Introduction

You are holding an updated rule-book, which now contains the information to do with neuronics classes in the Labyrinth game system. It also contains the post 8th neuronics abilities available to the various neuronics races but the basic information for these is to be found in Evolution: Races. You will find that there are a number of changes from the previously published rules, which players who have neuronics using characters may need to be aware of. In general, these are improvements to the classes, such as extended post-8th buying options and similar, but in a few cases classes have lost certain buying options.

Focussed Power

In the Labyrinth game system, the physical world is not the only thing that has influence on the course of events. Magical feats performed with mana from the Dragons, and miracles enacted with spirits from higher powers, are the two most prevalent supernatural forces but they are not the only ones.

For convenience in understanding and standardising the workings of the system, we will consider other 'powers' under the umbrella title of **Focussed Powers**; the primary example of these is neuronics power but certain non-standard forms of power also fall into this area.

The distinguishing feature of focussed powers is that they are all some form of expression of will. The power does not come from 'elsewhere', there are no higher powers pleased with your acts who cause the desired effect, it is the strength of the individual and the 'laws of the universe' that dictate what works and what doesn't.

Focussed powers can be seen to be in a class sub-bracket of their own, which is not as 'full' as the standard class brackets; for example, it is possible to acquire some neuronics without entering the neuronics bracket. However, once a certain stage of development is reached the specialisation of study needed to continue means that the character is fully 'in the bracket'. For further discussion of class brackets see the notes in the Evolution: Classes book but, in short, this restriction means that characters who develop strong talents in a focussed power will not be able to multi-class to class types other than their own starting type.

The standard description of a focussed power ability should follow the below format:

Name

Power Range: *This may be self*

TBLP Cost: *This may be 0, but otherwise is considered 'casting damage'*

Concentration: *Time to use*

Activation: *Gestures or requirements*

Applicable Immunities

Description of Effect

So for neuronics powers, there is:

- A specified range:
- A tblp cost for use, (which can be reduced by neural foci),
- A concentration time, usually represented by the time taken to clearly name the effect, *e.g. say "Neuronic Penetration"*.
- And an applicable immunity, generally Immunity to Neuronics, if not other immunities as well.

There is no need to try to commit the above to memory, it is simply intended as a guide and format for standardising development.

Neuronics

Neuronic powers are those of the mind over other minds or even over reality. They are those powers which can also be described as **Psionic**. The majority of neuronics are concerned with influencing minds, although there are a limited number which impact directly on the physical world or inanimate objects.

It is possible for most classes and races to acquire a limited amount of neuronic power, represented by the **Passive** and **Active** neuronics trees. These represent the limit of neuronics that can be developed without entering the neuronic bracket. The exceptions to this are the races with innate neuronic power, who can develop this further without entering the neuronic bracket, however even they will never be able to acquire neuronics as powerful as those who commit themselves fully to neuronics by entering the bracket.

The use of any neuronic power requires the name of the effect to be clearly stated out-of-character, representing the necessary concentration to activate the ability. **No** words are spoken **in-character** and neuronics are generally considered to be **silent**. It will often be impossible to judge from where a neuronic power has originated. If the name is garbled or unclear, the neuronic fails to work and, if an offensive power, is suffered instead by the user.

It should be noted that it does **not** require **any** in-character movement, so neuronics can be performed when the user is unable to move or speak *e.g. paralysed or frozen*. They cannot be used if under the influence of sleep, catalepsy or similar.

Neuronic Armour Class [NAC]

There exists a particular type of defence, an armour class that applies against damaging neuronic attacks. NAC works by building up the mental defences of the character and thus NAC is rarely available to non-neuronicists.

Against damaging neuronic attacks NAC applies on a 1 for 1 basis.

Example: NAC 1 versus Neuronic Penetration

Without NAC a Neuronic Penetration does *6 TBLP and 6 pts to the head*.

NAC 1: $(6 - 1) = 5$ TBLP and
 $(6 - 1) = 5$ pts to the head.

In other circumstances where NAC would apply it would be treated the same as any other supernatural AC [MAC / SAC].

NAC applies before any other reductions much the same as MAC would against a magical bolt.

Neuronic Items

Neuronic Items require the character to have *Utilise Neuronic Item* as an ability before they can be used. The classes and races listed in this book all gain the ability automatically. Other classes and races will need to obtain the skill before such items can be employed.

Neuronic Classes

Neuronic Class Restrictions

- The classes are only able to wear Light Armour ever, with the exception of Silver Wardens.
- Most of these classes must be highly lawful. A neuronistic with this restriction who becomes non-lawful will go into a helplessly catatonic state and will lose all neuronic powers. It should be noted that attacking fellow adventurers is regarded as a chaotic act, unless in self defence. (Psi-Drowe, Awakeners, Psychers and Slayers excepted)
- Neuronics are a delicate matter and the user must have full control of their emotions to use them. As such if the user suffers any form of Fear, Emotion, or Insanity effect (beneficially or otherwise) they are unable to use neuronics until 5 minutes after it has faded. This does not apply to Psychers, Awakeners, Psi-Drowe and Slayers.
- All neuronists must keep their bodies pure as a sound mind requires a sound body. As such the only potions from which they may benefit are 6 point cures, and they may only drink twice their level's worth of these per adventure. In addition only their level's worth may be drunk in a period of 15 minutes (game time). If this is ever exceeded then their neuronic powers will fail permanently. If they drink other beneficial potions, or have them applied as balms, they receive no benefit as their system rejects the substance, and are left feeling faintly queasy for 15 minutes (no system penalties).
- They will not smoke, drink or eat to excess.

Neuronic Meditation

All Neuronic Classes may now automatically meditate in order to regain their 1st-8th standard class neuronics. This meditation follows normal rules for such and thus requires complete concentration in a stationary position. Used neuronics return at a rate of 3 tblp of casting cost (base unmodified) per 15 minutes.

Post-8th Level Development

They may select neuronic abilities from Table 6 immediately on reaching 8th level – these are listed later on.

Neuronic classes cannot buy from the normal Passive and Active trees, they instead have their own versions based on innates already owned.

Enhanced Mind Block

NOTE: It is not possible for *any* of the neuronic races or classes to possess the ability Enhanced Mind Block.

PSI-MASTER

The Psi-Master is a neuronically warrior. He uses mental power to supplement his physical ability and as such is a formidable opponent. A Psi-Master may be of any lawful alignment.
Psi Masters are always Human.

Life Points

Level	Total Body	Per Location	Dexterity AC
1	26	9	0
2	29	10	0
3	32	11	1
4	35	12	1
5	38	13	2
6	41	14	2
7	44	15	3
8	47	16	4

Skills and Abilities

Level	Weapon Skill	Ability
1	O & U skill	Detect Possible Neuronically Activity
2	H skill	Auric Colour x1/level
3	E skill	Reactions x1/2 levels Immunity to Bless/Curse (All forms)
4	B skill	Neuro Balance at will
5	-	Telekinesis x1/2 levels
6	MP skill	Mastery x1/level
7	Warrior Specialist	Neuronically Penetration x1/level Half Damage Incoming Neuronics
8	Warrior Specialist	Neuro-Mastery x1/4 levels

Maximum Armour Class is 8. May only wear Light Armour and may use any shield [U skill].

Post-8th Level Development

- Psi-Masters buy as 2nd Class Warrior Subclass
- Psi-Masters buy as Neuronically Subclass.
- They are considered to be in both the Neuronically and the Warrior bracket

Psi-Masters may skip some abilities on the active and passive neuronics trees and buy others at reduced cost due to already having limited innates of the ability. These tables replace the standard active and passive neuronics trees for Psi-Masters.

Active Neuronics Tree

Must be bought up in order:

Ability	Cost	Table	No. Uses
Auric Colour	25	1	At will
Artefact Study	100	1	At will
Neuro-Mastery	75	1	At will

Passive Neuronics Tree

Must be bought up in order:

Ability	Cost	Table	No. Uses
Message	60	1	At will
Mind Bar	100	1	At will
Detect Lie	80	1	At will
Detect Inanimate	80	1	At will
Detect Mind	60	1	At will

Telekinetic Buffer	110	10	2
Neuronic Cluster	50	10	2

SEER

The Seer is a neuronacist who uses mental powers for information gathering and detection. Their powers are subtle and rarely suitable for combat, but they have a powerful capacity for knowledge. Seers are always Human and lawful.

Life Points

Level	Total Body	Per Location
1	25	8
2	27	9
3	29	10
4	31	11
5	33	12
6	35	13
7	37	14
8	39	15

Skills and Abilities

Level	Weapon Skill	Ability
1	O skill in Dagger only	Auric Colour at will Detect Possible Neuronc Activity
2		Clairvoyance x1/level
3		Artefact Study at will Message at will Immunity to Bless/Curse (All forms)
4		Precognition x1/2 levels
5		Detect Lie at will
6		Neuronc Penetration x1/level
7		Improved Message at will Psi-Scan x1/level Half Damage Incoming Neuronics
8		Probe x1/4 levels Major Precognition x1/4 levels

Maximum Armour Class is 7. Seers may only ever wear up to Light Armour and may not use a shield.

Post-8th Level Development

- Seers are limited to abilities available to Neuronc Classes.
- They may not acquire strength, as per Wizard.

Seers may skip some abilities on the active and passive neuronics trees, and buy others at reduced cost due to already having limited innates of the ability. These tables replace the standard active and passive neuronics trees for Seers.

Active Neuronics Tree

Must be bought up in order:

Ability	Cost	Table	No. Uses
Neuro Balance	100	1	At will
Neuro-Mastery	150	1	At will

Passive Neuronics Tree

Must be bought up in order:

Ability	Cost	Table	No. Uses
Mind Bar	100	1	At will
Detect Inanimate	50	1	At will
Detect Mind	30	1	At will

Seer Advanced Neuronics

These need not be bought in order, but can instead be bought as and when desired.

Ability	Cost	Table	No. Uses
Auric Sight	30	1	∞

Neuro-Planar Vortex	180	10	2

MYSTIC

This form of neuronacist specialises in destructive and violent neuronic abilities. They use only a dagger in one hand, not thrown, relying on their minds to overcome their foes. Mystics are always Human and lawful.

Life Points

Level	Total Body	Per Location
1	25	8
2	27	9
3	29	10
4	31	11
5	33	12
6	35	13
7	37	14
8	39	15

Level	Weapon Skill	Ability
1	O skill in Dagger only	Neuronic Penetration x2/level
2		Auric Colour x1/level
3		Detect Possible Neuronic Activity Immunity to Bless/Curse (All forms)
4		Neuronic Flash x1/level
5		Neuronic Whip x1/3 levels
6		Neuronic Flare x1/2 levels
7		Neuronic Blast x1/2 levels Half Damage Incoming Neuronics
8		Domination x1/4 levels

A Mystic's maximum AC is 7. They may only ever wear up to light armour and may not use a shield.

Post-8th Level Development

Mystics are limited to abilities available to Neuronic Classes. They may not acquire strength, as per Wizard.

* = Mystics may not have more Neuronic Blasts than Neuronic Penetrations, more Bolts than Blasts, nor more Disruptions than Bolts.

Active Neuronics Tree (Must be bought up in order)

Ability	Cost	Table	No. Uses
Auric Colour	25	1	At will

Mental Destruction	150	11	1

SILVER WARDEN

Silver Wardens are Human followers of the warrior Kaleth. Though Kaleth herself reputedly died in her final act of destruction against the Silver Folk Queen, her followers united to continue to fight what traces of the Silver Folk remain. Silver Wardens hunt the Silver Folk without mercy. At this time the Sterility Toxin released during the war between their Mistress and the Silver Folk remains here on Primus. Any Silver Folk who come here are infected and, as such, will not be allowed to return to their families. This makes them dangerous. See Silver Folk race in Evolution: Races for further details. Silver Wardens try to maintain a calm outlook, staying observant, always hunting for traces of the foe, always seeking a chance to strike a blow against those who would steal this land. Silver Wardens must be Human and lawful. In fact, they follow all the neuronics class restrictions listed above. However they suffer no penalties for attacking Silver Folk, even when not in self-defence. Their neuronics talent has been directed towards techniques to better allow them to hunt the Silver Folk.

