin, Pathfinder, Beggar		
From Stealth standard skill, may now 1/day move at slow zombie speed without breaking the effect of the Stealth innate. It is still broken should the scout break any of the other conditions, such as talking, attacking, etc.		

Post 8th: 3rd Backstab	Cost: +100pts	T: 9
Available To: (1st-class only) Kallah Beggar		
From 2nd Backstab: Now adds +3 grades of damage to attacks from behind in the same way as basic Backstab.		

Post 8th: Non-Academis	Cost: 70pts	T: 9
Available To: Pathfinder		
From 5th Extra Level of Life: Grants 6th Extra Level of Life, but not available if character has entered into any other bracket bar Warrior.		

Post 8th: Incendiary Cache	Cost: 40pts*	T: 9
Available To: Pathfinder, Assassin, Thug, anyone with Tinker Tendency		
This functions in all ways as a standard Cache as described above; however, on exploding it inflicts 12/2 non-supernatural flaming damage to all within 20', to which only Innate PAC applies to reduce the damage. All objects within the radius suffer the effects of an Ignite spell, catching fire if flammable		

Post 8th: Blinding Cache	Cost: 60pts*	T: 9
Available To: Pathfinder, Assassin, Thug, anyone with Tinker Tendency		
This functions in all ways as a standard Cache as described above. However, on exploding it flashes unbearably brightly, blinding all with their eyes open and able to see it within 20' – the referee should check during the Time Freeze which characters and monsters are in sight of the centre of the explosion. No damage is inflicted. The blindness lasts 2 minutes, and Immunity to Blindness applies.		

Post 8th: Accuracy	Cost: 70pts	T: 9
Available To: Pathfinder, Assassin		
1st blow of combat cuts through PAC.		

Post 8th: First Aid	Cost: 60pts	T: 9
Available To: Pathfinder		
This grants the Pathfinder Monk Locational Curing as per the Monk skill.		

Post 8th: Tampering	Cost: 50pts	T: 9
Available To: Pathfinder, Assassin, Thug, anyone with Tinker Tendency		
May alter any sort of Cache so that it does not explode immediately on impact, but instead detonates a fixed amount of time later. Takes 30 seconds of phys-repping ‘fiddling’ with the Cache, after which it may be set to explode between 2 seconds and 5 minutes after the impact of being thrown.		

Post 8th: Ghost	Cost: +125pts	T: 9
Available To: All bar Thug		
From the appropriate immunity to informational effect: May cross supernatural lines or wards without triggering their effect. To do this, the user must move at no more than half-speed across the line, and must be aware of its presence. If the scout has immunity to informational spiritual effects, may cross spiritual lines – magical informational effects, magical lines, and so on. Still may not cross impenetrable barriers – e.g. if a Protection from Spirits would affect the pathfinder, it still does. Just having Immunity to Informational Spells or Miracles is not sufficient – must have immunity to all spiritual, magical, earthpower or neuronic informational effects as appropriate.		

Post 8th: Killer’s Eye	Cost: +100	T: 9
Available To: 1st Class Any, 2nd Class Assassin		
From Assassin’s Eye. Assassin’s Eye will now reveal Supernatural hits if the relevant recognise skill is owned. It also becomes an informational effect of that power base (e.g. If Recognise Mana is owned it would, via a magical informational effect, reveal any magical hits of the target).		

Post 8th: Enhanced Judge Strength	Cost: +125	T: 9
Available To: 1st Class Any		
From Judge Strength. Judge Strength will now reveal a target’s supernatural levels of resistance if the appropriate recognise skill is owned. It counts as an informational effect of that power base (e.g. If Recognise Mana is owned, it will reveal level of resistance to magic as a magical informational effect).		

Post 8th: Enhanced Judge Profession	Cost: +75	T: 9
Available To: 1st Class Any, 2nd Class Spy		
From Judge Profession. Judge Profession now becomes an informational effect of any power base for which a rec is owned, not just physical.		

Post 8th: An Eye to a Kill	Cost: 50*pts	Max 4 T: 9
Available To: 1st Class Pathfinder/Assassin/Kallah		
If successfully uses Judge Strength, Judge Profession and Assassin’s Eye on a target, gains + 3 Backstab (stacks with published grades) on the first blow vs. them (which can increase Greater Surprise Blows’ max damage) within the next 30 seconds. If the person is unaffected by any of these discerns then the extra backstab is not gained. Usable x1/day.		