Life Points

Level	Total Body	Per Location
1	27	9
2	31	11
3	35	12
4	39	13
5	43	15
6	47	16
7	51	17
8	55	18

Skills and Abilities

Level	Weapon Skill	Ability
1	O & U skill	Detect Possible Neuronics Activity
2	H skill	Locational DPNA x1/2 levels
3	E skill	Auric Colour at will. Neuronics Penetration x1/2 levels Immunity to Bless/Curse (All forms)
4	B skill	Psi-Scan x1/2 levels
5	-	Mind Bar at will
6	MP skill	Detect Lie x1/2 levels
7	Warrior Specialist	6 th Sense Half Damage Incoming Neuronics
8	Warrior Specialist	Psychic Cage x1/day

The maximum AC of a Silver Warden is 8. They may use any form of armour, and use any shield. Their most common choice of weapon is the sword, in honour of Kaleth, but they are capable of learning a wide range of weapon techniques to better deal with their foes.

When a Silver Warden uses Detect Possible Neuronics Activity he is additionally aware whether there is any Silver Folk neuronics activity within the area of effect. .

Post-8th Level Development

Silver Wardens progress as per Warrior Subclass and as a Psi-Master for neuronics abilities. They are considered to be in both the Neuronics and the Warrior bracket.

Active Neuronics Tree

Must be bought up in order:

Ability	Cost	Table	No. Uses
Neuro Balance	80	1	At will
Artefact Study	100	1	At will
Neuro-Mastery	150	1	At will

Passive Neuronics Tree

Must be bought up in order:

Ability	Cost	Table	No. Uses
Message	60	1	At will
Detect Lie	50	1	At will
Detect Inanimate	100	1	At will
Detect Mind	60	1	At will

Silver Warden Advanced Neuronics

These need not be bought in order, but can instead be bought as and when desired.

Ability	Cost	Table	No. Uses
Locational DPNA	15	1	∞
Neuronic Penetration	15	1	8
Psi-Scan	60	1	∞
Mastery	25	1	∞
Adrenaline Rush	30	1	∞
Inertia Shield	30	1	∞
Reactions	35	1	∞
Psychic Cage	50	1	∞
Chameleon	30	1	4
Neuronic Leap	20	2	4
Neuronic Competence	30	2	2
Speed of Thought	40	3	At will
Neuronic Flash	40	7	4
Precognition	40	7	4
Psychic Spy	40	7	2
Intellect Fortress	40	7	4
Reflective Thought	40	7	3
Neuro-Synaptic Jump	60	8	∞
Clairvoyance	25	8	6
Forget	40	8	4

Fumble	40	8	2
Telekinesis	100	8	At will
Improved Message	100	8	At will
Invisibility	200	8	At will
Probe	120	8	At will
Neuronic Wall	150	8	At will
Shadowed Mind	40	8	3
Neural Purge	60	8	2
Precognitive Flash	50	9	1
Psychic Link	55	9	2
Displacement	75	9	2
Mind Over Body	65	9	2
Translocation	90	9	3
Mental Expansion	90	9	2
Seventh Sense	100	10	At will
Neuro-Planar Jump	110	10	3
Neuro-Planar Vortex	160	10	3
Neuronic Cluster	50	10	1

PSIONIC-DROWE

The Psionic Drowe is a racial throwback to the days when Drowe were all naturally neuronics. Their neuronics powers have been developed at the cost of all other abilities. One of the characteristics of these creatures is their obviously underdeveloped physical condition, even for a Drowe.

Psionic Drowe have handbook Drowe innates and abilities. Psionic Drowe have the standard restrictions on potion consumption, additionally, they may eat as many lembas as they may drink cure potions. However they have no restriction on the number of lembas that may be eaten in a 15 minute period.

Life Points

Level	Total Body	Per Location
1	22	7
2	23	7
3	24	7
4	25	8
5	26	8
6	27	8
7	28	9
8	29	9

Skills and Abilities

Level	Weapon Skill	Ability
1	O Skill in Dagger Only	Auric Colour at will
2		Neuronic Penetration x2/level
3		Neuro Balance at will
4		Mind Bar at will
5		Neuronic Flash x1/level
6		Artefact Study at will
7		Neuro Mastery at will
8		Neuro-Synaptic Jump x1/2 levels

The maximum AC of a Psionic Drowe is 6. They may not wear armour above Light Armour and cannot use a shield.

Post-8th Level Development:

- Psionic Drowe as a class buy from the tables contained in this book.
- They may not acquire strength.
- It costs double the normal cost for a Psionic Drowe to double his racial innates, as they are not pure Drowe.

Active Neuronics Tree

Psionic Drowe gain all the active neuronics tree abilities by 8th level.

Passive Neuronics Tree

Must be bought up in order:

Ability	Cost	Table	No. Uses
Message	40	1	At will
Detect Possible Neuronic Activity	40	1	At will
Detect Lie	50	1	At will
Detect Inanimate	65	1	At will
Detect Mind	50	1	At will

Psionic Drowe Advanced Neuronics

These need not be bought in order but can instead be bought as and when desired.

Ability	Cost	Table	No. Uses

Neuronic Terror	90	10	2
Neuronic Cluster	50	10	2
Purity of Mind	100	10+1st-class	2

MIND WEAVER

Mind Weavers must be Elysian and lawful in outlook. Elysians' talent for mental powers has led some to specialise in this area. This class follows all the restrictions and benefits listed elsewhere in this supplement, including potion limitations, alignment, etc. They gain the following abilities by level:

Life Points

Level	Total Body	Per Location
1	22	7
2	23	7
3	24	7
4	25	8
5	26	8
6	27	8
7	28	9
8	29	9

Skills and Abilities

Level	Weapon Skill	Ability
1		Psi-Scan at will
2		Clairvoyance x1/level
3		Detect Lie at will
4		Neuronic Flashx1/2 levels Artefact Study at will
5		Precognition x1/2 levels
6		Neuro-Mastery x1/2 levels
7		Racial Telepathy upgraded to at will Forget x1/4 levels Half Damage Incoming Neuronics
8		Neuro-Synaptic Jump x1/4levels Improved Telepathy x1/4 levels

Mind Weavers have a maximum AC of 6 and may wear only wear Light Armour, with many eschewing even this, finding the trappings of warfare upsetting. They have no weapon skills at all.

Post-8th Level Development:

- Mind Weavers may only buy abilities available to all and those neuronic abilities listed later in this book.

Mind Weavers may skip some abilities on the active and passive neuronics trees, and buy others at reduced cost due to already having limited innates of the ability. These tables replace the standard active and passive neuronics trees for Mind Weavers.

Active Neuronics Tree

Must be bought up in order:

Ability	Cost	Table	No. Uses
Auric Colour	30	1	At will
Neuro Balance	100	1	At will
Neuro-Mastery	75	1	At will

Passive Neuronics Tree

Must be bought up in order:

Ability	Cost	Table	No. Uses
Detect Possible Neuronic Activity	40	1	At will
Mind Bar	100	1	At will
Detect Inanimate	50	1	At will
Detect Mind	30	1	At will

Mind Weaver Advanced Neuronics

These need not be bought in order, but can instead be bought as and when desired.

Ability	Cost	Table	No. Uses
Clairvoyance	20	1	∞
Auric Sight	30	1	∞
Neuronic Flash	35	1	∞
Precognition	30	1	∞
Forget	20	1	∞
Improved Telepathy	50	1	At will
Major Precognition	80	1	∞
Invisibility	150	1	At will
Neuronic Competence	25	2	3

Neuro-Planar Vortex	160	10	2
Deep Probe	100	10	2
Purity of Mind	100	10+1st-class	2

AWAKENER

Awakeners can be either Human or Farfolk. All Farfolk learn some weapons use from an early age. However, their strength of mind and natural talent in that area leads a few in each Reed to concentrate mainly on focussing their mental techniques to aid the Reed. These Awakeners are often called upon to act as guides for their Reed, and expected to *know* the right course of action, through their greater awareness and intuition.

The Awakener tunes themselves in almost subconsciously into the mental structure of the world around them. Some are known to talk to trees and rocks, some listen to the wind blowing through the air, others assume animalistic behaviour and seem to gather their strength by imagining the powers they require are gained by absorbing the purported best attributes of those creatures. Though many of the foci they apply in the use of their powers have no minds, and as such could not really be answering their calls, the Awakeners are called as such because, to a layman, they appear to awaken the world around them.

In some ways this is a deeply “spiritual” profession, not as a religion, but in its approach to life.

There is a common fear among Awakeners that they one day might stay in the mental frame of a tree, or the wind or as some hunting beast, and as such avoid acting in such a fashion except when using their powers.

Human Awakeners have developed over time and while they view the gifts they have in a less spiritual and more martial manner they are none the less in tune with the world. Human Awakeners gain life as per Farfolk.

Unlike most neuronics classes they do not suffer emotion restrictions, nor are they required to be lawful. Indeed the only restrictions they have are with regards to potions and armour use.

Awakeners gain the following powers by level:

Life Points

Level	Total Body	Per Location
1	23	7
2	25	8
3	27	9
4	29	10
5	31	11
6	33	12
7	35	13
8	37	14

Skills and Abilities

Level	Weapon Skill	Scout Ability	Neuronic Ability
1	O		Detect Possible Neuronic Activity at will
2		Rec Neuronics	Neuronic Penetration x1/level
3	E	Standard Skill	Psychic Guide at will
4	H		Artefact Study at will*
5		Standard Skill	Precognition x1/4 levels
6			Detect Lie x1/2 levels
7		Standard Skill	Detect Mind at will
8	Specialist		Neuronic Invisibility x1/4 levels

An Awakeners maximum armour class is 7. They may only ever wear Light Armour and cannot use a shield without buying the ability post 8th.

The Pathfinder Standard Skills available are listed in “At the Sharp End”, however they may never acquire Read Glyphs, Read Languages, Rec Mana or Rec Spirit.

They may select their Weapon Specialist skill from the below list:

- Auric Colour at will
- +1 Dexterity AC
- +1 Mastery in an O-class or H-class weapon

When using Artefact Study an Awakener may choose to speak instead to the area around him for the duration. This costs double the casting damage before neural foci are applied, but awakens the consciousness of *all* objects within 10’ of him, and he may speak with any of them as long as he remains in the area, for the 5 minute duration. Should he leave the vicinity the ability lapses.

They are *not* limited as per standard neuronics classes, nor do they benefit as such; the only exception is in the matter of neuronics class potion restrictions, however due to their *race’s* facility with such and their use as the preferred form of curing, Farfolk Awakeners’ limit on maximum potion usage applies to any form of healing potion, not only 6pt cures. At 8th level an Awakener may benefit from at most 16 healing potions per day, but these may be 2pt loc cures, 18pt TBLP cures, or any other sort. Human (and any other non-Farfolk Awakener) have potion limits of normal 6pt cures.

Post-8th Level Development

Awakeners may acquire abilities available to Pathfinders, but they will not learn the ability to make anything. They can also acquire certain neuronics abilities. They are considered to be in both the Scout and the Neuronics class brackets. As a scout subclass they may learn ‘Tendencies’ as listed in ‘At the Sharp End’.

Awakeners may skip some abilities on the active and passive neuronics trees, and buy others at reduced cost due to already having limited innates of the ability. These tables replace the standard active and passive neuronics trees for Awakeners.

Active Neuronics Tree

Must be bought up in order:

Ability	Cost	Table	No. Uses
Auric Colour	40	1	At will
Neuro Balance	100	1	At will
Neuro-Mastery	75	1	At will

Passive Neuronics Tree

Must be bought up in order:

Ability	Cost	Table	No. Uses
Message	50	1	At will
Detect Lie	50	1	At will
Detect Inanimate	50	1	At will

Awakener Advanced Neuronics

These need not be bought in order, but can instead be bought as and when desired.