Table 10 (3000pts)

Post 8th: Great Cache	Cost: 75pts*	T: 10
Available To: Pathfinder, Assassin, Thug, anyone with Tinker Tendency		
This functions in all ways as a standard Cache, as described above. However, on detonation the explosion is much larger, inflicting 36/6 physical damage to all within 20' in the same way as a Cache, and causing a Knockback and Knockdown to all within the radius. At ref's discretion this may well cause structural damage if used within a building, or similar.		

Post 8th: Ambush	Cost: 25pts	T: 10
Available To: (1st Class) Assassin, Pathfinder, Kallah Beggars		
Should the assassin attack from behind, the first blow of that combat receives +1 damage grade, limited by maximum damage.		

Post 8th: Greater Ambush	Cost: +50pts	T: 10
Available To: (1st Class) Assassin, Pathfinder, Kallah Beggars		
Ambush now applies to the first blow of each hand. Can only be in the Scout or Warrior brackets if this ability is owned.		

Post 8th: Strike Death Blow	Cost: 150pts	T: 10
Available To: Assassin, Pathfinder		
If the target of the blow is unconscious or unable to act even if hit, is of flesh and blood nature and is susceptible to the type of damage inflicted by the character using this ability then the target may be slain in a single blow with a 10 second concentration period preceding the blow.		

Post 8th: Streetwise	Cost: 40pts	T: 10
Available To: Pathfinder, Thug, Beggar		
After 5 seconds observation of a target within 9' [3paces], may discern whether they are Evil in alignment. This is a physical informational effect.		

Post 8th: Specialist	Cost: 125pts	T: 10
Available To: 1st Class Assassin or Kallah Caste Beggar, or 1st Class Any with buy as Assassin.		
May now inflict maximum damage of Quin from behind. Damage from Surprise Blow is now based on Quin not Quad, so that Six may be called with Backstab. However blows not from behind or on a helpless target are at Max of Triple at all times unless the character is also in the Warrior Bracket.		

Post 8th: + 3 DAC for Force Majeure	Cost: 30pts	T: 10
Available To: Any		
Grants +3 DAC solely for the purposes of Force Majeure.		

Post 8th: + 6 (from +3) DAC for Force Majeure	Cost: +50pts	T: 10
Available To: Assassin		
Grants +6 DAC solely for the purposes of Force Majeure.		

Post 8th: Sense Motion	Cost: 125pts	T: 10
Available To: Any		
From Perception, Supernatural Perception, Locational Sniff, Acute Hearing, Sixth Sense and DAC 7 or more: Is now aware of the movement of all creatures within 20' of him, in a way similar to Wanderer's Hunch; any creature which the player can see in the real world, whether hand in the air or not, may be watched by the pathfinder when they are moving. Does not apply to motionless creatures. The player should be aware that sometimes monsters or players may need to move from place to place physically without representing a character or part!		

Post 8th: Even Greater Stealth	Cost: 80pts	T: 10
Available To: (1st-class only) Thug, Assassin, Pathfinder, Beggar		
Must have at least 2 innate Greater Stealths: Greater Stealth is now an "at will" ability, but still only applies to Stealth innates. Note that this does not function with "at will" stealth abilities (including 1/15 minutes or similar).		

Post 8th: Super Ghost	Cost: +100pts	T: 10
Available To: All 1st Class bar Thug		
From Ghost: May now cross wardings that are warding barriers under the same conditions as listed previously.		

Post 8th: Super Solitaire	Cost: +75pts	T: 10
Available To: (1st-class only) Pathfinder, Thug, Assassin, Beggar, Spy		
From Solitaire: Solitaire is now altered such that items carried of a specific type negate the ability against that power source.		
For example a scout not carrying any spiritual objects but carrying a magical one would be able to use Solitaire against Spiritual Sight but not magical ones, etc.		

Post 8th: 3rd Backstab	Cost: +120pts	T: 10
Available To: (1st-class only) Any		
From 2nd Backstab: Now adds +3 grades of damage to attacks from behind in the same way as basic Backstab.		

Post 8th: Cascade	Cost: 100pts	T: 10
Available To: Any		
From Greater Surprise Blows. May now apply Surprise Blow to the second blow of each hand. This functions with "Two Isn't as Good as One" ability, meaning the first two blows with a B class weapon are "Greater Surprise" and the third and fourth blows "Surprise Blows".		

Post 8th: Magical Concealment	Cost: 50*pts	Max: 3 T: 10
Available To: 1st Class Pathfinder, Spy, Rogue		
From Magically Cloaked and Solitaire. While under a Stealth/Greater Stealth gains immunity to magical/elemental sights. Lasts 5 minutes. 1/day		

Post 8th: Spiritual Concealment	Cost: 50*pts	Max: 3 T: 10
Available To: 1st Class Pathfinder, Spy, Wayfinder		
From Spiritually Cloaked and Solitaire. While under a stealth/greater stealth gains immunity to spiritual sights. Lasts 5 minutes. 1/day		

Post 8th: Calculated Strike	Cost: 75*pts	Max: 3 T: 10
Available To: 1st Class Assassin and Kallah.		
After successfully using Assassin's Eye, Judge Strength and Judge Profession on a target they may spend a further 30 seconds studying them and the assassin's max damage increases from Surprise/Greater Surprise Blows apply even if the target is immune to backstab (obviously the damage grades must be obtained elsewhere). This is a physical informational effect with a range of 20ft. Can only be in the Scout and Warrior brackets if this ability is owned.		

Table 11 (5250pts)

Post 8th: Immunity to Perception	Cost: +50pts	T: 11
Available To: (1st-class only) Pathfinder, Assassin, Spy		
From Ghost and Immunity to Physical Informational Effects: Is now immune to Perception abilities except Wanderer's Hunch and Sense Motion.		

Post 8th: Stealthy	Cost: +100pts	T: 11
Available To: (1st-class only) Thug, Assassin, Pathfinder, Beggar		
From Even Greater Stealth: Now applies to any form of own innate 'chameleon' used. Not from Items.		

Post 8th: Enhanced Super Ghost	Cost: +75pts	T: 11
Available To: 1st Class ALL Bar Thug		
From Super Ghost: Need not be aware of the wardings transgressed but must still be moving at a max of ½ speed.		

Post 8th: 4th Backstab	Cost: +150pts	T: 11
Available To: (1st Class Only) Assassin, Kallah Beggars		
From 3rd Backstab: Now adds +4 grades of damage to attacks from behind in the same way as basic Backstab.		

Post 8th: Master Ambush	Cost: +75pts	T: 11
Available To: (1st Class) Assassin, Pathfinder, Kallah Beggars		
From Greater Ambush. Ambush now grants + 2 grades on the first blow and + 1 grade on the second.		

Post 8th: View to a Kill	Cost: +150pts	T: 11
Available To: (1st-class only) Assassin, Kallah Beggar		
Must have at least 4 innates of Eye to a Kill: May now be used at will, max once per target per day.		
May only be within the Scout and Warrior brackets if this ability is owned.		

Post 8th: Master Solitaire	Cost: +150pts	T: 11
Available To: (1st-class only) Pathfinder		
From Super Solitaire: While under a Stealth/Greater Stealth, Solitaire may be applied regardless of items carried providing the scout has immunity to informational effects of the relevant power base (e.g. If carrying a spiritual item then needs immunity to spiritual information effects; immunity to informational miracles is not enough). This does not affect other Solitaire restrictions (e.g. attacking, running, etc.).		

Table 12 (7500pts)

Post 8th: First Cut is the Deepest	Cost: +200pts	T: 12
Available To: (1st-class only) Assassin		
From Greater Surprise Blows and Cascade: Now gains No Max Damage First Strike of combat from behind. Greater Surprise Blows now applies to the next two blows, and Surprise Blow to the fourth and fifth blows. Requires 60 seconds' study of the target before it is used. This prep time may not be reduced by any means. May only be in the Scout and Warrior brackets if this ability is owned.		