Neuro-Planar Vortex	180	11	2
Purity of Mind	100	10+1st-class	2

PSYCHER

This class is restricted to Silver Folk only.

All Silver Folk are naturally adept in the use of mental powers, through long centuries of heredity and forced enhancement by their rulers. Few, however, devote themselves solely to the focus of the mind, since most Silver Folk sate their desire for slaughter and pain from an early age with weapons training. Those elite few who have the self-discipline to restrict themselves to the ways of mental power are rewarded with a subtler and more potent form of death-bringing.

Psychers need not be Lawful in alignment, nor have they the restriction regarding emotion as do most neuronics classes. However, they *do* suffer identical restrictions regarding the use of potions (see neuronics class restrictions above).

Life Points

Level	Total Body	Per Location
1	23	7
2	24	7
3	25	8
4	26	8
5	27	9
6	28	9
7	29	10
8	30	10

Level	Weapon Skill	Ability
1	O in dagger only	Neuronic Penetration x2/level.
2		Auric Colour at will.
3		Detect Possible Neuronic Activity at will Locational Detect Possible Neuronic Activity at will.
4		Neuronic Whip x1/2 levels.
5		Neuronic Flare x1/2 levels.
6		Mind Bar x1/2 levels; Message x1/level.
7		Neuronic Blast x1/2 levels.
8		Domination x1/4 levels.

A Psyker's maximum AC is 6. They may only ever wear Light Armour and use a dagger. They may not use shields.

Post-8th Level Development

- Psychers may not acquire strength as per Wizard.
- Psychers are limited to abilities available to neuronics classes.
- Psychers may skip some abilities on the active and passive neuronics trees, and buy others at reduced cost due to already having limited innates of the ability. These tables replace the standard active and passive neuronics trees for Psychers.

Active Neuronics Tree

Must be bought up in order:

Ability	Cost	Table	No. Uses
Neuro Balance	100	1	At will
Artefact Study	100	1	At will
Neuro-Mastery	150	1	At will

Passive Neuronics Tree

Must be bought up in order:

Neurone Death	100	10+1st-class	1
Purity of Mind	100	10+1st-class	2

SLAYER

This class is restricted to Silver Folk characters.

Silver Folk are very destructive and malign by nature, so it comes as no surprise to discover that some of their race seek to combine their race's natural talent for mental harm with a martial path.

Silver Folk Slayers need not be Lawful in alignment, nor have they the restriction regarding emotion as do most neuronics classes. However, they *do* suffer identical restrictions regarding the use of potions (see neuronics class restrictions above).

Life Points

Level	Total Body	Per Location	Dexterity AC
1	25	8	0
2	28	9	0
3	30	10	1
4	33	11	1
5	35	12	2
6	38	13	2
7	40	14	3
8	43	15	3

Skills and Abilities

Level	Weapon Skill	Ability
1	O & U skill	Auric Colour x1/level
2	H skill	Neuronic Penetration x1/level
3	E skill	Reactions x1/2 levels
4	B skill	-
5	-	Mastery x1/2 levels
6	MP skill	Disorientation x1/2 levels
7	Warrior Specialist	-
8	Warrior Specialist	Neuro-Mastery x1/4 levels

A Slayer's maximum armour class is 8. A Slayer may only ever wear Light Armour. All their neuronics are in addition to those possessed by all Silver Folk. They may use any shield.

Post-8th Level Development

Slayers may buy abilities available to 2nd class Warrior subclasses. They are considered to be in both the Neuronic and the Warrior bracket. They may buy neuronics abilities as listed in this rule-book.

Slayers may skip some abilities on the active and passive neuronics trees, and buy others at reduced cost due to already having limited innates of the ability. These tables replace the standard active and passive neuronics trees for Slayers.

Active Neuronics Tree

Must be bought up in order:

Ability	Cost	Table	No. Uses
Auric Colour	25	1	At will
Neuro Balance	80	1	At will
Artefact Study	100	1	At will
Neuro-Mastery	75	1	At will

Neuronic Cluster	50	10	1

Neuronic Shards and Crystals

The rules pertaining to the manufacture of Neuronic Shards and Crystals have been updated and are included here for clarity. All standard Neuronic Bracket characters gain the ability to make shards and crystals at 8th level UNLESS they have a make restriction (e.g. Awakeners). This does not, however, apply to Psi-Scouts.

A character can choose to either attempt to craft Focussing Crystals or Shards of neuronic power with their weekly make slot. They cannot mix and match these. Their powers are detailed below.

Neuronic Shards are once ever innates of the bound neuronic power, in a similar manner to scrolls.

These are not considered to be items for the relevant restrictions but could be considered to be wealth.

When creating a Shard of neuronic power it must be one that the character gains from 1st to 8th level or forms part of the Active or Passive Trees. Obviously the character must have an innate of the power or the ability to use it 'at will' to bind it. The Shard may only contain a single neuronic innate.

The character has a 70% chance of success at crafting each Shard, they cost 100 Grulls per tble cost of the innate being bound. A character can attempt to bind 2000 Grulls in a single make OR create a single Shard if it would cost more than 2000 Grulls to make.

Shards are phys repped by a small crystal or glass gem. To activate them the person must hold the gem and declare the effect clearly (as with all neuronics) suffering the life cost as normal. Utilise Neuronic Item is required to use a Neuronic Shard.

Focussing Crystals are slightly different. They are once ever items and count as items for relevant restrictions. When they are triggered they grant the user two additional Neural Foci (as per the post 8th ability) for the day. These stack with purchased Foci and the Neuronic Focus ability but not with Foci gained from items or themselves. The utilising character must possess the ability to use neuronic items to employ them.

Each attempt to make a Focussing Crystal costs 250 Grulls and has a 70% chance of success. A character may attempt to make up to eight in a single week.

Active/Passive Neuronic Trees

Characters that are not barred from learning neuronics as a result of either their class or race may purchase the active and/or passive neuronic trees. These are on Table 6 post 8th and so the character must be at least 600 points to purchase them.

These abilities must be learnt in order- you cannot skip any on the way, unless noted.

ABILITY (Active Neuronics)	Points
Auric Colour (at will)	50
Neuronic Penetration	Special
Neuro Balance (at will)	100
Artefact Study (at will)	100
Neuro Mastery (at will)	150

This is the maximum level in Active Neuronics for non-neuronic characters.

Special: Neuronic Penetration: 50 points plus 10 points per Neuronic Penetration per day (max. = 10) It is possible to just pay the 50pts and move on to the next ability.

ABILITY (Passive Neuronics - All at will)	Points
Message	100
Detect Possible Neuronic Activity	80
Mind Bar	100
Detect Lie	100
Detect Inanimate	100
Detect Mind	100

This is the maximum level in Passive Neuronics for non-neuronic characters.

Standard Neuronic Abilities

These are those abilities that can be acquired from the **Active** and **Passive** neuronics trees.

Detect Possible Neuronic Activity	
Range: 60' radius	TBLP: 1
Duration: Instant	Immunities: Neuronic Informational FX
The user can sense whether there is any source of neuronic power within 60'. They are not aware of the location, or how many such sources there are; only a Yes or No answer is received	

Auric Colour	
Range: 20'	TBLP: 1
Duration: Instant	Immunities: Neuronic Informational FX
This allows the user to recognise the colour of the mental aura of one target within range. In game terms, this means that those of Goodly alignment are seen to have a White aura, those of Neutral a Grey aura, and Evil a Black aura. Targets immune to neuronic informational effects, or all neuronics, or that simply have no mind, such as inanimate objects, have <i>no</i> aura at all. It is possible by training to conceal the colour of one's aura so that only a clear aura can be seen – this is <i>not</i> the same as having no aura.	

Neuronic Penetration	
Range: 20'	TBLP: 3
Duration: Instant	Immunities:
The target of this mental attack suffers a sudden sharp pain to the head, causing 6 tblp of damage and 6 points to the head location (2 Hits to monsters). Resistances to neuronics reduce this damage, and Neuronic Armour Class may be applied, but no other form of AC.	

Detect Mind	
Range: 60'	TBLP: 3
Duration: Instant	Immunities: Neuronic Informational FX
The user is instantly aware of how many other minds are within range. This ability does not give location, but does give numbers	

Message	
Range: 60' or line-of-sight	TBLP: 6
Duration: Instant	Immunities:
One target within line-of-sight, or within 60' and known to the user, receives a telepathic message of up to one reasonable sentence in length (at most 20 words, all one sentence only).	

Mind Bar	
Range: Self	TBLP: 6
Duration: 5 Minutes Maximum	Immunities:
Renders the user actively immune to all neuronic effects and attacks. During this time the caster cannot use any neuronic ability, although they may choose to release the Mind Bar.	

Neuro Balance	
Range: Self	TBLP: 6
Duration: 5 Minutes	Immunities:
This gives the user perfect balance for the duration, granting them stability and so immunity to knockdowns and earth tremors. It also allows the user to balance on any object which will support their weight, for example walking along a tightrope, or similar feats of balance. Note this no longer allows you to open locks.	

Artefact Study	
Range: Touch	TBLP: 6
Duration: 5 Minutes	Immunities: Neuronic Informational FX
This allows the user to wake a certain sentience in any inanimate object (including liquids). The user may converse with the target object for the duration while touching it. Supernatural objects, including those with minds, may answer as they see fit, while normal objects must tell the truth only. It should be noted that often an object will not know much of its surroundings or events occurring – they have no sensory apparatus! However, supernatural objects will often (at the ref's discretion) be aware of events relating to them.	

Detect Inanimate	
Range: 20' radius	TBLP: 9
Duration: 10 Seconds/ Instant	Immunities: Neuronic Informational FX
The user must concentrate on a single type of object for 10 seconds, after which he senses the location of all such objects within range. Only physical properties of objects can be detected (so 'swords' but not 'magic swords' could be found). Potion types can be distinguished between with this ability.	

Detect Lie	
Range: Hearing	TBLP: 9
Duration: 5 Minutes	Immunities: Neuronic Informational FX
For the duration, the user is aware whether any statements he hears the target make are lies.	

Neuro-Mastery	
Range: Self	TBLP: 9
Duration: 5 Minutes	Immunities:
This ability has parallels with the magical spells of 'Walk On...' and 'Walk through...' elements. It can be used in the following ways: Walk on Darkness: As long as the light is at most weak candlelight, the user may 'fly' as per the walk on darkness spell. Walk through Darkness: Half effect from darkness-based attacks. Walk on Air: The user may 'fly' as per the walk on air spell. Walk through Air: Half effect from air attacks, including electrical. Walk on Water: The caster may walk on water as if it were solid ground. Walk through Water: The caster may breathe underwater. Note: Either version of Neuro-Mastery Water grants the user ½ effect potions, poisons, and acid for the duration. Walk on Light: The user may 'fly' as per a walk on light spell, as long as the light is at least strong candlelight. Walk through Light: Half effect from light-based attacks. Walk on Earth: The user may walk on walls, floors, ceilings, mud, quicksand, as if it were solid, level ground. Walk through Earth: The user may walk through any stone or earth wall of not more than 10' in thickness. This is as the Passwall glyph (Brown 4 mana). Walls thicker than this cannot be entered. Walk through Fire: Half effect fire-based attacks. The Walk Through abilities above will stack with resistances to such attacks acquired post-8th, though they will not stack with other temporary defences (e.g. Walk through Fire Spell, or the Resist Fire evocation). Only one Neuro-Mastery may be active at a time.	

Specialist Neuronic Abilities

These skills are only available to neuronic races or classes, either as one of their 1st to 8th skills or as a post 8th purchase.

Adrenaline Rush	
Range: Self	TBLP: 9
Duration: 5 Minutes	Immunities:
Grants the user +1 strength, which may exceed normal limits (max +3). It does not stack with itself, nor with abilities such as Adrenal Surge or Burst of Strength.	