Post 8th: 5th Backstab	Cost: +200pts	T: 12
Available To: (1st Class Only) Assassin		
From 4th Backstab: Now adds +5 grades of damage to attacks from behind in the same way as basic Backstab.		

Post 8th: Hidden Assailant	Cost: 100pts	T: 12
Available To: (1st Class only) Pathfinder, Assassin		
From Immunity to Perception abilities. Is now immune to Wanderer's Hunch and Sense Motion but only whilst under the effects of a Stealth, Chameleon or similar and stationary. This ability goes down for 5 minutes if attacks anyone.		

Scout Status

A Status is different from a Tendency or Class, as it represents the Scout's membership of an organisation, or having achieved some degree of acclaim from their peers. Unlike Noble Ranks or Ritter Status these do not have to be purchased as soon as a character reaches the relevant table. Life gained from a Status stacks with Guild, Item, and other sources of life; however a character can only benefit from life from one Status.

The below are only available to 1st Class Scout Subclasses (this does not include those that have gained the ability to buy as 1st class Scout).

Membership of the Deci Assassin Guild

The famous and terrifying assassins of Deci have a reputation throughout the Empire, able to twist through the shadows of reality to move into position to kill their victims. These are some of the most dangerous assassins in the Empire and Primus.

Requirements – 1st Class Assassin or Kallah Beggar from Deci.

Stage One – Enforcer. Cost: 75pts, Table 1

Gains +3/1 life

Step through the Shadows 1/day – Acts as a 20ft range Shadow Shift. This only functions in urban environments (including in buildings and the like).

Stage Two – Butcher. Cost: +60, Table: 5

Gains +6/2 (total) life.

Can now use Step through the Shadows while using a Stealth without breaking the Stealth.

Stage Three – Executioner. Cost: +90, Table: 7

Is now Ostracised within the Labyrinthian Empire.

Gains a second use of Step through the Shadows, as per Stage One. May buy extra innates at 60 points each, max 2.

1/day may trigger a Step through the Shadows in response to a blow (must be declared within 2 seconds of the blow landing). Instead of shifting, gains ½ effect the blow. May buy extra innates at 40 points each, max 2.

The Halls of Nobility Shield Maidens

Trained from a young age the Shield Maidens of the Nobility are their bodyguards and protectors. They stand in the shadows ready for assassins to strike, prepared to lay down their lives to stop them.

Requirements – Must be from the Labyrinthian Empire. Membership must be decided at 1st level and this is purchased as the 1st ability post 8th, or can only be obtained via CC contract.

Stage One – Guardian. Cost: 40pts, Table 1

May select a chosen individual to protect. The chosen individual gains a stacking 6 points of Live to Minus the first time they need it (doubled if they are a Noble of the Empire).

Free and Clear 1/day – When using Trap Wary may take one individual within “grabbing distance” with them, granting them the benefits of Trap Wary as well.

Stage Two – Protector. Cost: +50, Table: 5

Gains a second Free and Clear innate.

The Live to Minus 6 (or 12) granted to the chosen individual now applies at all times, not just the first time it is needed.

Stage Three – Pretorian Cost: +60, Table: 7

Free and Clear may now be used at will for the chosen Protectee. Any innates are retained and can be used on other people.

Gains Take Killing Blow 1/day for the Protectee – Must be used during Time In. The scout suffers the damage from the weapon blow as it was taken by the Protectee. May buy extra Take Killing Blow innates at 80 points, max 2.

Circle Infiltrator

Circle Infiltrators are mentally conditioned to be loyal to the Circle, and to be able to withstand extreme torture. When ready, they are sent out to infiltrate Hedge organisations in the Baronies and other organisations beyond. Risking their lives and running the risk of being captured by the Circle itself, or foreign powers they are spying on.

Requirements – Must be from the Baronies and be loyal to the Circle.

Stage One – Informer. Cost: 40pts, Table 1

No longer requires a Baronial accent, but must have an accent of some kind.

Gains a Physical Psi-Scan 1/day.

Is fitted with a Conditioned Heart-Stop that triggers if they reveal Circle sensitive information or compromise its edicts.

Stage Two – Spy Cost: +60, Table: 5

Gains a second Physical Psi-Scan innate.

Is now immune to informational effects that reveal the Infiltrator's loyalty to the Circle, except from Circle members.

Gains a physical Befriend 1/day that requires 5 minutes talking to the target. There is no "retribution" associated with this.

Stage Three – Infiltrator Cost: +60, Table: 7

Gains a third Physical Psi-Scan innate.

Gains a second Befriend innate. May use both innates to befriend a small group of people (numbers at Ref's discretion, but often an encounters' worth).

May buy extra Physical Psi-Scan innates at 30 points each, max 3, and extra Befriend innates at 40 points, max 2.

Hedge Saboteur

Part of the underground Hedge movement within the Baronies. They seek to undermine the social structure and bring down the Circle oppressors.

Requirements – Must be from the Baronies and opposed to the Circle.

Stage One – Detractor. Cost: 40pts, Table 1

No longer requires a Baronial accent, but must have an accent of some kind.

Discern Circle Member. Requires 30 seconds talking to an individual about Baronial matters. This is a physical informational effect.

Is considered Hedge and is thus Ostracised within the Baronies.

Stage Two – Seditonist. Cost: +80, Table: 5

Gains +3/1 life

Gains immunity to any informational effect that would reveal they are a Hedge/directly opposed to the Circle.

Stage Three – Saboteur Cost: +50, Table: 7

Gains +6/2 (total) life.

While off dungeon is immune to all informational effects and gains the CP Benefit "Haven" (Immunity to effects that target you off dungeon) as he has a network of safe houses in various locations.

Denizen of Khaniabhad

For whatever reason the scout has been forced to live outside of Ishmaic society. In order to survive he has sought refuge in the city of the outcasts and traitors to the confederacy.

Requirements – Must be an Ishmaic Scout subclass.

Stage One – Leper. Cost: 50pts, Table 1

Is now Ostracised within Ishma.

Pact with the Efreeti 1/day – With 30 seconds spent invoking the power can cast an Elemental spell of up to 4 mana.

Stage Two – Exile. Cost: +90, Table: 5

Gains a second use of Pact with the Efreeti.

Pact with the Efreeti will now functions on Elemental spells up to 6th level, and Ebony spells to 4th level.

Magical Deception 1/day

Stage Three – Pariah Cost: +120, Table: 7

Gains a third use of Pact with Efreeti.

May now use Pact with the Efreeti on Elemental Spells to 10th level and Ebony to 8th level.

May buy extra uses of Magical Deception at 40 points each, max 3, and an extra Pact with the Efreeti for 80 points.

Master of the Deserts

From a young age the scout was charged with finding paths through the deserts so the Hetyans could move safely from camp to camp. Now they out this talent to use on the mercenary trail.

Requirements – Any Ishmaic Scout.

Stage One – Traveller. Cost: 60pts, Table 1

From Ishmaic Survival Skill. The Master of the Deserts can set aside his need for water or food, gaining immunity to any effect based on hunger or thirst.

Gains Tell Direction.

Gains a pre-dungeon Lucky Idea of generally useful information. It won't always make sense and should be role-played appropriately.

Stage Two – Wanderer. Cost: +50, Table: 5

Tell Direction is now a "Sense" – as such functions underground/when there are no features or points of reference. Additionally while on Primus is aware of roughly how far away they are from the Great Sink.

+3/1 life

Stage Three – Nomad Cost: +60, Table: 7

The Master can never get lost, even in mazes or the mittlenacht. They can always find a way out/to their destination. It might not always be an easy route, but one that can be travelled none the less.

+6/2 (total) life

Explorer

Be it by ship or on foot the Explorer seeks to find new worlds, to explore new civilisations and to find lost societies to learn from.

Requirements – Any except Beggars.

Stage One – Searcher. Cost: 30pts, Table 1

Gains a physical Major Prayer about cultures/societies/archaeology and general matters an explorer maybe aware of – 3/day.

Stage Two – Pioneer. Cost: +70, Table: 5

Gains Linguist skill as per Scholar (after 5 minutes exposure to an unknown language can speak/understand the language at pigeon speed using small/simple words). If already owned then no longer needs to speak at pigeon speed as becomes fluent in the language quickly.

+3/1 life.