Auric Sight	
Range: Self / 20'	TBLP: 6
Duration: 5 Minutes	Immunities: Neuronic Informational FX
The user can see the auric colour and size of all minds within 20', for the duration. Auric size is judged in a similar way to Spirit of Seeing – targets of 1 st /2 nd level are small, 3 rd /4 th medium, 5 th /6 th large and 7 th + level targets are deemed huge. This ability can be used in the dark, but not through solid objects.	

Blade of the Mind's Eye	
Range: Self	TBLP: 36
Duration: 5 minutes	Immunities:
Conjures a weapon formed of pure mental power. The sword inflicts Neuronic Dart by blow. It cannot normally be used while in a purity of mind as it is a weapon.	

Clairvoyance	
Range: 40'	TBLP: 3
Duration: Instant / 2 seconds	Immunities:
Allows the caster to take a 2 second glance at any point within 40', whether through solid walls, behind closed doors, etc. It does not provide a light source.	

Cloud the Mind	
Range: Self	TBLP: 24
Duration: 5 minutes	Immunities: See Notes
The user clouds the minds of those that engage them in combat causing the user to become a blur. This causes opponents to lose their masteries in a similar manner to a Bedazzle. Enhanced Perception grants immunity, as does Weapon Master or similar.	

Chameleon	
Range: Self	TBLP: 12
Duration: 5 minutes	Immunities:
The skill allows the neuronicist to alter his physical appearance such that he gains the benefits of a <i>Chameleon</i> , as per the 3mp grey spell. Since the user is altering himself, those unaffected by neuronics still cannot see the user.	

Deep Probe	
Range: 20'	TBLP: 24
Duration: 5 Minutes	Immunities: Neuronic Informational FX
The use of this ability requires 30 seconds uninterrupted concentration while in sight of the target. Once activated, the user is able to predict the actions of the target with ease. They are granted the benefits of a Know Foe spell against the target – effectively they become immune to any attack from the target other than basic melee attacks. They are considered to have dodged with perfect facility any other attack, or otherwise have countered it.	

Detonate	
Range: 20'	TBLP: 9 / 3
Duration: Instant	Immunities:
Causes one normal object of less than 27 cubic feet to explode apart, in a way similar to a <i>Shatter</i> spell. If used at range it costs 9 TBLP, if by touch only 3 TBLP.	

Disorientation	
Range: 20'	TBLP: 6
Duration: 5 Minutes	Immunities: Stability
The target's balance and orientation are interfered with, such that they have trouble moving as they are used to unless they have Stability. They suffer -2 DAC for the duration, which cannot reduce DAC below 0. This ability is not cumulative with itself but will stack with abilities such as Curse.	

Displacement	
Range: 20'	TBLP: 12
Duration: Instant	Immunities:
One target object weighing no more than 14lbs is transported instantly from any point within range to any other point within range. The user must be able to see the object or know its <i>exact</i> location. Objects cannot be made to appear within solid objects. Any object can be so affected, except animate or living ones, or those that weight too much. The referee's decision as to the weight of 'phys-repped' objects such as latex props and so forth is final, but it should be noted that normal weapons will generally be well within the weight-limit.	

Domination	
Range: 3' initially	TBLP: 15
Duration: 5 Minutes	Immunities: Spiritual Mastery
The user dominates the target's mind with their own, forcing them to obey. The target must obey all commands from the user except suicidal ones. However this attack is level-based, and only affects targets with a resistance level to neuronics of less than the user's own level (i.e. will affect a 7 th level target if used by an 8 th level character).	

Forget	
Range: Line-of-sight	TBLP: 9
Duration: Instant	Immunities: Forget
One target forgets everything that has occurred in the last 30 seconds. This memory loss is permanent.	

Fumble	
Range: 20'	TBLP: 9
Duration: Instant	Immunities: Fumble FX
Sends a spasm through the target's system, causing them to drop any currently held objects. They may pick them up again.	

Glimpse of Danger	
Range: Self	TBLP: 12
Duration: 3 hours	Immunities:
Grants the user 12 points of combat wary against the next weapon blow to strike during the duration.	

Greater Clairvoyance	
Range: 40' initially	TBLP: 12
Duration: 5 Minutes	Immunities:
Functions as per Clairvoyance, allowing the user to cast their vision forward. However with Greater Clairvoyance the vision lasts up to 5 minutes, during which time the observation point may be moved around at a slow walking pace. During this time the user may do nothing but speak or move slowly; if they receive damage the ability is negated.	

Greater Forget	
Range: 20'	TBLP: 36
Duration: 1 minute	Immunities: Forget
Target becomes unable to recall the words required to enact spells/miracles/etc. As such they are unable to use any form of casting that requires verbals.	

Greater Telekinesis	
Range: 20'	TBLP: 12
Duration: 5 Minutes	Immunities:
Works in the same way as Telekinesis, allowing the user to move one object around within range. However the force is much stronger, allowing the user to exert two grades of strength on the object. It may be used to move creatures giving no resistance – either willing or unconscious/dead only.	

Improved Message	
Range: Unlimited	TBLP: 12
Duration: Instant	Immunities:
One target known to the user or in sight of them receives a telepathic message of up to one reasonable sentence in length (at most 20 words, all one sentence only). This message will span any distance, even plane-to-plane.	

Improved Telepathy	
Range: Unlimited	TBLP: 12
Duration: Instant	Immunities:
One target known to the user or in sight of them receives a telepathic message as per Improved Message above. This message will span any distance, even plane-to-plane. After the message the recipient is <i>Psi-Scanned</i> , effectively allowing them to reply.	

Inertia Barrier	
Range: Self	TBLP: 24
Duration: 5 Minutes	Immunities:
The user is surrounded by a shimmering bubble, barely visible to the normal eye. This barrier turns all physical objects away, and is completely impenetrable to anything with a physical component, including creatures. However, while active the user may do nothing but speak or move at a slow walking speed. It does not allow the user to push past people or push people or monsters out of the way.	

Inertia Shield	
Range: Self	TBLP: 9
Duration: 5 Minutes	Immunities:
The air around the user thickens imperceptibly, granting them resistance to physical injury. For the duration they gain +6 PAC.	

Intellect Fortress	
Range: Self	TBLP: 15
Duration: 5 Minutes	Immunities:
The user retreats within themselves, erecting strong mental barriers against assault. For the duration, they gain an additional 6 Neuronic AC, but may not use non-self neuronic abilities. They also gain +1 resistance level for resisting neuronic level-based effects. More insidious neuronic powers which do not directly inflict damage, such as Psychic Crush, are not prevented by the use of this ability.	

Intestinal Fortitude	
Range: Self	TBLP: 24+6 per 15 seconds
Duration: Max 1 minute.	Immunities:
The user's locations will continue to function regardless of the amount of damage they have suffered, unless severed. This cannot be triggered if a person is already unconscious due to damage.	

Invisibility	
Range: Line-of-sight	TBLP: 15
Duration: 60 seconds	Immunities:
The user renders themselves totally undetectable to normal physical sight to one creature only. This invisibility is not broken by attacking, but whilst active the user may not use other neuronic powers without breaking the Invisibility. Creatures with Perception can see the user as normal and they also still make noise, smell etc.	

Locational Detect Possible Neuronic Activity	
Range: 60' radius	TBLP: 3
Duration: Instant	Immunities: Neuronic Informational FX
The user is aware of all sources of neuronic power within the area; they know exactly where they are, in a manner similar to Detect Magic.	

Major Precognition	
Range: Self/Unlimited	TBLP: 18
Duration: 2 Minutes /3 Questions	Immunities: Neuronic Informational FX
Allows the caster to seek the answer to three questions. These answers can each be up to 7 words in length, and will generally seek to be helpful as it is the caster's own mind and intuition that is gaining them. Questions about creatures which are specifically immune to neuronics (as opposed to those that are simply mindless) will not be answered, and things with no physical or neuronic aspect to them (such as purely spiritual creatures) will only have questions answered if a creature with a mind knows the answers. To prepare the user must sit peacefully and undisturbed for 2 minutes, after which time the questions are deemed to be instantly answered.	

Mastery	
Range: Self	TBLP: 6
Duration: 5 Minutes	Immunities:
Grants the user one weapon mastery (+1 damage grade) in one weapon-type for the duration. Once 8 th level is reached, this weapon mastery will stack with weapon masteries acquired from other sources. It will not stack with itself.	

Memory Death	
Range: 10'	TBLP: 12
Duration: One Hour	Immunities: Level Drain
The target's level of resistance is reduced by 2 for duration. If they reach 0 then they die.	

Mental Destruction	
Range: 10'	TBLP: 48
Duration: Instant	Immunities:
In a similar manner to Neuronic Penetration, this attack inflicts 60 tblp and 60 loc damage to the head of the target (20 hits to monsters). Costs a level to use. This is usable at most once every five minutes.	

Mental Expansion	
Range: Self	TBLP: 12
Duration: Special	Immunities:
This neuronic ability allows the user to cause a temporary, published neuronic durational ability with a duration of at least 5 minutes to last for longer. This ability is called and used when the ability to be 'expanded' is running out. The duration may be continued for blocks of 5 minutes costing the base tblp cost of the expanded ability with each 5 minutes of renewal. Neural Foci and other damage reducing skills may be applied to this tblp cost. No duration may be expanded beyond 3 times its original duration. In addition constant mental concentration is required to maintain this expanded effect and it is broken should the Neuronicist use any other mental / psionic / neuronic talents.	

Mind Over Body	
Range: Self	TBLP: 18
Duration: 5 Minutes	Immunities:
By use of this discipline the neuronicist is able to completely halt his bodily processes, temporarily. His breathing is halted, his blood stops flowing and so on. For the duration his body and life are sustained only by the strength of his will. During this time, he becomes completely immune to flesh-and-blood effects except at ref's discretion (e.g. a <i>Bonebreak</i> would still work as the user still <i>has</i> bones), and also feels no pain at all, becoming completely immune to pain effects. However, the stresses placed on the system by use of this ability are great, and the body must be allowed to restore its natural rhythm in between uses so it cannot be used more than once without at least an hour between uses.	

Mind Shield	
Range: Self	TBLP: 18
Duration: Instant	Immunities:
The neuronicist must have Mind Bar from the Passive Tree before learning this. Must be used within 2 seconds of an incoming neuronic attack. The user counts as being Mind-Barred for the purposes of that attack. This does remove any active neuronics on the user, and cannot be used by Farfolk or others unable to Mind Bar. Costs a level of resistance for 1 hour to use.	

Mindspin	
Range: 20'	TBLP: 20'
Duration: 5 Minutes	Immunities: Stability
One target with a mind has their sense of balance and perception badly warped. For the duration they find it impossible to orient themselves, and each time they attempt to take a step they instead fall over (as if Slipped or similar). They are also incapable of using abilities such as Tell Direction.	

Network of Pain	
Range: Touch	TBLP: 12 + 6/15 seconds
Duration: Max 5 Minutes	Immunities: Pain
The target suffers an immediate and extreme spasm of all the muscles in their body, suffering great pain throughout. In a similar manner to the Words of Pain spell, the target is completely unable to act, and suffers 6/1 damage (2 Hits) every 15 seconds. To maintain the ability the user must stay touching the target – if the touch is broken the ability is negated. During this time the user may not use other neuronic powers.	

Neural Purge	
Range: Touch	TBLP: 18
Duration: 30 seconds	Immunities:
After 30 seconds touch contact one target has all detrimental ongoing neuronics / psionic/ mental and emotional effects removed from them, this includes Fear and Insanity.	

Neurone Death	
Range: Touch	TBLP: 24
Duration: Permanent	Immunities: Paralysis
The user's touch destroys certain critical mental functions, leaving the target unable to move their body from the neck down. Having Immunity to Paralysis negates this, and Determination may be applied but War-Cry and similar abilities are not sufficient. The effects may be removed instantly by casting a Regeneration effect on the target's nervous system.	

Neuronic Blast	
Range: 20'	TBLP: 9
Duration: Instant	Immunities:
The target of this mental attack suffers a sudden sharp pain to the head, causing 12 tblp of damage and 12 points to the head location (4 Hits to monsters). Resistances to neuronics reduce this damage, and neuronics armour class may be applied, but no other form of AC. It cannot be used more than twice in one minute, or it backfires at the user.	