Stage Three – Voyager. Cost: +60, Table: 7

Major Prayer from Stage 1 can now be used 1/15 minutes while exposed to the society/situation. This does not work on wards/similar, but on cultural matters/iconology or the like it is fine.

+6/2 (total) life

Master of the Seas

A life on the high seas. Be it as a pirate, trader, member of the rather poor Imperial Navy, or something else. The scout lives for the sea breeze and salty water.

Requirements – Any Scout subclass.

Stage One – Mariner. Cost: 40pts, Table 1

Gains a physical Neuro-Balance 1/day.

Now suffers ½ effect Drown and similar effects.

Stage Two – Sea-Man. Cost: +90, Table: 5

Gains a second Neuro-Balance innate.

Gains a physical Walk through Water (self) 1/day

Physical Rope Trick 1/day

Stage Three – Sailor. Cost: +60, Table: 7

Now gains a permanent physical Neuro-Balance.

Gains Immunity to Drown and similar effects.

May buy extra innates of Walk Through Water (self) at 30 points each, max 3, and extra innates of Rope Trick at 20 points each, max 3.

Appendix One: Life Scales and Class Variations

Following is a list of tables detailing the life-points of non-human variants of the various scout classes, and also any differences in their standard abilities. All details remain the same unless specifically listed as being different. In particular, all races gain the Dexterity AC listed for the class.

Human Scout Subclass	1st	2nd	3rd	4th	5th	6th	7th	8th
Assassin	26/9	29/10	32/11	35/12	38/13	41/14	44/15	47/16
Hanot Beggar	30/10	33/11	36/12	39/13	42/14	45/15	48/16	51/17
Kallah Beggar	24/8	27/9	29/10	32/11	35/12	37/13	40/14	42/15
Leywalker	24/8	27/9	29/10	32/11	35/12	37/13	40/14	42/15
Pathfinder	26/9	29/10	32/11	35/12	38/13	41/14	44/15	47/16
Rogue	24/8	27/9	29/10	32/11	35/12	37/13	40/14	42/15
Spy	24/8	27/9	29/10	32/11	35/12	37/13	40/14	42/15
Thug	28/9	32/11	36/12	40/14	44/16	48/17	52/19	56/21
Wayfinder	24/8	27/9	29/10	32/11	35/12	37/13	40/14	42/15

Non- Human Subclass	1st	2nd	3rd	4th	5th	6th	7th	8th
Alfar Leywalker	24/8	27/9	29/10	32/11	35/12	37/13	40/14	42/15
Alfar Pathfinder	24/8	27/9	29/10	32/11	35/12	37/13	40/14	42/15
Blauz Assassin	24/8	27/9	29/10	32/11	35/12	37/13	40/14	42/15
Calabrim Pathfinder	26/9	29/10	32/11	35/12	38/13	41/14	44/15	47/16
Calabrim Thug	28/9	32/11	36/12	40/14	44/16	48/17	52/19	56/21
Drave / Elf Assassin	24/8	27/9	29/10	32/11	35/12	37/13	40/14	42/15
Drowe/ Ebony/ Faerie Pathfinder	23/7	25/8	28/9	31/11	33/11	35/13	34/14	39/15
Drowe/ Ebony/ Faerie Rogue	23/7	25/8	27/9	29/10	31/11	33/12	35/13	37/14
Drowe/ Ebony Assassin	23/7	25/8	27/9	29/10	31/11	33/12	35/13	37/14
Drowe/ Ebony/ Faerie Spy	23/7	25/8	27/9	29/10	31/11	33/12	35/13	37/14
Dwarven Pathfinder	24/12	27/14	29/15	32/16	35/18	37/19	40/20	42/21
Dwarven Artificer	24/12	27/14	29/15	32/16	35/18	37/19	40/20	42/21
Elven Pathfinder	24/8	27/9	29/10	32/11	35/12	37/13	40/14	42/15
Elven Rogue	23/7	25/8	28/9	31/11	33/11	35/13	34/14	39/15
Elven Spy	23/7	25/8	28/9	31/11	33/11	35/13	34/14	39/15
Ggrutuck Artificer	26/9	29/10	32/11	35/12	38/13	41/14	44/15	47/16
Goblin Pathfinder /Assassin	23/7	25/8	28/9	31/11	33/11	35/13	34/14	39/15
Halfling Pathfinder	23/7	25/8	28/9	31/11	33/11	35/13	34/14	39/15
Farfolk Pathfinder [Traveller]	24/8	27/9	29/10	32/11	35/12	37/13	40/14	42/15
Orc/Ratfolk Pathfinder / Assassin	26/9	29/10	32/11	35/12	38/13	41/14	44/15	47/16
Orc /Ratfolk Thug	28/9	32/11	36/12	40/14	44/16	48/17	52/19	56/21
Silver Folk Spy	23/7	25/8	26/9	28/10	29/10	31/11	33/11	35/12

Racial Modifiers

The racial modifications are summarised below – though you are recommended to refer to the racial entry for further details.

Half Elves have the same life as Humans.

Alfar may buy the ‘Loner’ tendency at half cost. They may not buy the Local Lad tendency.

Dwarves suffer –2 skill levels (minimum 0) when reading magical scrolls with Read Glyphs and Languages.

Orcs and Goblins now follow the standard progression for their classes.

Halflings suffer magical casting modifications as per Dwarf, above.

Farfolk may select Recognise Neuronics and Detect Possible Neuronic Activity as standard skills rather than specialists.

Goblin assassins do not get the Backstab skill as an assassin (they still acquire it racially at 6th level however). They may not learn to make potions other than poisons.

Magical creatures [Elves/Draves/Faeries] gain +2 skill levels when reading magical scrolls of their own racial colour, but -2 [min 0] when reading from the opposite racial colour. Wood elves are considered to be brown in colour. Faeries are considered to be of no colour.

Magical creatures may take Recognise Mana skill as a standard skill rather than a specialist skill.

All magical creatures that are Rogues receive +1 level of casting for all spells of their own colour (or colours in the case of a Faerie). They also receive modifiers to reading scrolls as Elven Pathfinders do. They may also select a cantrip of their own colour (or of one of their colours) which they acquire as a specialist glyph and can be cast at will for normal casting damage. Twilight Elf Rogues gain no such cantrip, but may instead select a single standard grey spell of up to 3rd level, which they gain as a specialist. These additional specialists do not use up a specialist glyph slot.

Silver Folk spies may learn Recognise Neuronics as a standard skill rather than a specialist. They may buy x2 spy neuronics innates, granting double the standard 1st-8th neuronics gained by spies, for 60 pts on Table 1.

Appendix Two: Potion Making – Costs and Batches

Appendix Three: Languages

Within the Labyrinthe game system languages are represented by the use of different fonts. In order to read them a character needs to have the relevant ability (such as Read Languages, or Read Spirit Runes). It is permissible to carry a crib sheet/guide to assist with this, providing you have the relevant ability. The common languages within the Labyrinthe world are Spirit Runes (the writing of Priests), Mana Glyphs (used by Wizards), Ancient (the language of the First Age), Arcaad (used in the early years of the Second Age), Ogham (used by Druids), and Scratching Tongue (the strange language of the Calabrim).

Letter	Mana Glyphs	Spirit Runes	Letter	Mana Glyphs	Spirit Runes
A	ℓ	𐀀	N	ℓ	𐀁
B	ℓ	𐀂	O	ℓ	𐀃

Acknowledgements and Thanks

With a game that has been going for as long as Labyrinthe, there are far too many people to thank for their hard work and effort, but a few stand out and we would like to thank them for their efforts over the years to keep the game running.

The previous GSM's; Jan, Iain Knope, Bruno, MCC and Phil for their hard work in keeping a game running and evolving.

Saint Tim Treadwell for his tireless work printing the books, and everything else, for Labyrinthe, and for keeping the lights on.

Each and every person that has ever Monstered, A-Reffed, Reffed, Desked, Armoured, Gophered or been a Taverner. Without all that effort things would have fallen apart years ago.

To the thousands of people that have put in points requests over the decades. Without the drive to break the system, the desire to build a "Folder C" and the cool ideas contained within them the system would never have evolved beyond the handbook that it started with.

Finally, as is fitting with the scout book a thank you to every monster that has been willing to spend 20 minutes setting the traps so we can laugh as the scout goes "But I don't do traps".

Duncan