Neuronic Blindness	
Range: 20'	TBLP: 12
Duration: 5 Minutes	Immunities: Blindness
The target is struck blind for the duration, if they have a mind.	

Neuronic Bolt	
Range: 10'	TBLP: 18
Duration: Instant	Immunities:
In a similar way to Neuronic Penetration, this mental attack assaults the mind of the target. However it is much more potent – the target suffers 24 tblp damage and 24 loc damage to the head (8 Hits to monsters). This ability cannot be used more than once per minute, or it backfires.	

Neuronic Cluster	
Range: Special	TBLP: 24
Duration: Instant	Immunities:
This powerful neuronics allows the user to release a number of damaging offensive neuronics at once. The released neuronics must be the user's own innates or powers <i>e.g. not from an item</i>. These may be from an 'at will' power, such as the free Neuronic Penetrations granted by Psyker. Neural Foci may be applied to the Neuronic Cluster and to any innate released separately. The innates released must all be of the same type and the target may apply his defences against each one separately as normal. <i>For Example: "Neuronic Cluster 4 Neuronic Penetrations" to a user with 6 Neural Foci would cause the user $[24 - 6] = 18 + [4 * [3 - 2] = 4] = 18 + 4 = 22$ TBLP</i>	

Neuronic Competence	
Range: Self	TBLP: 15
Duration: 5 minutes	Immunities:
This skill grants the user +3 Neural Foci and No Damage Casting Neuronics which are, or are reduced to, tblp for the duration. This increase in foci is not cumulative with itself – or any similar power, but does work with normal Neural Foci, and Psionic Focus. The additional foci do not apply to the damage suffered from using this innate.	

Neuronic Dart	
Range: 20'	TBLP: 1
Duration: Instant	Immunities:
In a similar manner to Neuronic Penetration, this attack inflicts 3 tblp and 3 loc damage to the head to the target.	

Neuronic Deafness	
Range: 20'	TBLP: 6
Duration: 5 Minutes	Immunities: Deafness
The target is struck deaf for the duration, if they have a mind.	

Neuronic Disruption	
Range: 10'	TBLP: 24
Duration: Instant	Immunities:
One target within range suffers a violent mental assault, inflicting 36 tblp damage and 36 loc damage to the head (12 Hits to monsters). This innate cannot be used more than once per minute, or it backfires.	

Neuronic Dumbness	
Range: 20'	TBLP: 9
Duration: 5 Minutes	Immunities: Dumbness
The target is struck dumb for the duration, if they have a mind.	

Neuronic Flare	
Range: 10' cone by 60°	TBLP: 9
Duration: Instant	Immunities: Repels
All within the cone of effect, 10' long in a 60° arc originating in front of the caster are thrown back a further 10'. Additionally all suffer damage as per the <i>Neuronic Penetration</i> ability.	

Neuronic Flash	
Range: 10' cone by 60°	TBLP: 6
Duration: Instant	Immunities: Repels
All within the cone of effect, 10' long in a 60° arc originating in front of the caster are thrown back a further 10'.	

Neuronic Lance	
Range: 20'	TBLP: 15
Duration: Instant	Immunities: Repels
One target is hurled back 40' by a sudden spear of mental energy; they also suffer 12 tblp and 12 loc damage to the head, to which only NAC applies (4 hits to monsters). It is not possible to use more than one Lance within a one minute period, or the second backfires.	

Neuronic Leap	
Range: Self	TBLP: 6
Duration: Instant / 2 seconds	Immunities:
The caster propels themselves with a brief jolt of telekinetic energy, functioning in all ways as a <i>Jump</i> or <i>Salmon Leap</i> .	

Neuronic Overload	
Range: 20'	TBLP: 18
Duration: 5 Minutes	Immunities: Catalepsy
The target collapses unconscious for five minutes. This is considered a listed stopping effect in a similar manner to Catalepsy, and resistance to Catalepsy applies.	

Neuronic Pulse	
Range: 10' radius	TBLP: 9
Duration: Instant	Immunities: Repels
All within the radius are flung back 10' from the caster, in a way similar to Neuronic Flash.	

Neuronic Push	
Range: 20'	TBLP: 6
Duration: Instant	Immunities: Repels
Throws one target back 10' in a similar manner to Neuronic Flash	

Neuronic Strike	
Range: 20'	TBLP: 30
Duration: Instant	Immunities:
In a similar manner to Neuronic Penetration, this attack inflicts 48 tblp and 48 loc damage to the head to the target (16 hits to monsters). This is usable at most once every five minutes.	

Neuronic Stun	
Range: 10'	TBLP: 9
Duration: 10 seconds	Immunities: Stopping FX / Halt
One target is mentally stunned, suffering effects as per Halt. They are unable to move for 10 seconds or unless they are touched or suffer damage. This effect is non-level based. It is considered a listed stopping effect.	

Neuronic Terror	
Range: 10'	TBLP: 18
Duration: 5 Minutes	Immunities: Fear
All targets within range except the caster are affected by a Neuronic Whip, becoming filled with fear of the user.	

Neuronic Wall	
Range: 10'	TBLP: 6TBLP+1per10 seconds
Duration: Variable	Immunities:
The use of this ability creates a neuronic wall, at most 12' by 12' in size, of negligible thickness. This wall is completely impenetrable to any creature with a mind and to mental powers, but is no barrier to other creatures or objects. Should the user take any damage other than the cost of this casting the ability is broken. The neuronicist may not use other neuronic powers while the wall is active, nor fight or run, nor move more than 10' from the wall. Once the wall is dropped the ability cannot be used again for 30 seconds.	

Neuronic Whip	
Range: 20'	TBLP: 9
Duration: 5 Minutes	Immunities: Fear
One target is stricken with a great fear, such that they must flee from the caster. While they are out of his presence the fear subsides, but should they hear his voice or see him it is triggered again. They may not attempt to approach or attack the caster, and if the caster approaches they must back away. However, should the target be trapped and unable to back away further, and the caster continues to advance, the fear is temporarily broken until the situation changes.	

Neuro-Planar Jump	
Range: See below	TBLP: 18
Duration: Instant	Immunities:
The user is transported to any other point which they have previously visited on the same plane. This is accomplished by brief passage through the astral plane. The user may only travel to places they have visited that adventure, or places they have chosen to memorise by spending 5 points on their character card to do so. They may also choose to return 'home'. To buy this ability the neuroncist must have at least two Neuro-Synaptic Jumps for each Neuro-Planar Jump bought. Other people cannot be taken by use of this ability.	

Neuro-Planar Vortex	
Range: See below	TBLP: 18
Duration: Instant	Immunities:
The user is transported to the corresponding point on a different plane. This plane must be one of which the user is 'aware', either having travelled to before on that adventure or with sufficient information to do so at the ref's discretion. It is possible for the user to take others with him, but difficult: each willing person touching the user may be transported, but the user takes casting damage for each one separately. Creatures without minds are considered objects and must be fully carried to be transported, while creatures specifically immune to neuronics disrupt the power of the vortex and cannot be transported at all. This ability does <i>not</i> allow the user to travel to a specific part of a given plane.	

Neuro-Synaptic Jump	
Range: 20'/line-of-sight	TBLP: 12
Duration: Instant / 2 Seconds	Immunities:
The user can instantly transport themselves to any point within sight, or alternatively to a spot within 20' even if it cannot be seen. It is impossible to materialise within a solid object, and should this be the case the ability instead fails to function. For the sake of smooth adventure flow, it is suggested that Time Freeze is not called for the use of this ability except when the speed of the shift is critical. On arrival, there is a 2-second phase-in period, during which time the user is not vulnerable to external effects, and any on-going effects are extended by 2 seconds- but the user cannot perform any action.	

Precognition	
Range: Self / Unlimited	TBLP: 9
Duration: 30 seconds / 3 Questions	Immunities: Neuronic Informational FX
Allows the user to seek confirmation of three facts, gaining Yes / No answers to three separate questions. Questions asked about things which are specifically immune to neuronics (as opposed to merely being mindless) cannot be confirmed, and things with no physical or neuronc aspect to them (such as purely spiritual creatures) will only have questions answered if a creature with a mind knows the answers. It takes 30 seconds of uninterrupted concentration to activate, during which time user must sit quietly and take no action. The questions are considered to be asked and answered instantly at the end of the concentration period.	

Precognitive Flash	
Range: Self	TBLP: 12
Duration: Instant	Immunities: Neuronic Informational FX
The user is able to make an intuitive leap in logic with complete confidence; metaphorically, 'a light-bulb lights up over their head'. This ability functions very similarly to a Lucky Idea. The user receives a short answer (at most three words) to a problem or question currently facing them. At the ref's discretion, the answer to this ability can instead address a different issue, if the ref considers the other problem to be more pressing – for example, if a pack of hell-hounds are just rounding the corner while the user blithely seeks to discover the date, the answer may well be 'Run Away!' It is acceptable for a referee to ask if the player wishes to use this ability in response to an unforeseen danger or other potentially dangerous mistake.	

Precognitive Knowledge	
Range: Self	TBLP: 30
Duration: 2 Minutes	Immunities: Neuronic Informational FX
After 2 minutes calm preparation as per Major Precognition, the caster may seek the answers to as many questions as desired, and those answers may be as detailed as necessary. The only constraints are that questions must be expressed clearly and without hurry, and that all questions must be asked within the two minute period. Creatures specifically immune to neuronics will have no questions answered about them, and things with no physical or neuronics aspect to them (such as purely spiritual creatures) will only have questions answered if a creature with a mind knows the answers.	

Probe	
Range: Line-of-Sight	TBLP: 18
Duration: Instant / 30 seconds	Immunities: Neuronic Informational FX
The user may ask one question of the target's mind. The creature is not aware that they are being probed, and the question will be answered truthfully. Only simple answers can be gained from this ability – single facts, for example e.g. “Under the cloth”, “Black”, “I did it”. Before an answer is obtained the user must concentrate in sight of the target for a full 30 seconds.	

Psionic Invasion	
Range: 9'	TBLP: 18
Duration: 30 seconds	Immunities: Neuronic Informational FX
This neuronics power invades the mind of the given target – and provides answers to the following info effects: <i>Auric Colour</i> , <i>Psi-Scan</i> , <i>Probe</i> , <i>Neuronic Tell Profession</i> , <i>Neuronic Tell Form</i> . It takes 30 seconds concentration whilst within range of the target to gain the answers required. The <i>Probe</i> may be asked as per the published skill.	

Psi-Scan	
Range: Line-of-Sight	TBLP: 6
Duration: Instant	Immunities: Neuronic Informational FX
Tells the user the surface thoughts of one target at time of use. The creature must be within sight.	

Psychic Assault	
Range: 9'	TBLP: 18 + 6 / 15 seconds
Duration: See below	Immunities: Stopping FX
One target with a mind is held motionless for as long as the user concentrates and remains totally still themselves. Every 15 seconds the Assault is maintained the target takes damage as per a <i>Neuronic Penetration</i> , 6 loc damage to the head and 6 tblp, to which only Neuronic AC applies. Every 15 seconds the user takes 6 tblp casting damage, reduced by Neural Foci as normal. It is broken as soon as the user performs <i>any</i> action, even the use of other neuronics, or receives damage. It is also broken should the target receive any damage other than that caused by the assault. It is considered a <i>Listed Stopping Effect</i> , and should the target be immune to the stopping aspect they are also immune to the damage and the ability fails.	

Psychic Cage	
Range: Line-of-Sight	TBLP: 18
Duration: Up to 5 Minutes	Immunities: Involuntary Mystical Transportation
One target within sight is prevented from transporting themselves using mental powers. Each time the target attempts to use such a power (e.g. Neuro-Synaptic Jump, Neuro-Planar Vortex) the user takes 12 tblp (reduced as normal by neural foci) but the target's ability does not function – effectively the target is instantly returned to the spot which they are attempting to leave. This ability may be released early by the user, and only functions while the target is in sight of the user – in other words, it will not prevent a shift being used if the user cannot see the target.	

Psychic Crush	
Range: 20'	TBLP: 15
Duration: See below	Immunities: Stopping FX
One target with a mind is held motionless for as long as the user concentrates and remains totally still themselves. It is broken as soon as the user performs <i>any</i> action, even the use of other neuronics, or receives damage. It is also broken should the target receive any damage. It is considered a listed stopping effect.	

Psychic Guide	
Range: Self/Line-of-Sight	TBLP: 6
Duration: 5 Minutes	Immunities: Neuronic Informational FX
While active, the user is aware of faint traces left on objects and the air itself by the passage of beings with minds, fading with time. This allows the user to track individual minds by following the trail they leave, and also to judge how many minds have been in an area, and how recently. Traces usually fade completely after around 24 hours, though in a heavily used area they may be obscured by newer traces. The traces left behind are unique, so the user may track a specific mind; and if the user has previously seen a mind's aura, such as by the use of <i>Auric Colour</i> , they will recognise it again in the future. It is also possible to distinguish animals and similarly unintelligent minds from those of thinking beings. However, while this ability is active the constant traces left all around make it difficult to focus on the real world - the user may not use dexterity AC during this time.	

Psychic Link	
Range: Touch / See below	TBLP: 9
Duration: 5 Minutes	Immunities: Neuronic Informational FX
To use this ability the neuronacist must first Psi-Scan the target. Once a link has been established, the user may Psi-Scan the target at will for 6 tblp less Neural Foci as normal, Message them at will for 6 tblp less Neural Foci as normal, and most importantly see out of their eyes at will. To maintain the link the user must be calm and take no other actions than speech and moving at a slow walk. Should the user suffer any damage apart from the casting damage above the link is broken. Should the target leave the same plane as the user the link is broken. Should the target suffer any neuronic damage or offensive effect, the user also suffers the same effect and the link is broken.	

Psychic Spy	
Range: Touch / See below	TBLP: 9
Duration: 5 Minutes	Immunities:
The user may touch any inanimate object with a physical component and no mental power, after which time they maintain a link between it and their consciousness. For the duration the user may observe everything which occurs within 20' of the object, as if they were standing invisibly beside it at all times. However, the link is only active while the user remains still and calm, taking no actions other than speech and moving at a slow walk. At other times they are unable to perceive through the object, although the link is not broken and they may reaffirm the link by returning to a calm motionless state. Use of any neuronic power at all on the object once the link is formed will break the link and negate the ability. Should the object leave the same plane as the user, the ability is broken until it returns.	

Purity of Mind	
Range: Self	TBLP: 24
Duration: 5 minutes	Immunities:
The use of this powerful ability transports the user's body to a pocket dimension where it is completely safe; however the user's mind and will remain. The user takes on a misty, ethereal appearance, and all objects which are not imbued with mental power pass straight through them. They are capable of walking through walls with a slight disorientation of 2 seconds on leaving one. They are completely unharmed by all forms of weapon or attack, except neuronic types. While in this form, it is impossible for the user to hold objects, or in any way to strike a blow. They cannot touch anything, and as a result neuronic abilities with a range of touch cannot be used. Ranged and self neuronic powers can be used, but the user cannot apply neural foci to any casting damage they may take – their concentration is divided by the strain of keeping their will coherent without a body's template. The user cannot <i>Mind Bar</i> or use <i>Intellect Fortress</i> . They may choose to end this innate early. This is, in effect, a sort of 'Neuro-Form'.	

Reactions	
Range: Self	TBLP: 9
Duration: 5 Minutes	Immunities:
The user gains 3 extra points of dexterity armour class for the duration. This ability cannot stack with itself.	

Reap the Psychic Whirlwind	
Range: 20' radius	TBLP: 24
Duration: See below	Immunities: Stopping FX
All targets with a mind within 20' bar the user are seized by a Psychic Crush and held completely immobile. If the caster moves or suffers damage the effect is broken for all. If a target suffers external damage they are personally freed from the effect.	

Reflective Thoughts	
Range: Self	TBLP: 12
Duration: 30 seconds	Immunities: Informational Neuronic
The skill allows the neuronistic to 'recall' all of the answers from one given neuronistic informational effect – that they have used on that adventure – It takes 30seconds complete concentration to reveal the answers, and give the ref a chance to find the answer again!	

Sensory Deprivation	
Range: 20'	TBLP: 12
Duration: 5 Minutes	Immunities: Varies
May be used as any of Neuronic Blindness, Deafness or Dumbness, at user's choice.	

Seventh Sense	
Range: 20'	TBLP: 9
Duration: Instant	Immunities: Neuronic Informational FX
The user is informed whether there are any minds within range that currently have hostile intent towards the user. This is a Yes/No answer only, and does not give locations of those meaning harm.	

Shadowed Mind	
Range: Self	TBLP: 12
Duration: 5 minutes	Immunities:
This skill allows the neuronistic to create a mental shadow that smoothers his own mind. For the duration the user is immune to neuronistic informational effects, and the Shadowed Mind will filter any damaging neuronics granting a 50% reduction from them.	

Speed of Thought	
Range: Self	TBLP: 12
Duration: Instant	Immunities:
This ability allows the user to induce Lightning Reactions in themselves. Each time it is used, the user may be considered to have dodged one attack which occurred in Time Freeze or Time Stop, or make similar uses at ref's discretion. It must be used for <i>each</i> such attack.	

Telekinesis	
Range: 20'	TBLP: 9
Duration: 5 Minutes	Immunities:
One inanimate object within range is moved by the power of the user's mind. The force of the telekinesis cannot exceed the amount of force the referee can exert with one hand, so some objects will be too heavy to move. The caster can move the target object as desired for the duration. Only one Telekinesis may be used at a time.	

Telekinetic Buffer	
Range: Self	TBLP: 36
Duration: 5 Minutes	Immunities: Aura of Defence
This potent discipline surrounds the user in an invisible field of telekinetic energy, pushing normal physical objects away from the caster and preventing physical contact. For the duration, the user may not pick up normal physical objects (although he may continue to hold any he had at the time of activation). All objects attempting to touch him are turned away. If there is real force behind an attempt, such as a weapon blow, this drains the user's reserves – each time a weapon blow is turned the caster suffers 12 TBLP in casting damage, to which Neural Foci may be applied. Only normal non-supernatural weapons are so affected, and Unarmed Combat is not.	

Telekinetic Crush	
Range: 20'	TBLP: 18
Duration: Variable	Immunities: Stopping FX
Holds one target motionless as per Psychic Crush. However the target need not have a mind to be affected, as long as they exist in the physical world. The target is prevented from being physically moved in any way while the ability is active. The user must remain entirely motionless to maintain it, and damage to either the user or the target will break it. May also be used on inanimate objects, which are man-sized or smaller, to prevent them from being moved.	

Telekinetic Finesse	
Range: 20' initially	TBLP: 15
Duration: 5 Minutes	Immunities:
This allows the user to control a telekinesis more firmly and exactly than usual, and thus wield a weapon telekinetically. While the user continues to concentrate and suffers no damage, they may operate a normal, non-supernatural weapon in a similar fashion to a Dancing Sword. The damage inflicted by the weapon is by weapon type as appropriate, with the addition of one grade of strength (12 point Double for O Class, 15 point triple for Bastard Length Weapons, and 18 point triple for full B class weapons). The weapon is still vulnerable to Shatter and similar effects, and if it leaves the caster's line-of-sight or the caster is injured or uses another neuronic power the ability is cancelled.	

Telekinetic Flash	
Range: 10' cone by 60°	TBLP: 12
Duration: Instant	Immunities: Repels
All within the area of effect are flung back a further 10', in a similar way to Neuronic Flash – however this ability affects all targets which exist in the physical world, even if they have no mind, and also throws back objects which could be moved with one grade of strength.	

Telepathy	
Range: Line-of-sight / 60'	TBLP: 6
Duration: Instant	Immunities:
One target receives a neuronic message, exactly as per the <i>Message</i> ability above. After the message the target is <i>Psi-Scanned</i> , effectively allowing them to reply.	

Trans-Location	
Range: 20'	TBLP: 18
Duration: Instant / 2 seconds	Immunities: Involuntary Mystical Transportation
One target within 20' is instantly transported to any other point within 20', subject to the below limitations. This functions as per a Neuro-Synaptic Jump, including a 2-second phase-in period. Because the target takes 2 seconds to fully arrive at the destination, it is impossible to transport the target somewhere where they will not remain at rest – for example, in mid-air. If this is attempted, the target simply reappears where they vanished. They cannot be transported into solid objects.	

Vertigo	
Range: 20'	TBLP: 12
Duration: 5 Minutes	Immunities: Stability
One target within range has their senses interfered with such that they have trouble balancing. Should they attempt to fly, climb ladders, or otherwise climb above ground level, they will find each step they take bringing them back closer to the ground, rather than in the direction they desired.	

Post-8th Abilities

These abilities are available to “All” – which means any Neuronic Class, and “Racial” which means a Neuronic Race with a Neuronic Buy As, e.g. Silver Folk. No other race, even one with neuronics, may purchase these without specific written authority.

Table 1 (0pts)

Potion Allowance	Cost: Special	T: 1
Available To: All		
For every 100 points acquired in total before 1000 points, they may spend 10 points to safely drink one additional 6 point curing potion per day. Between 1000 and 2000 points, they may continue to acquire an additional potion drinkable for each 100 points, at a cost of 20 points per potion. Between 2000 and 3000 points, the same rule applies at a cost of 30 points per potion, and so on.		
Neural Foci	Cost: 25pts*	T: 1
Available To: All and Racial		
Each Neural Focus acquired by a neuronic user reduces the life cost of using any neuronic ability by 1 tblp, to a minimum of 1/3 the original life cost (rounded up), and at any rate to a minimum of 1 point.		
Emotionless	Cost: 0pts	T: 1
Available To: All		
Chosen at 1 st level a class that has Emotion Restrictions may take on more restrictions to allow them to master their powers. Should the neuronic user show any form of strong emotion for any reason (laughing at a joke, extreme joy, anger etc.) then they suffer as if they had suffered a supernatural emotion effect. However the added dedication means their powers are easier to master, granting them 2 extra Neural Foci.		
Recognise Neuronics	Cost: 30pts	T: 1
Available To: All and Racial		
The user may identify whether any object or creature within 1” of their touch has neuronic powers.		
Potion Variety	Cost: 40pts	T: 1
Available To: All		
The user may now <i>drink</i> any strength healing potion. However each 6 tblp worth of healing counts as 1 normal potion against quantity and time allowances possessed. Healing potions that do not cure total body count as 4 potions from their allowance.		
Absorbed Empathy Alignment	Cost: 50pts	T: 1
Available To: All		
The alignment of the neuronic becomes the average of the party on a Good, Neutral, Evil scale. This does not affect the Law-Chaos part of the alignment. If the balance is even then the neuronic remains their original alignment. This alignment alteration is temporary and does not apply after death		

Awareness	Cost: 60pts	T: 1
Available To: All		
Grants +2 Dexterity armour class [+2 DAC], which is non-cumulative with AC granted by Blesses / Watchings and other similar abilities.		

Neuronic Focus	Cost: 40pts	T: 1
Available To: All 1st Class		
Grants +2 Neuro Foci only for use when holding an excellent Focus – phys rep. The object may not have any other in game relevance and could be phys repped for example by a Wand, Crystal, Orb, or such.		

Rejection of the Art	Cost: 40pts	T: 1
Available To: 1st Class Seer/Mystic/Psycher/Psi-Drowe		
Now gains weapon skills as per Wizard. May wear up to Studded Leather and may now buy grades of Strength, despite class restrictions. May not learn <i>Dedication to the Art</i> .		

Dedication to the Art	Cost: 40pts	T: 1
Available To: 1st Class Seer/Mystic/Psycher/Psi-Drowe		
Now loses the ability to use a physical weapon completely, additionally may not wear any sort of physical armour. Gains 2 additional Neural Foci and 6 tblp extra Casting Stamina. Both of which are cumulative with all other published increases. May not learn <i>Rejection of the Art</i> .		

Clear Meditation	Cost: 40pts	T: 1
Available To: All		
Standard Meditation now regains innates at a base of 6 tblp per 15 minutes from 3 tblp.		

Discern Remaining Neuronic Innates	Cost: 30pts	T: 1
Available To: All		
This skill allows the neuronacist to discern how many Neuronic Innates they have remaining.		

Strength of Body	Cost: 40pts	T: 1
Available To: All		
No longer has a potion restriction based on Neuronic Class. However is limited to buying 1 Neural Foci per table post 8 th .		

Table 5 (450pts)

Skilled Dominator	Cost: 60pts	T: 5
Available To: 1st Class Mystic/Psycher		
Domination level of effect is increased by one		

Greater Rejection of the Art	Cost: +40pts*	T: 5
Available To: 1st Class Special*		
From <i>Rejection of the Art</i> on Table 1 – May now learn any <i>one</i> of the following – listed on card when learnt. • O skill • Utilise Shield • One specialist skill • B skill [Staff and Spear only]. All the above as per the Psi-Master version of the skill. No longer counts as pure for bracket purposes and may only enter Scout or Warrior brackets. This ability may be purchased multiple times to gain more of the above.		

Greater Dedication to the Art	Cost: +40pts	T: 5
Available To: 1st Class Special*		
From <i>Dedication to the Art</i> on Table 1 – May not leave the neuronics bracket, nor buy any abilities from outside of it bar racial ones and ALL abilities, but may buy all relevant published innates 2 tables earlier than listed.		

Table 6 (600pts)

Enlightened Mind “Effect”	Cost: 50pts	T: 6
Available To: See Below		
Neuronics can open their mind and draw on certain powers, enhancing them beyond their normal ways. In order to buy the below the Neuronics must be 1st class and have them as part of their base 1st to 8th Neuronics or be on the Active or Passive trees. When enhancing a neuronics as below no Foci/reductions in cost can be used. Each Enhancement is purchased separately and can be used in different ways. The below do not stack with any other enhancements or alterations to the base neuronics. Auric Colour – Reveals the target’s Level of Resistance to Neuronics. Neuronic Penetration – Is enhanced so that in addition to the Neuronic Penetration they also suffer a Neuronic Dart. This extra Dart should be called after the Neuronic Penetration is called. Neuro-Balance – May be declared in response to an effect (within 2 seconds) to have the Neuro-Balance active at the time. Neuro-Mastery – Can be declared in response to an effect (within 2 seconds) and count as having the Neuro-Mastery active for that attack. When used in this way the Neuro-Mastery only lasts 10 seconds. Artefact Study – Also reveals if the object that is being spoken to is lying (as per a Detect Lie). Message – All chosen people within range hear the message. Mind Bar – Instead of its normal effect can be used to grant +2 NAC for the duration. Detect Possible Neuronic Activity – Reveals the number of individuals with neuronics within range, not just that there is a presence. Detect Mind – Reveals the location of the minds within range. Detect Inanimate – Is enhanced to act as a Detect Animate. Detect Lie – While active is aware if the answers are being deceived, twisted, or altered in any way (e.g. Deceptions). Mastery – When used the mastery is gained in all weapons not just one. Reactions – While the reactions is active gains the benefits of Dexterous Celerity. Precognition – The precognition gains a 4th question, and the questions may be asked one at a time not all in one go. Major Precognition – The Major Precognition gains a 4th question, and the questions may be asked one at a time not all in one go. Psi-Scan – Once used the Psi-Scan continues to provide information for 10 seconds. Domination – The Domination will last for 15 minutes. Neuronic Blast – In addition to the damage causes a 10 second Neuronic Blindness.		

Table 7(650pts)

X2 Meditation Rate	Cost: 50pts	T: 7
Available To: All		
From <i>Clear Meditation</i> , now regains innates at 12 tblp per 15minutes.		

Forced Offence	Cost: 50pts	T: 7
Available To: Mystic/Psycher		
When using a ranged damaging neuronc [Neuronic Penetration or greater] may choose to add any one of the following effects to the damage, costing an additional 6 tblp – which is treated separately for the application of Neural Foci etc. This ability is useable at will – but at most 1 per 15minutes.		
Neuronic Stun [as published]		
Neuronic Push [as published]		
Neuronic Dart [as published].		

Reactionary	Cost: 80pts	T: 7
Available To: Psi-Master/Slayer		
The 3 DAC granted by the use of a <i>Reactions</i> innate now exceeds MAX AC but to a maximum of 12. Any of this AC generated that would take the AC over 12 instead becomes a non-cumulative numerical damage reduction.		

Visionary	Cost: 80pts	T: 7
Available To: Seer/Mind Weaver		
When using informational neuronics may choose to receive the answers in the form of visions rather than a limited number of words – To do so the user must declare ‘Visionary’ before the use of a neuronc informational effect – The use of this ability causes the tblp cost of the innate to be doubled after all reductions. It should be noted that refs will not always be able to provide a Visionary answer – should this occur then the additional life should not be incurred. An informational neuronc is any neuronc innate to which <i>Immunity to Informational Neuronics</i> is listed as being the immunity for.		

Aware Meditation	Cost: 60pts	T: 7
Available To: All		
May perceive from eyes and may elect to end meditation early. May not actively move during meditation so make sure you are facing the right way at the beginning!		

The Open Mind	Cost: 80pts	T: 7
Available To: Seer		
From Message at will. The Seer can allow anyone within 10ft to hear the answers to their Precognitions/Major Precognitions and similar scrying. Using this increases the base cost of the enhanced neuronc by 6 tblp.		

The Open Mind	Cost: 40pts	T: 7
Available To: 1st Class Seer		
From Message at will. The Seer can allow anyone within 10ft to hear the answers to their Precognitions/Major Precognitions and similar scrying. Using this increases the base cost of the enhanced neuronc by 6 tblp.		

The Deepest Mind	Cost: 60pts	T: 7
Available To: Any 1st Class Neuronist		
With 15 minutes of meditation (may not apply Aware/Greater Aware or similar, only eyes closed med) gains the benefits of one hour's meditation for neuronics. Cannot regain neuronics for 3 hours after use. A second innate may be purchased on table 10.		

Awaken	Cost: 60pts	T: 7
Available To: Seer		
Allows the Seer to use Artefact Study in the same manner as an Awakener (including increased life cost).		

Awaken	Cost: 80pts	T: 7
Available To: Mind Weaver		
Allows the Seer to use Artefact Study in the same manner as an Awakener (including increased life cost).		

Table 8 (1000pts)

Expanded Invisibility	Cost: 15pts*/Target (Max +5 Targets)	T: 8
Available To: Awakener		
Each purchase allows the neuronist to use Neuronic Invisibility on one additional target when it is activated. However each additional target requires the same life cost to be applied – thus with 4 targets to be affected = 15 tblep [less foci] x 4.		

X3 Meditation Rate	Cost: +100pts	T: 8
Available To: All 1st Class		
From X2 Meditation now regains innates at 18 tblep per 15minutes.		

Matter Over Mind	Cost: 80pts	T: 8
Available To: All 1st Class		
When meditating, instead of recovering tblep's worth of neuronics may instead choose to recover an equal amount of Casting Stamina tblep. This is affected by meditation rate etc.		

Greater Aware Meditation	Cost: +80pts	T: 8
Available To: All 1st Class		
From Aware Meditation: May now choose to be active during mediation. However the meditation will end if the neuronist casts another spell, moves faster than a slow walk, makes an attack, uses any ability, or suffers any damage. In addition the neuronist may not leave the location in which the ability was triggered, without breaking the meditation. A location in this case would be a 30' radius from the mediation point. At any rate the meditation gained in this manner may not exceed x5 rate.		

Table 9 (1500pts)

Enhanced Neuro-Mastery Earth	Cost: 100pts	T: 9
Available To: All		
May now use Neuro-Mastery: Walk through Earth to grant half-damage earth-based attacks. If capable of stacking two Neuro-Masteries simultaneously, may use two Neuro-Mastery Earths to be able to walk through earth/stone walls for 10 seconds only. If used in one of these ways no normal benefits are gained for the Neuro-Mastery.		
Enhanced Neuro-Mastery Fire	Cost: 40pts	T: 9
Available To: All		
May now use Neuro-Mastery: Walk through Fire to also grant complete immunity to normal fires.		
Enhanced Neuro-Mastery Darkness	Cost: 80pts	T: 9
Available To: All		
May now use Neuro-Mastery: Walk through Darkness, to gain see through supernatural darkness. If used in this way no normal benefits are gained for the Neuro-Mastery.		
Enhanced Neuro-Mastery Air	Cost: 40pts	T: 9
Available To: All		
May now use Neuro-Mastery: Walk through Air to also gain complete immunity to natural air and electrical attacks, such as Call Lightning.		
Enhanced Neuro-Mastery Water	Cost: 60pts	T: 9
Available To: All		
May now use Neuro-Mastery: Walk through Water to also grant ½ effect water-based and acid-based attacks, including immunity to poisons unless in solid form.		
Enhanced Neuro-Mastery Light	Cost: 50pts	T: 9
Available To: All		
May now use Neuro-Mastery: Walk through Light to also grant immunity to visual effects based on bright light, such as Bedazzle.		
Expanded Invisibility	Cost: 20pts*/Target (Max +2 Targets)	T: 9
Available To: Psi-Drowe		
Each purchase allows the neuronist to use Neuronist Invisibility on one additional target when it is activated. However each additional target requires the same life cost to be applied; thus with 3 targets to be affected = 15 tlp [less foci] x3.		
Expanded Invisibility	Cost: 15pts*/Target (Max +5 Targets)	T: 9
Available To: Seer		

Each purchase allows the Seer to use Neuronic Invisibility on one additional target when it is activated. However each additional target requires the same life cost to be applied – e.g. with 4 targets to be affected = 15 tblp [less foci] x 4.

Practiced Meditation	Cost: 60pts	T: 9
Available To: All		
From standard meditation may now meditate to regain any published neuronic innate, from just 1 st -8 th standard.		

Greater Reactionary	Cost: +70pts	T: 9
Available To: 1st Class Psi Master		
From Reactionary – the numerical damage reduction granted via Reactionary , at the time of use may be declared as Greater Reactions – and converted into an equal amount of MAC and SAC useable against ranged supernatural attacks only.		

Greater Reactionary	Cost: +80pts	T: 9
Available To: 1st Class Slayer		
From Reactionary – the numerical damage reduction granted via Reactionary , at the time of use may be declared as Greater Reactions – and converted into an equal amount of MAC and SAC useable against ranged supernatural attacks only.		

Greater Mastery 1	Cost: 60pts	T: 9
Available To: 1st Class Psi-Master/Slayer		
When using a temporary 5 minute Mastery innate gains Maximum Damage Quin but solely when fighting with a B class weapon held in two hands. This ability will not function beyond 5 minutes per innate used.		

Greater Forced Offence	Cost: +70pts	T: 9
Available To: Mystic		
From Forced Offence – when using this ability instead of using one of the other 3 skills may now choose to raise the potency of a Neuronic Penetration to a Neuronic Blast .		

Greater Forced Offence	Cost: +80pts	T: 9
Available To: Psycher		
From Forced Offence – when using this ability instead of using one of the other 3 skills may now choose to raise the potency of a Neuronic Penetration to a Neuronic Blast .		

Rushed Thoughts	Cost: 30pts	T: 9
Available To: Seer		
This ability allows the user of a Precognition or Major Precognition to ignore the preparation time and actions, <i>sitting quietly etc</i> , for the ability in order to receive the answers almost instantly. Using this causes the life cost to be increased by 6 tblp before foci and no other enhancements maybe used.		

Rushed Thoughts	Cost: 40pts	T: 9
------------------------	-------------	------

Available To: Mind Weaver

This ability allows the user of a *Precognition* or *Major Precognition* to ignore the preparation time and actions, *sitting quietly etc*, for the ability in order to receive the answers almost instantly. Using this causes the life cost to be increased by 6 tblp before foci and no other enhancements maybe used.

Table 10 (3000pts)**Neuro Master**

Cost: 175pts

T: 10

Available To: All

The neuroncist may now use two *Neuro-Masteries* simultaneously. These can be of the same or of different elements and will stack. So that it can be used to give ¼ Effect Fire, or ½ effect fire and Walk on Air and so on. Casting damage in this case is taken for the second Neuro-Mastery without Neural Foci being applied *i.e. 9 tblp, irreducible*.

Destructive Thoughts

Cost: 80pts

T: 10

Available To: 1st Class Mystic

May cast a single neuronc from their 1st to 8th innates without using an innate. Foci may not be applied to this neuronc. Usable 1/15 minutes.

Enlightened Thoughts

Cost: 120pts

T: 10

Available To: 1st Class Seer

May cast a single neuronc from their 1st to 8th innates without using an innate. Foci may not be applied to this neuronc. Usable 1/15 minutes.

Duality of the Mind

Cost: 60pts* Max 3

T: 10

Available To: 1st Class Neuroncist

The Neuroncist may open their mind allowing them to focus on a neuronc and continue to cast. This allows them to maintain a neuronc (e.g. Neuronc Wall, Neuronc Invis etc.) that would normally require concentration and continue to use neuronics. However foci may not be applied to the extra neuronics used. This could be used to allow multiple Neuro-Masteries or similar . This lasts until the initial neuronc is released, or 5 minutes whichever is less.

Neuro Sight

Cost: 100pts

T: 10

Available To: All

The user can see whether any target within sight has a mind (*i.e. is vulnerable to neuronics*). Only targets which the user can see with their normal physical sight can be identified, and no other information is gained.

Strength of Will

Cost: 180pts

T: 10

Available To: All

Is now capable of shrugging off external domination effects; any domination effect directed at the neuroncist is ignored, costing the neuroncist 12 TBLP casting damage. This may not be used when Mind Barred or otherwise unable to use neuronics.

Expanded Invisibility

Cost: 25pts (Max +1 Target)

T: 10

Available To: Mystic/Psycher

Each purchase allows the neuroncist to use Neuronic Invisibility on one additional target when it is activated. However each additional target requires the same life cost to be applied; thus with 2 targets to be affected = 15 tblep [less foci] x2.

Expanded Invisibility	Cost: 50pts (Max +1 Target)	T: 10
Available To: Psi-Master/Silver Warden		
Each purchase allows the neuroncist to use Neuronic Invisibility on one additional target when it is activated. However each additional target requires the same life cost to be applied; thus with 2 targets to be affected = 15 tblep [less foci] x2		

Necroscope	Cost: 125pts	T: 10
Available To: 1st Class Seer/Mind Weaver/Awakener		
For every 30 seconds spent in contact with a dead body, the user can gain one truthful answer to a question as if answered by the being whose body it is. At most 5 minutes can be spent asking questions of any one body.		

Greater Mastery 2	Cost: +100pts	T: 10
Available To: 1st Class Psi-Master		
From <i>Greater Mastery I</i> – May now gain Maximum Damage Quin whilst using a single weapon rather than a B Class in 2 hands. Otherwise as per <i>Greater Mastery I</i> .		

Greater Mastery 2	Cost: +120pts	T: 10
Available To: 1st Class Slayer		
From <i>Greater Mastery I</i> – May now gain Maximum Damage Quin whilst using a single weapon rather than a B Class in 2 hands. Otherwise as per <i>Greater Mastery I</i> .		

Psychic Revenge	Cost: 80pts	T: 10
Available To: All		
On the death of the neuroncist, his anguish and pain are released as a mental assault at his slayer; the slayer suffers the effects of all remaining offensive neuronics possessed by the neuroncist, simultaneously. If the neuroncist had any at-will offensive neuronics, only one use of these is suffered by the slayer. This is a dying effect. Should the neuroncist be restored to life during the course of the adventure, they do still have all their remaining innates to use.		

Mental Snapback	Cost: 150pts	T: 10
Available To: All		
Acts as a Neuronic Word of Recall, returning the user home regardless of their current location.		

Table 11 (5250pts)

Vortex Control	Cost: 80pts	T: 11
Available To: All		
Neuro-Planar Vortex will now transport the user (and any passengers) to any point on the chosen plane, although to		

do so an additional 6 tblp casting damage is sustained per traveller.

Greater Mastery 3	Cost: +100pts	T: 11
Available To: 1st Class Psi-Master		
From <i>Greater Mastery II</i> – May now gain Maximum Damage Quin whilst using any weapon combination – including in either hand – Otherwise as <i>Greater Mastery I</i> .		

Greater Mastery 3	Cost: +120pts	T: 11
Available To: 1st Class Slayer		
From <i>Greater Mastery II</i> – May now gain Maximum Damage Quin whilst using any weapon combination – including in either hand – Otherwise as <i>Greater Mastery I</i> .		

Neuronic Status

The below status represent the natural development of a psychic's powers. They are available to any first class Neuronic Class (not just those that buy as first class Neuronic Classes) and an individual can only purchase one of them.

Imperial Seer

The dark secret organisation, the truth behind them, even in these days of an open Empire, remains that- a secret. While the Empire says they control them no one is really certain where they come from, who they are loyal to, or where their loyalties lie. At present those within the Seers are loyal to the Empire however.

Stage One – Cost: 100pts, Table 1

Available to Neuronic Classes which have purchased Emotionless.

If the Seer is ever outlawed or breaks Imperial law they must hand themselves in at the end of the Dungeon. Failure to do so means they can't use any form of Foci until their legal situation is resolved.

Gains Discern Outlaw which is Neuronic in nature, has a range of 20ft and costs 1 TBLP.

Gains Immunity to Fear.

Gains an additional Neural Foci.

Stage Two – Cost: +100, Table: 5

Gains a second Neural Foci.

Gains Enhanced Discern Outlaw, which costs 3 tblp per use and will reveal if the target is an outlaw unless they are Immune to Neuronic Informational Effects *and* under a disguise.

Gains Immunity to Emotion Attacks

Stage Three – Cost: +50, Table: 7

Gains a third additional Neural Foci

Gains Immunity to Insanity

If the neuronicist would suffer 1 tblp from the use of a neuronic they instead suffer no life.

Retrained Psi-Scout

A crazed and dangerous individual captured by the Imperial Seers, or a free willed individual forced into a trained ideal. Whatever it was the individual was previously a Psi-Scout that has been trained as something else...

It is the PLAYER'S responsibility to provide information on what Psi-Scout Neuronic are.

Stage One – Cost: 100pts, Table 1

Available to any neuronic class other than Psi-Scout.

May not possess Emotionless.

Can use a neuronic that is available to a Psi-Scout once per hour, cannot apply Foci to this neuronic.

May never be immune to Insanity, Fear, or Emotion attacks.

Stage Two – Cost: +100, Table: 5

The Psi-Scout neuronic can now be used once per 30 minutes..

Stage Three – Cost: +100, Table: 7

The Psi-Scout neuronic can now be used once per 15 minutes.

Wild Talent

The individual had no training, no upbringing, their abilities are all natural talent. No one is sure where it comes from, parents, fluke, or something else....

Stage One – Cost: 50pts, Table 1

Gains +6 Casting Stamina.
May not have Emotionless.
No longer has any form of emotion restrictions.
May never have more than 18 Neural Foci.

Stage Two – Cost: +100, Table: 5

Gains 12 (total) Casting Stamina.
May use a single neuronics with the maximum number of Foci that can be applied to it once per 15 minutes.
May never have more than 12 Neural Foci.

Stage Three – Cost: +50, Table: 7

Now gains 18 (total) Casting Stamina.
May now use a single neuronics every five minutes with the maximum number of Foci that can be applied (from once per 15 minutes).
May never have more than 6 Neural Foci.

Private Sector Work

A humble upbringing and a natural talent lend to the individual working for Traders, Merchants, and other private individuals. Their main source of income before being a mercenary was simple work involving trades, bargains, and the brokering of deals.

Stage One – Cost: 100pts, Table 1

Gains Auric Colour at will, if already owned then the neuronics can gauge a general feel for individuals and turn the Auric Colour physical by doubling the life cost.
Gains Detect Lie at will. If already owned the base life cost (before foci are applied) is reduced by 3.

Stage Two – Cost: +100, Table: 5

May now enhance Psi-Scans and Detect Lie in a similar manner to Auric Colour turning them physical, doubling the life cost before foci are applied.

Stage Three – Cost: +120, Table: 7

The neuronics may now enhance probe so that it is a physical informational effect, but costs double base tblp.
Is well equipped with the basic potion allowance for the character (including neuronics and spiritless bonus) at the start of each dungeon.

May buy extra 6 points for 5 points each.

Silent Killer

Trained to walk into a room sit in a corner and not be noticed as they kill a chosen target. They move through Primus and beyond to carry out their contracts.

Stage One – Cost: 75pts, Table 1

The first Neuronic Penetration used per 15 minutes may be upgraded to a Neuronic Blast (including the increase in life cost).

Is no longer limited to the number of Neuronic Blasts that can be used per minute.

Stage Two – Cost: +150, Table: 5

May now enhance a Neuronic Penetration to a Neuronic Blast once per 5 minutes from once per 15.

If a directly damaging neuronic would cost 1 tblep then it now costs 0 tblep to use.

Stage Three –Cost: +80, Table: 7

May now enhance a Neuronic Penetration to a Neuronic Blast once per target.

Is no longer limited by the amount of Neuronic Bolts that can be used within a certain time frame.

Open Mind

The neuronicist is an open book. Their minds are so attuned to the power that they cannot resist it but understand how to channel it like no other.

Stage One – Cost: 60pts, Table 1

May never have any reduction or apply NAC to any Neuronic Attack (immunities can be applied, e.g. Immunity to Catalepsy vs. a Neuronic Overload).

Gains +3 Neural Foci.

May reduce the life cost of neuronics to 1/6th of its original cost. If Adept is owned then may now reduce to 1/9th.

Stage Two – Cost: +75, Table: 5

Now gains 6 additional Foci (total)

May reduce the life cost of a neuronic to 1/9th, 1/12th if Adept is owned, of its base cost.

May never Mind Bar.

Stage Three – Cost: +75, Table: 7

Now gains 9 (total) additional Neural Foci.

May now reduce the life cost of a neuronic to 1/12th, 1/15th if adept is owned, of its base cost.

May never be immune to Neuronic Informational effects.

May never use Shadow Mind, Intellect Fortress or similar.

Appendix: Life Scales

Human Neuronic Subclass	1st	2nd	3rd	4th	5th	6th	7th	8th
Human Mystic	25/8	27/9	29/10	31/11	33/12	35/13	37/14	39/15
Human Psi Master	26/9	29/10	32/11	35/12	38/13	41/14	44/15	47/16
Human Seer	25/8	27/9	29/10	31/11	33/12	35/13	37/14	39/15
Human Silver Warden	27/9	31/11	35/12	39/13	43/15	47/16	51/17	55/18
Human Awakener	23/7	25/8	27/9	29/10	31/11	33/12	35/13	37/14

Non- Human Subclass	1st	2nd	3rd	4th	5th	6th	7th	8th
Elysian Mind Weaver	22/7	23/7	24/7	25/8	26/8	27/8	28/9	29/9
Farfolk Awakener	23/7	25/8	27/9	29/10	31/11	33/12	35/13	37/14
Ratfolk Psi Master*	26/9	29/10	32/11	35/12	38/13	41/14	44/15	47/16

Acknowledgements and Thanks

Firstly I'd like to say thank you so much to everyone who helped with the writing of these books. Looking at the rules, the formatting and the proof reading. A special thank you goes to Andy Washington who dedicated hours of his life to the pain of indexing this book and putting it in order.

I hope that this long project (how foolish were we to think it could be done in six months) will make it a lot easier to keep the books up to date and ensure future updates are a lot smoother.

So enjoy reading them all and abusing what lies within until it gets changed. ☺
